Background to the Company

Pacific Capital UCITS Funds plc (the "Company") was incorporated in Ireland on 24 November 2014 as a public limited company under the Companies Act 2014, as amended (the "Companies Act") with registration number 553111. Unless otherwise provided for in this report, all capitalized terms shall have the same meaning herein as in the latest Prospectus of the Company dated 1 February 2022 (the "Prospectus").

The Company is an open-ended investment company with variable capital and was established pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended (the "UCITS Regulations") and (the Central Bank UCITS Regulations 2019).

The Company is organized in the form of an umbrella fund with segregated liability between its sub-funds (each a "Fund" collectively the "Funds").

At 31 December 2023, the Company consisted of Seventeen Funds, detail as follows:

| Fund | Launch Date |
|--|------------------|
| Pacific Multi-Asset Accumulator – Conservative Fund | 20 January 2017 |
| Pacific Multi-Asset Accumulator – Core Fund | 20 January 2017 |
| Pacific Multi-Asset Accumulator – Defensive Fund | 20 January 2017 |
| Pacific Multi-Asset Accumulator – Plus Fund | 20 January 2017 |
| Pacific North of South EM All Cap Equity Fund | 23 November 2017 |
| dVAM Global Equity Income PCP Fund | 17 January 2019 |
| dVAM Balanced Active PCP Fund | 13 February 2019 |
| dVAM Growth Active PCP Fund | 13 February 2019 |
| dVAM Cautious Active PCP Fund | 15 February 2019 |
| Pacific G10 Macro Rates Fund | 8 March 2019 |
| dVAM Diversified Liquid Alternatives PCP Fund | 22 July 2019 |
| dVAM Global Equity Focus Strategy PCP Fund | 16 December 2020 |
| Pacific MA Sustainable - Balanced Fund | 16 February 2021 |
| Pacific Longevity and Social Change Fund | 28 October 2021 |
| Pacific North of South EM Equity Income Opportunities Fund | 10 June 2022 |
| Pacific North American Opportunities Fund | 25 April 2023 |
| Pacific Coolabah Global Active Credit Fund | 11 October 2023 |

Investment objectives

Pacific North of South EM All Cap Equity

The investment objective of the Fund is to achieve long term capital appreciation by investing primarily in equity and equity related securities (such as warrants and rights issues). The Fund may invest up to 10% of its net assets, on a short term basis. The Fund may invest up to 15% of its net assets value ("NAV"), in fixed income securities and preferred stock.

Pacific Multi-Asset Accumulator - Conservative Fund

This Fund will typically take a comparatively small exposure to gains in equity markets, with such exposure ranging from 20% to 60% of NAV and the remainder invested in fixed income and other asset classes.

Pacific Multi-Asset Accumulator - Core Fund

This Fund will typically take a balanced exposure to gains in equity markets, with such exposure ranging between 40% and 85% of NAV and the remainder invested in fixed income and other asset classes.

Pacific Multi-Asset Accumulator – Defensive Fund

This Fund will typically take a smaller exposure to gains in equity markets, with such exposure ranging up to 35% NAV and the remainder invested in fixed income and other asset classes.

Background to the Company (continued)

Investment objectives (continued)

Pacific Multi-Asset Accumulator - Plus Fund

This Fund will typically take an active exposure in equity markets, with such exposure ranging up to 100% of NAV.

dVAM Global Equity Income PCP Fund

The Fund aims to deliver both income and capital appreciation through investing in global equities. The Fund seeks to achieve its investment objective through investing primarily in global equity securities of dividend paying companies that are well placed to be able to pay sustainable dividends into the future.

dVAM Balanced Active PCP Fund

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), fixed income securities (with no restriction on the minimum credit rating), property, commodities and currencies.

dVAM Growth Active PCP Fund

The investment objective of the Fund is to achieve long term capital growth. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), fixed income securities (with no restriction on the minimum credit rating), property, commodities and currencies.

dVAM Cautious Active PCP Fund

The Fund aims to achieve long term capital growth with lower volatility than a fund which invests solely in equities. The Fund seeks to achieve this objective by investment primarily in open ended collective investment schemes which gain exposure to equities (e.g. shares), fixed income securities (with no restriction on the minimum credit rating), property, commodities and currencies.

Pacific G10 Macro Rates Fund

The Fund's investment objective is to deliver positive returns over a rolling 12-month period.

dVAM Diversified Liquid Alternatives PCP Fund

The Fund's investment objective is to achieve long-term returns of the Bank of England Base Rate +4%, net of fees, over rolling five year annualised periods.

dVAM Global Equity Focus Strategy PCP Fund

The Fund's investment objective is to deliver capital appreciation through investing in global equities.

Pacific MA Sustainable - Balanced Fund

The Fund's investment objective is to provide capital growth over the long term primarily through investments which meet sustainable investment criteria.

Pacific Longevity and Social Change Fund

The investment objective of the Fund is to deliver long term capital growth in USD through investing primarily in equities and equity-related instruments issued by companies linked to the ageing of the population and increasing life expectancy worldwide while also incorporating Environmental, Social and Governance criteria ("ESG") into the investment process.

Background to the Company (continued)

Investment objectives (continued)

Pacific North of South EM Equity Income Opportunities Fund

The investment objective of the Fund is to produce a consistent level of income through investment in high yielding equities while also growing the net asset value.

Pacific North American Opportunities Fund*

The investment objective of the Fund is to achieve long—term capital appreciation by investing primarily in North American equity securities.

Pacific Coolabah Global Active Credit Fund**

The Fund's investment objective is to achieve a return in excess of global corporate bond markets by investing primarily in global investment grade corporate debt securities and government or sovereign bonds, using derivatives where appropriate.

There can be no guarantee that the Funds will achieve their investment objectives.

Full details of the investment objectives and policies of the Funds are set out in the Prospectus and related Supplements.

^{*}Launched on 25 April 2023.

^{**}Launched on 11 October 2023.

Directors' Report

The Directors present to the shareholders the statutory report together with the audited financial statements of, the Company for the financial year ended 31 December 2023.

The Company is an umbrella fund with segregated liability between Funds and an open-ended investment company with variable capital incorporated in Ireland on 24 November 2014 with limited liability.

The functional currency of the Pacific Multi-Asset Accumulator — Conservative Fund, Pacific Multi-Asset Accumulator — Core Fund, Pacific Multi-Asset Accumulator — Defensive Fund, Pacific Multi-Asset Accumulator — Plus Fund, dVAM Balanced Active PCP Fund, dVAM Growth Active PCP Fund, dVAM Diversified Liquid Alternatives PCP Fund and Pacific MA Sustainable — Balanced Fund is Pound Sterling ("GBP") and the functional currency of the Pacific North of South EM All Cap Equity, dVAM Global Equity Income PCP Fund, Pacific G10 Macro Rates Fund, dVAM Global Equity Focus Strategy PCP Fund, Pacific Longevity and Social Change Fund, Pacific North of South EM Equity Income Opportunities Fund, Pacific North American Opportunities Fund, and Pacific Coolabah Global Active Credit Fund is US Dollar ("USD").

There was no change in the nature of the Company's business during the financial year.

Results, activities and future developments

The results from operations are set out in the Statement of Comprehensive Income. A detailed review of activities of the Company are contained in the Investment Manager's Report and Sub Investment Manager's Report. The nature of the business is expected to remain the same in the future.

Directors

The Directors who held office at any time during the financial year are detailed below:

Raymond O'Neill* (Irish)
Victoria Parry* (British, Irish resident)
James Davidson** (British)

- * Non-executive Independent Director.
- ** Non-executive Director.

Directors' and Company Secretary's interests in shares and contracts

The Directors, the Company Secretary, and their families had no beneficial interests in the share capital of the Company at 31 December 2023. None of the Directors has a service contract with the Company.

The Directors received USD 66,472 (31 December 2022: USD 66,558) in fixed Directors' fees for the financial year ended 31 December 2023 and USD 35,550 (31 December 2022: USD 37,702) remained payable as at 31 December 2023. Directors' fees are only applicable to independent directors.

Dividends

It is not the intention of the Directors to declare any dividend on any share classes in the Multi-Asset range of Funds, the Pacific G10 Macro Rates Fund or the Pacific Longevity and Social Change Fund. However, Pacific North of South EM All Cap Equity can make distributions quarterly and dVAM Global Equity Income PCP can make distributions semi-annually. During the financial year ended 31 December 2023 Pacific North of South EM All Cap Equity Fund declared a dividend of USD 13,103,112 (2022: USD 11,253,211) in relation to the Class GBP Z Dist Shares, Class GBP Inst Dist Shares, Class GBP R2 Dist Shares and Class USD Inst Dist Shares for Q4, Pacific North of South EM Equity Income Opportunities Fund declared a dividend of USD 1,966,260 (2022: USD 557,319) in relation to Class GBP Inst Dist Shares and Class EUR Inst Dist Shares for Q4 and dVAM Global Equity Income PCP declared a dividend of USD 7,743,183 (2022: USD 9,115,252) in relation to the Class GBP E2 Shares, Class USD A2 Shares, Class GBP B2 Shares, Class GBP A2 Shares, Class GBP D2 Shares, Class USD D2 Shares, Class USD E2 Shares, Class EUR A2 Shares, Class EUR E2 Shares, Class EUR D2 Shares, Class EUR B2 Shares, Class AUD A2 Shares, Class USD B2 Shares and Class CHF A2 Shares.

