### FUND OBJECTIVE

To achieve long term capital growth with lower volatility than a fund which invests solely in equities. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), fixed income securities (with no restriction on the minimum credit rating), property, commodities and currencies.

### INVESTMENT OPPORTUNITY

- A highly qualified and experienced management team actively manages the Fund on the basis of a fundamental valuation approach.
- The objective is to identify potential investments that, in the Sub-Investment Manager's opinion, are the most attractive to generate interesting and profitable opportunities for investors.
- The Fund invests in a broadly diversified investment universe and seeks opportunities for returns wherever they exist.