Accounting records

The Directors ensure compliance with the Company's obligation to maintain adequate accounting records by appointing competent persons to be responsible for them.

The accounting records were maintained by Citibank Europe Plc at 1 North Wall Quay, Dublin 1, Ireland.

Directors' Report (continued)

Directors' compliance statement

In accordance with Section 225 of the Companies act 2014, as amended, the Directors:

- (a) acknowledge that they are responsible for securing the Company's compliance with its relevant obligations; and
- (b) confirm that
 - (i) a compliance policy statement has been prepared setting out the Company's policies (that, in the Directors' opinion, are appropriate to the Company) for ensuring compliance by the company with its relevant obligations;
 - (ii) an adequate structure is in place, that in the Directors' opinion, is designed to secure material compliance with the Company's relevant obligations; and
 - (iii) an annual review procedure has been put in place to review the Company's relevant obligation and ensure a structure is in place to comply with these obligations.

Connected Persons

Regulation 43 of the Central Bank UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted: a) at arm's length; and b) in the best interest of the unit holders of the UCITS".

The Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43 are applied to all transactions with a connected party; and all transactions with connected parties that were entered into during the financial year to which the report relates complied with the obligations that are prescribed by Regulation 43.

Significant events during the financial year

See Note 14 in the notes to the financial statements.

Significant events after the financial year end

See Note 15 in the notes to the financial statements.

Corporate governance statement

The Company is subject to compliance with the requirements of the Companies Act and the Central Bank UCITS Regulations, as applicable to the Company.

The Company assessed the measures included in the voluntary Corporate Governance Code for Collective Investment Schemes as published by the Irish Funds in December 2011 (the "Irish Funds Code"). The Directors adopted the corporate governance practices and procedures in the Irish Funds Code with effect from 6 February 2015.

The Corporate Governance Code recommends that the Directors of the Company include one representative of the investment manager.

Risk management objectives and policies

The main risks arising from the Company's financial instruments are market price, interest rate, foreign currency, liquidity and credit risk. For further information on risk management objectives and policies, please see Note 9 of these financial statements and the Prospectus and Supplements of the Company.

Going concern

The Directors assess the Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and use the going concern basis of accounting unless they either intend to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

Directors' Report (continued)

Statement on relevant audit information

Each of the persons who are Directors at the approval date of these financial statements confirm:

- as far as the Director is aware, there is no relevant audit information of which the Company's statutory auditors are unaware; and
- the Director has taken all the steps that he or she ought to have taken as a Director in order to make himself or herself aware of any relevant audit information and to establish that the Company's statutory auditors are aware of that information.

Independent auditors

Deloitte Ireland LLP, Chartered Accountants and statutory audit firm, will continue in office in accordance with Section 383 (2) of the Companies Act.

Audit committee

There is no Audit Committee due to the size, scale and complexity of the fund.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with the Companies Act.

The Companies Act requires the Directors to prepare financial statements for each financial year. Under the Companies Act the Directors have prepared the financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Under the Companies Act the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year and otherwise comply with the Companies Act.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with IFRS and ensure that they contain the additional information required by the Companies Act; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act, as amended and enable those financial statements to be audited.

The Directors are responsible for safeguarding the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary who has been appointed as Depositary to the Company pursuant to the terms of a depositary agreement. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

For the financial year ended 31 December 2023

Pacific Multi-Asset Accumulator Range

End of March

Markets were roiled over the course of the month, as US Regulators intervened to shut down Silicon Valley Bank (SVB) and Signature Bank (SBNY) due to concerns over their liquidity. SVBs financial health and solvency were in question as consumers withdrew their deposits, causing the bank to suffer losses on the sale of securities to meet the withdrawals. Despite an unsuccessful attempt to raise equity, SVBs shares plummeted, and the bank was ultimately placed in receivership by the Federal Deposit Insurance Corporation (FDIC), making it the second largest bank failure in US history. SVB was unique in that it had a concentrated deposit base of technology companies, and it did not hedge its interest rate risk within its asset book, a critical error in a year like 2022 where the value of government bonds fell sharply. The impact on markets was compounded by Credit Suisse having to be bought by UBS, in a deal brokered by the Swiss authorities, again due to confidence concerns and deposit withdrawals.

Both of these incidences point to how raising interest rates tightens financial conditions and can cause things in the financial system to 'break'. Our view is that in the medium-term banks will become more cautious with their loan books, which could lower potential growth in developed market economies. Despite this, equity markets were reasonably resilient, with global equities in Sterling slightly positive over the month. The US was the strongest performing region, with the UK lagging due to its sector composition. We have moved to become defensive in equity positioning, as our view is that growth concerns will likely continue to materialise as central banks continue their fight against inflation.

Fixed income markets were positive, as markets repriced a lower likelihood of further Federal Reserve rate hikes due to the banking liquidity problems. Within fixed income, our holdings in inflation linked bonds in the UK and the US performed strongly. Alternatives were slightly weaker over the month; we continue to believe that our holdings in both UK Property and listed Energy assets offer us incredibly attractive discounts to NAV.

Within diversifying assets, holdings in curve steepener trades, which go long and short parts of the yield curve, as well holdings in fixed income relative value strategies performed strongly, as the shape of the yield curve shifted due to growth concerns.

End of June

The global economy showed a mixed performance in June, particularly regarding progress on inflation. In the US, headline inflation decreased to 4%, which came in below expectations; however, core inflation remained stubbornly high. In the UK, core inflation continued to accelerate, prompting the Bank of England to increase interest rates by 0.5% to 5%, and for the market to anticipate nearly five more 25bps interest rate hikes from here.

Central bankers gathered in Sintra in Portugal for their annual ECB Forum. At a panel interview with the big four (Fed, ECB, Bank of England and Bank of Japan), they reaffirmed their view that, with the exception of the Bank of Japan, they have carried out a large portion of their hikes. Looking ahead, some additional hikes are likely, but decisions will be data dependent, taking into account the evolving inflation picture.

Equity markets were positive over the course of the month, with the US once again leading global markets with further large gains in stocks within the technology industry. Elsewhere, returns were more muted, with the UK lagging over the month. Within fixed income, market returns were mixed with shorter dated bonds coming under pressure due to stickier inflation numbers and hawkish rhetoric from central banks.

Within alternatives, UK commercial property was weaker over the course of the month, as higher gilt yields weighed on the asset class. Within diversifying assets, returns were mixed, with weakness in the Japanese Yen. The Yen is now over 30% undervalued versus Sterling based on purchasing power parity, a level rarely seen in the last 30 years. Finally, our holding in the AQR Style Premia fund performed strongly over the course of the month, building on the strong performance over the last two years.

End of September

Markets were mixed over the course of September, with pressure from the bond market feeding through into risk assets. The Federal Reserve paused its rate hiking cycle in September, as US inflation data came in broadly in-line with market expectations, with Core CPI running at 4.3% year-on-year. Inflation has moderated so far in this hiking cycle, without weaking the labour market or consumer strength so far. However long bond yields rose over the course of the month, as markets digested more issuance from the US treasury, as well as rhetoric from central banks that interest rates will need to remain higher for longer.

The positive correlation between equity and bond markets is a worry for investors, as it is a reminder of the change in market regime seen in 2022, however in the most recent period, the scale of these drawdowns has been lower and comes at a time when growth appears to be slowing and inflation normalising.

For the financial year ended 31 December 2023

Pacific Multi-Asset Accumulator Range (continued)

End of September (continued)

Equity markets were mixed in September, with global indices modestly down. Both the UK and Emerging Markets were positive performers over the month, with our holding in the Pacific North of South funds outperforming broader emerging market indices. Fixed income fell over the course of the month, as yields moved higher across global markets, although UK bonds were more resilient. We continue to be underweight duration and defensively positioned in fixed income and have further reduced our exposure to long duration bonds over the month.

Diversifying assets added value over the month, with strategies across trend and risk premia generating strong absolute returns. A holding in the US Curve Steepener generated positive returns; this strategy goes long shorter dated fixed income and short the long end to take advantage of the normalisation of the inverted shape of the yield curve.

Fixed income was a slight negative over the course of the month, with Fitch downgrading US creditworthiness from AAA to AA+, citing concerns about US debt policy and political functioning. This, combined with the announcement of more debt issuance in the US led to bond yields moving higher, particularly at the longer maturity end of the US debt curve.

Finally, in a month where both equities and bonds returns were negative, diversifying assets generated positive returns over August.

End of December

The final month of 2023 delivered a rally in almost all major asset classes, as the market began to price in a greater likelihood that central banks will begin an interest rate cutting cycle in mid-2024. This narrative shift is important, as previously the market was expecting rates to remain 'higher-for-longer' to stifle any possibility of persistent inflation.

Inflation figures in the US came in line with expectations, at 3.1% YoY, this marks a significant normalisation from much of 2023. The labour market continues to be robust, and whilst job openings were lower than expected by economists, both the unemployment rate and average hourly earnings continued to be strong. December also saw the completion of the COP 28 conference in Dubai, which whilst promising explicitly to shift away from fossil fuels was also controversial in both its location and commitments to several key tenets of de-carbonisation efforts.

Equities were positive over the course of the month, with little in the way of regional dispersion over the month, but after a period of relative underperformance of sustainable strategies versus convention equities, December saw a large reversal of this trend. Holdings in several sustainable UK Equity funds outperformed their benchmarks over the month, including the Janus Henderson UK Responsible Income fund.

Bonds continued to rally across the curve, as they had through November, as market participants moved to price in rate cuts. Positions in longer dated US Inflation linked bonds performed strongly over the month.

Alternatives were the standout performers in December with holdings in UK commercial property and UK Solar infrastructure rallying sharply. Many of these securities were up nearly 10% over the month and continue to trade at a significant discount to their underlying net asset value. Finally, diversifying assets were mixed during the month, continuing to exhibit low correlations to bonds and equities.

For the financial year ended 31 December 2023

Pacific G10 Macro Rates Fund

End of March

Something finally broke, in fact a few things did. March was dominated by record deposit withdrawals after the demise of a few banks, some American and one Swiss. The gist being that 475bp of tightening in a little over a year by the US Federal Reserve had not been a common scenario for risk models. Not least ones with unhedged duration liabilities like SVB. The Fed and FDIC were quick to offer deposit protection and liquidity vehicles for banks to cash swap US treasuries at par, doing just enough to stop the bank run snowballing. However, a significant amount of bank deposits have switched to money market funds, and with record rate differentials, this seems likely to continue. In Europe, the litany of disasters befalling Credit Suisse over recent years, finally caught up with them as their CDS blew sky high on Friday 17th March and the Swiss regulator forced a shotgun marriage with UBS over the subsequent weekend. The yoyo of short end rates in G10 continues with many core macro positions being stopped out and rapid pricing of emergency cuts replacing "higher for longer". This rates volatility has permeated through the G10 as continued mixed data supports both hard and soft landing narratives. The uncertainty about what breaks next and financial credit availability is now the worry going forward. Rollover of commercial property loans being the topic of choice.

Undoubtedly credit access will be tightening and the impact on economic growth, labour market and finally inflation is open to debate. The cycle is now very fluid with several cuts being factored in the 3rd and 4th quarters of 2023. Such an environment has shown our portfolio diversification to have been sufficiently robust, and also very attractive for rotation of risk.

Over the month the ECB and SNB hiked by 50bps, while the Norges, BoE, RBA and Fed hiked by 25bps. The BoC and BoJ were unchanged.

The US 10y closed the month 47bps lower and 5s-30s swap was 33.55bps steeper.

End of June

June proved to be yet another brutal month for UK rates, The pressure for central banks to stay hawkish has been amplified as presented by the G4 at last week's Sintra conference. UKs core inflation is stubbornly persisting and, in many ways, has acted as a warning to other central banks. Canada and Australia resumed their hiking pattern after their recent pause, and both Norway and the UK increased their pace of tightening policy by 50bps. Norway being the only other developed country, besides the UK, to be experiencing an increase in core inflation. Unexpected higher policy rates forced an unwinding of short end risk which resulted in losses across the market. The quarterly move in 2yr UK gilts was well in excess of 160bp. This has only occurred twice in the past 30yrs, namely in March 1994 and September 2022.

The rapid hiking cycle, seen over the last 15 months, has yet to fully impact the wider economy. Opposing this are the residual forces from excess savings during Covid lockdowns, and fiscal policy, have enabled the consumer to be more robust than previously assumed. The outlook, however, remains tentative as yield curves continue to invert significantly. Thereby expressing concern that inflation is sticky whilst also shortening the odds of a recession. This is not without reason, as data is increasingly showing tightening of credit conditions and softening in demand, yet the important lagging indicator of core inflation is generally decreasing at a frustratingly slow rate. The PAM G10 Macro portfolio is positioned to benefit from a weakening of the economy, which typically occurs in the last part of the business cycle.

The recent volatility has stretched the mean reverting trades in our portfolio, producing a drawdown, but also providing opportunities for healthy returns.

The US 10y closed the month 36.7bps higher and 5s-30s swap was 32.9bps flatter

End of September

September had only the ECB, Norges and Riksbank each raise base rates by 25bp. The remainder of G10 central banks have stood pat, and unlikely to change target rates in the near term. The bear steepening trend has continued with concern about increased bond issuance taking yields back to 2007 levels.

Buyers have not appeared as yet, and with central banks decreasing balance sheets via QT, and SWF's selling bond holdings, the rates market is struggling to find a clearing price. The 'higher for longer' mantra is finally being taken at face value, and with the diminished odds of a 'Fed Put', are beginning to effect pricing in other asset classes. The 10Y term real rate has also been increasing, cementing tighter financial conditions, and leaving market participants nervous about refinancing pressures yet to come. The ingredients are in place for sustained pressure on any leveraged or zombie like companies or funds (REITS, PE), elevating nervousness in the market about the odds of something else breaking.

For the financial year ended 31 December 2023

Pacific G10 Macro Rates Fund (continued)

End of September (continued)

Our portfolio reaped the benefits of steepening yield curves and finished the month and the quarter on a positive. We have sought to increase the number of protection like trades on the fund, have taken some profits, and are wary of a volatile and less liquid last quarter of the year.

The US 10y closed the month 47.7bps higher and 5s-30s swap was 13.1 bps steeper.

End of December

December continued November's sharp reversal of trends seen in the prior months. The UST10y totalled a 120bp downdraught from the 5% end of October high with the UST long bond index recording its biggest ever 2 month positive return of over 10%. The data generally pushed the soft landing agenda, but the real accelerator was a distinct lack of push-back against the aggressive market pricing of cuts in 2024 from Fed President Powell at their monthly governors meeting. This lack of messaging, combined with an additional cut being guided via a lower dot plot in 2024, provided the green light for a further bond rally, which eventually priced in 175bp of cuts next year. Additionally, the UST 10y yield rallied a further 50bp over December to settle just shy of 3.90% at year end. Other core markets got dragged along in the frenzy as UK and EUR rates markets similarly priced in 6/7 rate cuts in 2024. We hold the view that a significant amount of rates alpha has now been priced and the pressure is on data to justify this through a slowing labour market and further lowering of inflation.

The sole G10 central bank to move rates over the month was Norway's Norges Bank, who, true to their word and against the grain, raised the deposit rate by 25bp to 4.50% and declared a 20% chance of a further hike at their March meeting. So, we endured a volatile end to what has been a volatile year. This is confusing in some cases as the UST 10y bond almost finished within a basis point of where it started the year. The portfolio, which had weathered the moves of November, relinquished some of the years gains in December to record an overall healthy 2023 result. We believe 2024 will present many macro relative value opportunities to monetise.

The US 10y closed the month 48.7bps lower and 5s-30s swap was 1.1bps steeper.

For the financial year ended 31 December 2023

Pacific Longevity & Social Change Fund

End of March

The MSCI World equities index rose 1% in March (in GBP) with European benchmarks giving up some outperformance seen earlier in the year, while US resilience was driven by the Tech sector. On the macroeconomic front, CPI indices remain stubborn with stickiness in core inflation in Europe and the US. Central banks meanwhile signalled determination to continue the pace of monetary tightening. Financials dominated news flow following the failure of Silicon Valley Bank in the US and the Swiss government assisted takeover of Credit Suisse by UBS, leading to a sharp selloff in financial stocks including banks, brokers and insurers. While the response from regulators seems to have stabilised the financial system for now, concerns have shifted to the medium-term implications of a possible credit crunch resulting from increased regulatory oversight. Commercial Real Estate exposures of banks and insurers also continue to draw scrutiny. While we believe a repeat of a GFC scenario is remote, recessionary risks have undeniably gone up.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy declined 1.4% in March (in GBP), underperforming its global benchmark primarily due to a strong rally in Information Technology and Communication Services stocks (e.g. Microsoft, NVIDIA, Meta, Apple). The Fund has zero exposure to these sectors given the limited connection between the growth drivers of these companies and the longevity industry. Our Healthcare, Financials and Consumer Discretionary holdings, which generated positive alpha in the two prior months retreated, more than offsetting the strength in our Staples holdings. On a stock level, the top three absolute contributors to Fund performance in March were Lululemon, Cooper and Tandem Diabetes. The primary detractors were Amedisys, Brunswick and Intermediate Capital Group.

Looking at the Longevity & Social Change performance by theme, Education and Wellbeing was the top performer with strength across Fitness & Nutrition, Hygiene & Personal Care and Aesthetics & Vision subthemes. Positive performance was driven by Lululemon and Basic Fit both of whom reported positive fiscal updates. Lululemon reported a strong final FY23 quarter with a revenue driven earnings beat, moderating inventories and a strong outlook for the next fiscal year.

<u>Longevity Consumer</u> was the main laggard, held back by Financial Planning and Life Insurance. The Financials sector was the weakest performer in MSCI in March as troubles in the US regional banking sector and at Credit Suisse drove outflows from the space. We reduced our position in UBS following its takeover of Credit Suisse. While the acquisition terms appear favourable for UBS shareholders, our decision reflects upcoming execution risks and a temporary suspension of the share buyback, which was a key tenet of our positive thesis. The strongest performers in Financials was Julius Baer which is likely to be one of the main beneficiaries from consolidation in the wealth management space. ICG reversed strong gains from the prior two months, but we see it as relatively sheltered from the financial market turmoil with potential to benefit from tightening credit conditions in the medium term. Pets at Home also reversed its strong February gains however our recent meeting with management reaffirmed our positive stance on the pet companion industry.

The <u>Healthcare</u> theme performed broadly in line with the MSCI benchmark in March (+1% in GBP). However, our SMID-cap holdings endured a bumpy ride despite no discernible newsflow, with notable drawdowns (-10% to -25%) in Amedysis, Axonics, Guardant Health and Medicover. In <u>Later-Living</u>, we expect the Health Insurers to see some relief following CMS announcements at the end of March which should be seen as favourable by the market.

Outlook

As we move through 2023, troubles in the Banking sector add to the ongoing challenges of persistent inflation, tight labour markets and higher costs of financing. Despite this, we believe the outlook for the Longevity & Social Change universe remains robust. Across the globe, populations continue to age, and this creates opportunities for companies that provide products and services which cater to changing consumption patterns driven by shifts in demography. With the cost of capital climbing and inflation still running high we believe companies with strong management and a track record of execution should prove to be good long-term investments. We remain focused on identifying high quality companies with proven operating models and strong innovation characteristics that have exposure to the durable and resilient growth offered by the Longevity and Social Change theme.

For the financial year ended 31 December 2023

Pacific Longevity & Social Change Fund (continued)

End of June

The MSCI World equities index was up 3% June (in GBP), driven by gains in the US, as the debt ceiling stalemate became resolved, while Europe surrendered some of the earlier outperformance. Economic data remained largely supportive, with continued resilience in the jobs data and signs of moderating inflation in the US and Europe. Services remain the growth engine, supporting employment at high levels and largely offsetting softer trends in manufacturing. The effects of moderating raw materials prices, resilience in services and strong consumer capital positions will gradually fade through 2023, while tighter credit conditions may begin to translate into weaker jobs data, setting the stage for a Fed pause. There are some emerging signs of a weaker US consumer with corporates noting downtrading and softer demand. While recession remains a possibility, few market participants expect it to be a deep one as the stimulus provided during the Covid period and associated wealth effects will continue to act as a cushion.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy underperformed its global benchmark in June, driven by our Consumer Discretionary and Staples holdings, which more than offset strong relative performance in Healthcare. The strategy's minimal exposure to the technology and communication services sectors continued to weigh on performance as optimism around the potential impact of Artificial Intelligence continued. While many of our holdings are already leveraging AI and we are confident that many more will be able to harness AI to enhance their products and services, very few have participated in the current rally. On a stock level, the top three absolute contributors to Fund performance in June were Brunswick, Icon and Align Technology. The primary detractors were Humana, Adtalem and Reckitt Benckiser. Looking at the Longevity & Social Change performance by theme, Longevity Consumer delivered the strongest gains, driven by Travel & Leisure and Financial Planning. On a company level Brunswick, part of Travel & Leisure theme, was the top performer while Legal & General, part of the Life & Non-Life Insurance, was the main laggard. For Brunswick stable pricing discipline, resilience in premium products and updates from RV manufacturers reassured the market that margins may be more resilient to volume declines than in prior cycles and that worst case EPS scenarios are likely avoidable. Legal & General remained under pressure, as the appointment of an outsider to the CEO role surprised some market participants and with broader market concerns on persistently high UK inflation adding to the pressure.

Healthcare delivered a solid performance, led by Medical Devices and Drug Development & Manufacturing with strong gains in Icon, Conmed and Catalent. Pharmacy performance was held back by AstraZeneca and Eli Lilly with the former reflecting investor nervousness ahead of a late-stage data readout for a pipeline asset.

Education & Wellbeing had a positive month but saw divergent performance across subthemes. Aesthetics & Vision led with gains in Align Technology and Ulta Beauty. In Screening Exact Sciences provided a confident investor day update and a positive read out from its Cologuard 2.0 screening test, also lifting peer Guardant Health.

Fitness & Nutrition was boosted by lululemon which delivered a Q1 beat and raised full year guidance, driven by a sharp recovery in China and still resilient growth even in the more mature geographies including the US. Education was the weakest performing subtheme. Adtalem's first investor day, while broadly reassuring on long term targets, indicated a softer than expected FY24 outlook for margin. We remain confident in secular drivers of Adtalem's business as labour shortage in the US healthcare systems is likely to grow as the population ages and current practitioners retire. Later Living retracted as weakness in Health Insurance more than offset positive trends in Home-health & Nursing and Care Services. On a company level, Humana and United Health, both part of the Health Insurance subtheme, were the main laggards. Both companies provided financial updates indicating elevated outpatient activity was likely to lift Medical Loss Ratios. While Humana and United Health both reiterated FY23 EPS guidance, concerns over FY24 pricing and utilisation are likely to linger until Q3 when both companies will have better visibility on medical cost trends.

Outlook

Heading into the second half of the year, the macro picture remains mixed. On one hand there are signs of broadening weakness in the US consumer, uncertainty on the pace of recovery in China and deteriorating business sentiment in Europe. On the other hand, services demand remains resilient, US business sentiment surveys ticked up, destocking cycle is likely coming to an end and housing activity is stabilising. In this uncertain backdrop, we remain confident in our resilient and defensive portfolio positioning and believe the outlook for the Longevity & Social Change universe Identifiers remains secure.

For the financial year ended 31 December 2023

Pacific Longevity & Social Change Fund (continued)

End of September

The MSCI World equities index was down 0.9% in September (in GBP) with Developed markets and rate sensitive sectors leading the declines as long-term yields widened to a level not seen since 2007. IT, Real Estate, and Consumer Discretionary were the weakest performing sectors while Energy, Financials and Health Care gained. The higher for longer narrative re-emerged as oil prices climbed to the highest level so far this year and US GDP and labour market statistics continued to point to a resilient US economy. While a US government shutdown was avoided, concerns remain over a possible policy mistake and the impact from a resumption of US student loans repayments. The US consumer is showing signs of cooling as solid cash positions are gradually fading whereas credit demand and delinquencies are picking up.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy performed broadly in line with its global benchmark in September, helped by its zero allocation to the IT sector and a strong relative performance of its Staples holdings. On a stock level, the top three absolute contributors to Fund performance in September were Humana, GSK and United Health. The primary detractors were Exact Sciences, Cooper and Service Corp.

Looking at the Longevity & Social Change performance by theme, <u>Later Living</u> was the strongest contributor, driven by Health Insurance and Home Health & Nursing. Humana reiterated its EPS targets ahead of a broker conference and data from CMS pointed to slightly better than expected growth in MA plan enrolment than previously anticipated. Service Corp shares derated on no specific newsflow, likely reflecting concerns over the pace of pre-need sales at the time when the US consumer is likely to be selective with spending allocation.

<u>Healthcare</u> performance was polarised with a strong gain in Pharmacy subtheme more than offset by weakness in Medical Devices. In Pharmacy, GSK was the strongest contributor to performance supported by positive initial launch trends for its RSV vaccine Arexvy. Medical Devices saw broad-based weakness among the higher growth names such Tandem Diabetes, Transmedics and Conmed with derating likely driven by widening yields.

In <u>Longevity consumer</u> Travel and Leisure was once again the area of strength with both Brunswick and Booking contributing positively. Brunswick hosted an analyst day where long term targets were pushed out, reflecting near term discretionary consumer challenges and industry overstocking. The shares held up, however, reflecting the company's strong product positioning and already discounted valuation. Companionship was the main detractor from performance as Pets at Home sold off on the back of news that the UK CMA is reviewing the UK vet sector. We believe that Pets at Home, which operates its Vets business in a JV structure and under a common brand umbrella is likely to be relatively shielded from any regulatory fallout, though we acknowledge that the perceived overhang is likely to weigh on valuation for a period of time. Our Financial Planning holdings saw an average derating of 2% in September, slightly above the market, and therefore not out of line with what one would expect for this group given its beta and leverage to market performance.

<u>Education and Wellbeing</u> was the biggest detractor from performance in September. Exact Sciences, part of the Screening subtheme, and Cooper, part of the Aesthetics & Vision subtheme, were the main laggards. Haleon and Reckitt Benckiser, both part of the Hygiene & Personal Care subtheme were the main positive contributors. Education names Adtalem and Strategic Education both delivered positive performance too. In Fitness & Nutrition, lululemon delivered a strong quarter, further supported by a reassuring Q1 report from Nike at the end of the month, which indicated industry inventories are now at healthier levels.

Outlook

While the forecasts for the timing of the US recession continue to be pushed out, conditions into the year end remain uncertain. Consumer resilience, prolonged monetary policy drag, higher oil prices and delayed but not fully averted US government shutdown all pose concerns. On the positive side, employment remains strong and there are continued signs of normalising inventories, which could provide a short-term boost to manufacturing. Against this mixed backdrop, we remain focused on the reality that populations around the world are ageing which continues to create significant opportunities for companies that provide products and services that meet the changing consumption patterns driven by demographic shifts. Our longevity strategy is focused on identifying high-quality businesses with have such exposure and can deliver sustainable returns over the long term.

For the financial year ended 31 December 2023

Pacific Longevity & Social Change Fund (continued)

End of December

The MSCI World equities index was up 4% in December (in GBP) with Real Estate, Industrials and Financials posting the strongest gains, while Energy was once again the only sector to record a decline. Healthcare and Staples continued to lag the market while Consumer Discretionary performed in line. Inflation moderated further in the US and Europe and yields contracted as market participants factored in a higher likelihood of rate cuts by the Fed and the ECB. The soft-landing scenario for the global economy continues to play out but tailwinds to growth are fading. Consumer sentiment is mixed, excess savings are depleting, PMIs are in contraction zone, employment data is normalising and yet twelve-month forward earnings expectations remain near all-time highs. Conflicts in the Middle-East and Ukraine present risks to growth and commodity prices. In this complex environment, we believe the Longevity portfolio offers a balanced defensive stance and is well placed to benefit from long term demographic trends.

Portfolio positioning and performance

The Pacific Longevity & Social Change strategy outperformed its global benchmark in December, helped by our strong stock selection across Healthcare, Financials and Consumer Discretionary. On a stock level, the top three absolute contributors to Fund performance in December were Brunswick, Carlyle and Ulta Beauty. The primary detractors were Humana, United Health and Haleon.

Longevity consumer was the main contributor to performance with all subthemes posting gains, led by Financial Planning which benefitted from a continued rerating in Carlyle and ICG as well as a bounce in Legal & General. Legal & General released a number of updates highlighting solid momentum in its Retail Annuity sales as well as Americas Insurance business. Travel & Leisure subtheme also performed strongly with both Brunswick and Booking delivering sizeable relative gains. Pets At Home, part of the Companionship subtheme, was the main laggard.

Healthcare performance was driven by an ongoing rebound in the Medical Devices subtheme. On a stock level, Tandem Diabetes and Axonics drove the largest contribution to return. Pharmacy was the weakest subtheme in Healthcare, with Eli Lilly the main laggard.

In Education & Wellbeing Ulta Beauty, part of the Aesthetics & Vision subtheme, and Iululemon, part of the Fitness & Nutrition subtheme, were the two strongest contributors to performance, supported by solid Q3 updates. Nike on the other hand, was among the main laggards, as the company downgraded its full year revenue outlook with fiscal Q2 results, citing weaker than anticipated demand in China and EMEA. The company initiated a restructuring plan aimed at reducing its workforce which will incur restructuring charges in the remainder of the year.

Later Living was the weakest performer in December as strength in Service Corp International, part of the Funeral Services subtheme, was offset by weakness in Health Insurance, with Humana and United Health both finishing the month in negative territory. Humana's prior derating on the news of a potential combination with Cigna failed to reverse after merger plans were quelled.

Outlook

A cooling consumer, prolonged monetary policy drag and geopolitical stress, give cause for concern as we look ahead to 2024. On the positive side, employment remains strong and inventory restocking is yet to materialise, which could provide a short-term boost to manufacturing. Against this mixed backdrop, we remain focused on the reality that populations around the world are ageing and the social implications around this demographic transformation continues to create significant opportunities for companies that provide products and services that meet the changing consumption patterns driven by this phenomenon. Our Longevity and Social Change strategy is focused on identifying high-quality businesses which have such exposure and can deliver sustainable returns over the long term.

For the financial year ended 31 December 2023

Pacific North American Opportunities Fund*

*Launched on 25 April 2023.

North America

End of June

During June the Fund appreciated 6.0%.

The key contributors to performance were industrial holdings Woodward and BWX Technology as well as financial holdings Blackstone Mortgage Trust and Metlife. The performance of the financial holdings is noteworthy as fears abated over systemic risk in the financial system following recent bank failures.

The key detractors to performance were healthcare investments ICU Medical, Royalty Pharma, Elevance, Avantor and Biolife Solutions. Two separate trends negatively impacted the performance of healthcare sector in the quarter and captured significant investor attention: (1) elevated concerns about near-term the profit margin in the health insurance sector and (2) elevated concerns about health of customer demand in the life science tools space. The valuations of both of these sub-sectors may discount some level of near-term earnings risk. Healthcare remains the largest sector exposure of the Fund.

The technology sector continues to lead the market with the mega-cap technology shares continuing to appreciate as Artificial Intelligence remains the most prominent theme in equity markets and enthusiasm for its potential impact remains robust. The Fund continues to have zero exposure to the technology sector.

End of September

During September the NAV of the Fund fell -5.2%.

The key contributors to performance were healthcare holdings Molina Healthcare and BioLife Solutions, insurance holding Intact Financial, and materials providers Teck Resources and CRH.

The key detractor in the period was ICU Medical, our largest investment, whose share price declined (along with the shares of peers) due to concerns about the impact to surgical volumes from the widespread adoption of GLP 1 weight loss drugs. We added to our holding in the company during the month as our views of the company's earnings potential are unchanged. The other important detractors in the period were NextEra Energy and TransUnion, whose sentiment both suffered from rising interest rates.

The key US market stories in the quarter were (i) the rapid rise of US 30 year Treasury yields from 4.11% to 4.57% in the month (ii) widespread fears about the impact of GLP 1 weight loss drugs on healthcare and consumer businesses and (iii) the ongoing concerns of a potential government shutdown in the US.

End of December

During December the NAV of the Fund increased +6.5%.

The key contributors to performance were small cap healthcare investments ICU Medical and BioLife Solutions, as well as GFL Environmental, a North American provider of waste collection services, and CRH plc, a leading provider of building materials in North America.

The key detractors in the period were defensive investments such as health insurers Elevance Health and Molina Healthcare, as well as BWX Technologies, a leading provider of components and services for the nuclear power industry.

The key event in the month was the rapid decline of US Treasury yields, which fuelled significant rallies across equity and fixed income markets particularly in riskier asset classes. The decline in US Treasury yields has been fuelled by moderating inflation trends, and consensus increasingly expects economic stability in the mid-term.

For the financial year ended 31 December 2023

Pacific North of South EM All Cap Equity Fund

End of March

During the first quarter of 2023 the fund outperformed the MSCI Emerging Markets index by 3.3%. Most major markets including Taiwan, China and Mexico contributed positively to relative performance, as did the fund's avoidance of India. The notable exception was Brazil where a series of missteps by the Lula government kept interest rates high and further pressured equity valuations. While we have been moderating our exposure to Brazil, we still believe valuations are in distressed territory and cost of capital is more likely to decline from current levels.

Within Latin America, Mexico has been the stand-out performer in recent months. A key factor in this has been the theme of near-shoring, accelerated by Covid and political factors. This is not a new phenomenon however.

At North of South we spend a lot of time discussing the implications of widespread availability of text based "AI" models such as Chat GPT. They are delightfully good at crafting well written text on any subject. There is no question that for any white-collar job involved in outputting any form of text (journalism, advertising, software, technical documentation, customer relations, business development, creative writing, ahem... quarterly report writing...) it will be an incredibly powerful tool although it still has limitations.

A quarterly update cannot possibly be sufficient to work through all the implications of this revolution, but we can highlight some key thoughts. The parallels to historic industrial revolutions are clear. Farm productivity led to fewer peasants and more factory workers. Automation in factories increased output and reduced need for labour, leading to more service workers. The internet has put retail employees out of jobs but made them delivery drivers. Each time long-term mass unemployment was predicted and did not happen as workers transitioned into new types of jobs - increased productivity ultimately led to faster economic growth and demand.

Indisputably, fewer man-hours will be needed to generate content going forward. The ability to write software and automate tasks will be increasingly democratized. In some areas decision making by AI may become or already is superior to human judgement. This should be disinflationary as fewer highly paid specialists will be needed in many fields to produce the same output. A key difference to prior industrial revolutions is that it displaces middle class jobs rather than the unskilled. This could be a positive by boosting productivity of the highly educated but also reduce the group's earnings and spending power. A smaller group of coders is needed when using AI to work through tasks. Will a redundant software engineer find it easier or harder to reinvent himself than a 19th century peasant? On the other hand, poor literacy skills may become less of an impediment to career advancement and improve social mobility. As always there will be winners and losers.

Removing bottlenecks in skilled specialist availability seems like a good thing for the global economy, especially where inflation is a concern. An obvious direct impact should be increased capital investment in IT hardware to accommodate the various AI models. Optimistically, higher productivity could lead to more leisure time and spending on travel, entertainment and education. Pessimistically, companies will cut costs but simultaneously reduce employment and wages and therefore consumer end-demand.

In Emerging Markets the impacts will vary depending on their stage of economic development but the phenomenon should have broadly similar impacts globally. Given the hardware angle, Taiwan and Korea seem well placed. IT and outsourced service sectors in India and the Phillipines may be more at risk. It is clear that we need to continue to discuss and monitor the risks and opportunities while bearing in mind the maxim that markets always overestimate the near term impacts but underestimate the long term impacts of new technologies.

End of June

During Q2 2023 the fund outperformed the MSCI Emerging Markets index by 5.3%.

The largest contribution by some margin came from Brazil this quarter, confirming the market's status as a high beta play. China also contributed positively relative to the index, with our positions outperforming. Korea, the UAE, Taiwan and some smaller markets also performed well. The largest drag relative to the index was India where we still have no direct exposure. During the quarter we have been adding to China, particularly to some of the larger internet companies. We also rotated some of the Brazilian portfolio and added further to the UAE. This was funded by trimming some of our commodity and energy exposures in Latin America alongside slightly reducing our Taiwanese overweight into Al driven strength.

For the financial year ended 31 December 2023

Pacific North of South EM All Cap Equity Fund (continued)

End of June (continued)

Potential investors sometimes ask us, "Aren't Emerging Markets all about growth? Why would you want to be a value investor?", which is reasonable given the expected GDP catch-up that should in theory provide a tailwind to our companies.

Successful quality and growth investing are actually just a subset of value investing. We agree that high quality stocks with high growth prospects deserve a premium valuation: quality stocks because they are less risky and therefore enjoy a lower cost of capital and discount rate; growth stocks because of larger expected future cashflows.

North of South's approach deals with both the challenge of determining how high this premium should be and ensuring we do not overpay for these great businesses, as if you overpay, you will do worse than the market since eventually valuations converge towards fair value.

Our tailored multi-factor cost of capital approach penalizes lower quality companies, operating in riskier countries with a higher cost of capital, meaning we are not willing to pay up for those businesses. Additionally, our valuation models always assume long term growth rates fade towards zero in real terms, meaning we cannot get carried away by highly uncertain distant growth prospects.

Demonstrably, many high growth stocks have provided very high returns and beaten the market over the years, actually reflecting a successful value investment. Many of these were originally undervalued given their quality and growth prospects at the time, whereas many others are a function of survivorship bias. Typically, these companies with then unproven business models ended up being successful, their high returns compensating for the other promising upstarts that failed. Overpaying for these stocks is very easy, evident in a series of high-profile futuristic growth stock ETFs in the US which overpaid for portfolios of unproven companies, generating huge losses for investors.

Coming back to Emerging Markets, the five largest active global EM funds focussed on growth manage US\$165bn in AuM, compared to \$45bn for the largest value funds. With such an imbalance of buyers, you expect growth stocks to be overvalued as a scarce commodity, making it difficult for growth investors to outperform. For value investors, there is far less competition to own attractively valued stocks that do not appear to have the desired levels of growth. Thankfully, this makes our job easier.

End of September

During September, the fund outperformed the MSCI Emerging Markets index by 0.8%.

In September, the fund outperformed the MSCI Emerging Markets index by 0.8% and 1.4% for the third quarter. This outperformance resulted from stock selection, with the most significant gains coming from our holdings in UAE, Taiwan, Brazil, Kazakhstan, and Ghana. Our underweights in India and Turkey negatively impacted relative performance.

During the quarter, we added new positions in Mexico and Brazil and exited certain Latin American resource stocks. We also adjusted our Taiwan tech sector holdings, moving from a highly-valued AI stock to a better value option.

Being a value investor isn't just about snapping up bargains. A key benefit of valuation discipline is the avoidance of costly mistakes. Investment managers are (for now) mostly human and therefore prone to biases. These include the optimism bias and the endowment bias, both of which can lead them to hold stocks that have become overvalued and ultimately underperform as the valuation corrects over time.

For the financial year ended 31 December 2023

Pacific North of South EM All Cap Equity Fund (continued)

End of September (continued)

With the benefit of hindsight, we can easily spot such mistakes but for investors caught up in the growth prospects of a business it may be more of a challenge. Alibaba, the Chinese ecommerce giant is a perfect illustration of this principle. In 2014 when it listed, it was considered to have outstanding growth prospects driven by continuing expansion of the Chinese middle class and increasing penetration of internet use. It was expected to grow at breakneck speeds.

Broadly speaking this thesis has played out and the optimists have been proven correct. The company has, despite competition, remained the dominant player in Chinese e-commerce and expanded abroad. Alibaba's revenues will have soared almost twenty-fold since it listed (from RMB50bn in 2014 to near RMB1trn in 2024). For growth investors this should have been a home run. The problem was that in 2014 the stock was already trading on extraordinary valuations. Its prospects were so splendid that anyone who wanted to participate had to pay up for them.

Alibaba's enterprise value has dropped by approximately a quarter since 2014. Investors who stayed on for the whole ride have lost money. The mistake was not in overestimating Alibaba's prospects, it was overpaying for them. We think Alibaba today has overshot on the downside to a level where it is now significantly undervalued. We have been accumulating the stock since it entered value territory on our models.

End of December

During 2023 the strategy outperformed the MSCI Emerging Markets total return index by 11.8%. During Q4 the outperformance was 0.6%, as Emerging Markets recovered from their mid-year swoon. This marks the 8th consecutive year of outperformance for our All-Cap strategy.

During the fourth quarter, our stocks in Taiwan and Mexico provided the largest contribution to performance. Our underweight position and stock selection in China also helped relative to the index. The largest draw on a relative basis was the lack of exposure to India as that market remained strong despite stretched valuations. We also had a pullback in our Middle Eastern positions as a result of the conflict.

On a sector basis, technology stocks were the key driver thanks to continued rerating of the IT supply chain. Energy stocks were the biggest drag on relative performance as oil prices dropped sharply from September's highs.

During the quarter we added to Poland and Argentina following elections of market friendly governments. We also increased our exposure to China somewhat further while taking profits on some positions in Brazil and the UAE.

Although we have been adding to China and reducing our underweight position against the index, our absolute exposure is actually lower than in recent years. This is because the market's weight has shrunk over this period. Chinese stocks' weighting has fallen from approximately 40% to 25% of the MSCI Emerging Markets index during the last three years. At the same time India's weight has surged from 9% to 16%.

We continue to see headwinds for China but also believe that it offers significant scope for relative performance through stock selection. Our Chinese portfolio was down by less than half the decline of the market last year. Navigating the uncertainty remains tricky - an instructive episode was the issue of draft regulation on the gaming sector on the day before Christmas. The proposal would have curbed online game publishers' ability to monetize their products and caused a sharp selloff in internet stocks. A few days later, the head of the regulatory body was unceremoniously fired and the proposal is highly unlikely to be implemented. This illustrates how in the current political setup bureaucrats are trying to second guess the leadership's wishes and risk losing their job or worse if they get it wrong. No surprise then, that investors apply such stingy valuations to the market even where there is some growth. While a turnaround in the economy or sentiment remains elusive for now, the market has potential to surprise low expectations at some point.

For the financial year ended 31 December 2023

Pacific North of South EM All Cap Equity Fund (continued)

End of December (continued)

Looking ahead to 2024 we are facing a series of elections with around half the world's population participating. We normally do not expect much market impact from elections but as Poland and Argentina demonstrated last year, there are exceptions to this rule. The election calendar already started with Taiwan which did not bring major surprises — a DPP president but loss of control in the legislative assembly. Relations with China are unlikely to improve as a result but these will probably be more dependent on Chinese domestic imperatives anyhow. Votes in India, Mexico, Korea and Indonesia are also likely to provide policy continuity. Ultimately the most important election for Emerging Markets is likely to be that in the USA but even that may be trumped by the evolution of Fed policy.

For the financial year ended 31 December 2023

dVAM Diversified Liquid Alternatives PCP Fund

March

dVAM DLA returned -0.64% for the month of March (GBP A1 shares, net of fees) but remains in positive territory year-to-date with a return of +0.53%. The annualised return since inception net of fees is +2.0%.

There was a fresh and largely unanticipated source of turmoil in markets in March, resulting from a liquidity squeeze in Silicon Valley Bank and other non-top tier US banks, together with the spill over into the European banking sector and the collapse of Credit Suisse. In this context, one might not have expected to see positive equity returns for the month, indeed they were down sharply in the first half of the month, and yet the S&P finished the month up 1.6% while the NASDAQ made a 6.7% gain (returns in financials-heavy Europe were more muted.) The NASDAQ rally in particular was partly in response to a sharp decline in US bond yields, which fell in anticipation of a weaker economic outlook. This was in part caused by fears of prohibitive bank lending going forward and reflects expectations that the interest rate hiking cycle will come to an end more quickly than had been expected. Ironically this lessened some of the stresses in the banking sector that led to the above events in the first place!

In response to the above, the dollar weakened, Gold rallied, and lower quality credit spreads widened. The broader Commodities complex fell sharply initially on the weaker outlook but clawed back most of its losses, while Residential REITs in particular were weak.

The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets -0.1% contribution

DLA's Infrastructure investments were a mixed bag in March but delivered a positive overall return. The Power Grids, Waste & Recycling and Clean Energy themes appreciated while the external managers and Transport Theme detracted on the weaker economic outlook. Late in the month, we helped seed a new Clean Energy Fund, which offers style diversification versus dVAM DLA's other exposures, and this got off to a good start. Within Natural Resources, we implemented a new Silver theme; the precious metal offers appealing relative value vs Gold, which continues to perform well. Our external Commodities manager ended the month flat despite broader Commodities being in negative territory while the Energy Infrastructure and Transition themes detracted. Lastly, Commercial and Digital REITs held their value, while in the Residential sector, to which dVAM DLA remains underweight, the weaker outlook and concerns about bank lending dominated any benefits of lower borrowing costs, and the associated holdings performed poorly.

Alternative Credit -0.1% contribution

As markets digested the impact of banks tightening their lending standards, and despite there being quite some time before the oft-discussed 'refi wall' comes near, falling interest rates failed to mitigate the impact of wider spreads. The losses in dVAM DLA were muted however, helped by the attractive carry we secured last year. MSIM's higher quality Securitised Credit exposure, which includes an allocation to longer duration US Agency debt, generated a positive return, however.

Diversifiers -0.4% contribution

A selection of small gains failed to mitigate the impact of four investments among the Diversifier investments. The losses came from managers across Event Driven, Long/Short Equity and Discretionary Macro strategies together with Fulcrum's Multi-Asset Trend Fund, which offers appealing diversification qualities and, until recently, has been a strong source of return. Each was, to varying degrees, impacted by the events noted above. The larger of the gains came from managers within Relative Value as well as Invenomic's US Long/Short Equity Fund.

For the financial year ended 31 December 2023

dVAM Diversified Liquid Alternatives PCP Fund (continued)

Outlook

We have not made any material changes to dVAM DLA in response to this month's events. Although we have been adding risk back to the Fund, its equity beta remains below the longer-term average and this, we believe, remains a prudent approach given the increasing likelihood that developed markets enter a nominal terms recession in the coming months.

June

dVAM DLA returned +0.87% for the month of June (GBP A1 shares, net of fees) and has returned +0.70% year-to-date. The annualised return since inception net of fees is +1.88%.

The determination of central banks to fight stubbornly persistent inflation led most developed market bond yields to drift higher and the expected timing of the first rate cuts was pushed well into 2024. While the more aggressive rate rhetoric perhaps increases the possibility of a harder landing than had been anticipated, relatively robust US economic data was supportive for US equities, and spreads rallied. Both economic and market performance are stronger in the US, with the NASDAQ again leading the way. Elsewhere, the picture is more nuanced.

Commodities were modestly ahead although the value of Gold fell in response to the stronger economic data and associated higher interest rate expectations.

The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets +0.4% contribution

Gains were fairly evenly split across dVAM DLA's Real Asset investments with very few detractors. Despite the highly publicised problems of the UK Water industry, KBI GI's Water fund was one of the best performers (the UK is a relatively small part of the Fund's exposure). The Commodities and Real Estate managers also had a good month. Despite falling Gold prices, our BCOM exposure added to returns, while the performance of the Clean Energy investments was mixed, being highly sector specific. Elsewhere, the Digital and Residential REITs themes, Energy Transition and EV Materials all made positive contributions.

Alternative Credit +0.2% contribution

Emerging markets and their currencies prospered in June. Our EM Debt investments contributed half of the contributions for Alternative Credit, with each investment performing well. Gains were evenly split between the High Yield managers as well, as spreads tightened, while returns were more modest in Securitised and Convertibles. We believe that the attractive carry earned from much of our credit exposure will help to weather any short-term bouts of volatility.

Diversifiers +0.3% contribution

Our Asian Market Neutral and Emerging Market equity managers generated the bulk of returns this month. The other manager contributions oscillated within a few basis points of flat, but, overall, also added to returns.

Outlook

Last month's fast-paced events in Russia, the possible repercussions from which are yet to be observed, served as a reminder of the potential for geopolitical risk to influence markets. On this occasion, a crisis seems to have been avoided but we remain respectful of the persistence of elevated tensions. Talking of tensions, wages seem to be the last pillar keeping upward pressure on inflation and we are watching carefully for signs of this changing. Indeed, while certain parts of the labour market continue to be in short supply, such as Agriculture and Hospitality, others, like Technology and Finance, are increasingly letting go of employees.

For the financial year ended 31 December 2023

dVAM Diversified Liquid Alternatives PCP Fund (continued)

Outlook (continued)

On a more positive note, reports of continued US growth increase the possibility that a full-blown recession may be avoided, and the housing market has been particularly robust. Furthermore, vast amounts of money are due to be spent on Infrastructure projects following Government spending plans, all of which should be supportive for dVAM DLA's real asset investments.

September

dVAM DLA returned -0.89% for the month of September (GBP A1 shares, net of fees) and has returned -0.16% year-to-date. The annualised return since inception net of fees is +1.56%.

There is a growing consensus that interest rates will be 'higher for longer' despite falling inflation prints. Indeed, Jerome Powell's recent policy commentary said as much, for the USA. The market response has been reminiscent of that of 2022, with the price of gold, bonds, and equities all falling, while the US dollar rallied. What might lead to prolonged higher rates appears to be market dependent. Growth and, to a lesser degree, changing supply/demand dynamics, are leading factors in the US, while more stubborn inflationary pressures dominate in Europe. No matter the cause, bond yields leapt in September, with the 10-year US Treasury yield climbing by c.50bps to 4.6% and reaching its highest level since 2007, while the S&P 500 fell by 5%. It was a better month for oil, as continued supply constraints coupled with the resilient growth helped lift prices.

The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets -1.1% contribution

Gains from dVAM DLA's Natural Resources investments, led by the Energy Transition Theme, couldn't keep pace with losses elsewhere. Sharply higher bond yields impacted longer duration investments, such as Clean Energy, Utilities and Transport within Listed infrastructure, and also REITs. This was the case for Residential REITs as well as higher-valued Industrial and Data Centre stocks within our Digital and Commercial REITS themes.

Alternative Credit -0.1% contribution

Spreads were stable but the impact of higher bond yields again dominated returns despite most of dVAM DLA's Alternative Credit investments having only modest duration exposure. Indeed, interest rate risk is fully hedged by one of our Securitised Credit managers and this fund registered a positive return. However, the recently added Impact-Aligned Bond fund with its longer duration contributed most of the month's losses and, despite being conservatively positioned and outperforming peers, our Convertibles exposure also detracted. On a positive note, our Total Return Emerging Market Debt investment with PGIM generated good gains, thanks largely to its shorter duration and FX positioning.

Diversifiers +0.3% contribution

The Diversifier investments delivered the ballast they are held to generate, particularly in challenging environments. There were gains across the allocation, led by Long/Short Equity, Relative Value and Event-Driven managers.

For the financial year ended 31 December 2023

dVAM Diversified Liquid Alternatives PCP Fund (continued)

Outlook

The likelihood of a deep global recession seems relatively low, with greater conviction being in some kind of soft landing, or indeed, no-landing for now, as Fulcrum's recent webcast postulates:

https://www.fulcrumasset.com/global/en/videos-and-podcasts/hard-soft-or-no-landing-scenario/

The impact on corporate, personal and government balance sheets from higher interest rates, particularly if they are higher for longer, is only beginning to be felt in markets, we believe, and is likely to lead to more short-term volatility in asset prices. Our tilt towards higher quality credit is expected to provide a defence to returns in such an environment, as should the allocation to Diversifiers.

December

dVAM DLA returned +2.58% for the month of December (GBP A1 shares, net of fees) and has returned +4.10% in 2023. The annualised return since inception net of fees is +2.43%.

Closing out 2023, we are proud to have delivered positive returns in all-bar-one of dVAM DLA's calendar year returns, with less than half the annualised volatility of global equities. Furthermore, dVAM DLA's one negative year (2022) saw a return of -2.67% vs double digit declines in major equity and bond markets.

December provided quite the year-end for many markets, driven mainly by the continued decline in global inflation prints, increased conviction that interest rates have peaked, and that we are entering 'soft landing' territory. Indeed, the US Federal Reserve announced that it was 'pivoting' towards its first cut in interest rates in 2024. The month saw the US S&P500 Index ahead by 4.8%, credit spreads tighter, and the 10-year US Treasury yield fell from 4.3% to 3.9%. On the other hand, Commodities, as measured by BCOM, fell, driven down by a 7% decline in Oil prices in response to expectations for slowing demand and high supply from the USA (there was a partial recovery from mid-month lows in response to attacks on vessels in the Red Sea). The ongoing wars in Ukraine and the Middle East, coupled with declining inflation, helped gold to nudge up by 0.7%, hitting an all-time high in the month.

The breakdown of returns for the month is below (note the below contributions are gross of fees):

Listed Real Assets +1.4% contribution

REITs continued their recovery given the more supportive interest rate environment. Gains were led by Cohen and Steers, our latest addition to the external manager line up, as well as our Commercial and Residential themes. Natural Resources were flat overall, with losses from Commodities offset by gains in EV Materials, Water, and Gold. Lastly, the better macro picture led to strong performance from Duff and Phelps, our Clean Energy manager. This was supported by the broader external Infrastructure managers as well as the Transport Theme.

Alternative Credit +0.7% contribution

This was a solid month for Credit. Markets benefited from two key factors. Firstly, increased conviction that we will avoid a prolonged and/or deep recession, implying a modest level of peak defaults, and secondly, expectations that interest rates will begin to decline in 2024, meaning future borrowing costs may not be as high as feared when the much-discussed maturity wall approaches. dVAM DLA made gains across all investments, led by BlueBay's Impact-Aligned (Crossover) Bond Fund and Convertibles.

For the financial year ended 31 December 2023

dVAM Diversified Liquid Alternatives PCP Fund (continued)

Diversifiers +0.6% contribution

Diversifiers performed well and have been a useful contributor to returns in 2023. The US dollar declined against the Japanese yen given the expected trajectory of US interest rates, to the benefit of our risk-off hedge. Additionally, there were gains by most Long/Short Equity, Event-Driven and Relative Value strategies.

Outlook

2023 bore witness to some strong returns for global equities and higher yielding bonds. Inflation generally declined and the interest rate narrative has turned towards when the first cuts will come. This somewhat rosy picture includes some skewed numbers though. If you were to strip out the "magnificent 7" stocks from the MSCI ACWI index, you'd see that they were up by 70% vs 12% for the rest of the constituents. Other markets fared less well; Commodities fell by close to 8% and Clean Energy stocks were down around 20%. Thanks to a fourth quarter recovery, global REITs were up around 10%.

Looking ahead to 2024, ongoing geopolitical tensions will be accompanied by a prolific calendar of national elections. The strong equity markets of 2023 might lead one to conclude that there is widespread overvaluation, but we do not believe this to be the case. Looking beyond some of the mega cap stocks, we consider there to be good value in certain sectors, including some of the key listed Real Asset categories in dVAM DLA (e.g. Listed Infrastructure). Additionally, many of our Credit investments continue to offer compelling yields given our view that a meaningful uptick in defaults is unlikely.

For the financial year ended 31 December 2023

dVAM Global Equity Income PCP Fund

April

Month in review

Economic data released over the month of April was broadly positive, but markets grappled with a range of factors. These included new inflation data, the collapse of yet another US regional bank, and the start of earnings season which, to date, has shown a broad level of resilience across both US and European markets. American, Eurozone and UK Purchasing Managers Index (PMI) surveys all beat expectations, and China's Q1 GDP print was also stronger than expected, pointing to a seemingly robust global economy. Falling energy prices helped bring headline inflation down in the major developed economies with the contribution from energy turning negative in the US and the eurozone. The UK was the best performing geography over the month, helped by easing energy costs, marginally lower inflation as well as a general value tilt (value outperformed growth over the month by 0.4%). The Eurozone economy also showed notable strength, with economic growth coming in ahead of consensus. Although China also saw a strong GDP print, renewed concerns of geopolitical tension weighed heavy on both the domestic economy and the broader APAC region, and both geographies ended the month in negative territory.

The portfolio's largest sector overweight is to Consumer Staples (c.28% vs c.8% index), and this sector was the strongest performer over April (+4.2% in USD). Additionally, strong stock selection within Consumer Staples such as Mondelez (+10.0%), Nestle (+8.2%), and Danone (+6.3%) also aided outperformance. An underweight allocation to Information Technology and a zero allocation towards Materials were also a tailwind, as both sectors had negative returns over the month. Finally, good stock selection within Industrials was a source of outperformance. Even though the sector underperformed the benchmark, the portfolio's industrial names outperformed, with particularly good performance from Atlas Copco (+14.6%) and Schneider Electric (+4.3%).

Atlas Copco was the Fund's top performer, gaining +14.6% in USD over the month. The Swedish industrial company reported Q1 results and had a stellar start to 2023, with all business areas beating on all lines, and every segment seeing margin expansion. Revenues, operating profits and EPS were all up in the range of 28%-35% and the firm also noted record order volumes pointing to a positive demand outlook ahead.

Medtronic also performed strongly, up +12.8% in April in USD. The stock was buoyed by news that Medtronic had received FDA approval for its long-awaited MiniMed 780G insulin pump system. In addition, management noted that they will be engaging in workforce reductions in order to cut costs and focus on efficiency gains within the business, which should be accretive to the bottom line.

Texas Instruments was the Fund's worst performer over April, closing down 10.1%. It was also a difficult month for TSMC (-6.6%). The two semiconductor fab giants had a difficult month, which reflected a generally tough operating environment for the semiconductor sector as a whole. Across the industry, semiconductor sales have been sluggish, and TSMC noted in its quarterly earnings call that revenues for the next quarter are likely to be slower given a slump in demand for electronics. Despite the short-term headwind of a chip supply glut, we remain bullish on the long-term prospects of both companies, both of which are high-quality players with strong market positioning and remain well placed to capitalise on the structural growth trends that are driving the industry.

June

Month in review

It was a generally flat month for global equity markets, with the MSCI World Index moving sideways for much of May, reflecting the mixed global economic data. News from the US was markedly strong, with better-than-expected auto sales, housing starts and employment numbers. In addition, the services sector showed continued strength, with the US services Purchasing Managers' Index (PMI) rising to a 13-month high of 55.1 and both the Eurozone & UK figures remaining above the 55 level (anything above 50 indicating expansion). This momentum was supported by robust labour markets, with unemployment remaining at near historic lows in the Eurozone (6.5%), UK (3.9%) and US (3.4%). In contrast, manufacturing news was gloomier, with Eurozone manufacturing PMI falling to 44.6 over the month, its lowest level in three years, and US & UK manufacturing readings also below 50, signalling a contraction in activity.

For the financial year ended 31 December 2023

dVAM Global Equity Income PCP Fund (continued)

Despite the relatively flat equity markets in May, there were signs of weakness below the surface. Of the 25 MSCI industry indices, 19 underperformed the index, which was coupled with poor performance from other market areas including value (-4.5% in USD), EM (-1.7%) EU (-5.6%) and UK (-6.8%). Conversely, the positive returns were highly concentrated towards growthier parts of the market, specifically the IT sector (notably mega-cap tech, semiconductors and businesses with exposure to artificial intelligence (AI)). Growth outperformed value and cyclicals outperformed defensives, but it was also clear that market leadership narrowed even further, with the best performing sectors of 2023 continuing to move higher, while most other sectors reversed sharply.

The portfolio's overweight allocation to Consumer Staples (28.3% vs 7.9% benchmark) was a drag in May, as the sector was the 3rd worst performer over the month, closing down -5.2% in GBP. In addition, the underweight allocation towards IT (14.8% vs 20.6%) was a relative headwind due to the strong sector performance (+11.3%) over May. However, the portfolio's zero allocation towards Real Estate, Materials, Utilities, and Energy all acted as a relative tailwind given negative performance for these four sectors. Finally, strong stock selection in Industrials and IT was a cause for relative outperformance vs the sector with strong returns from Broadcom (+30.7%), TSMC (+12.6%) and Eaton (+7.2%).

Broadcom was the portfolio's top performer, gaining +29.0% in USD over the month. The developer of semiconductor software products is strategically well placed to benefit from the vastly heightened demand that is being driven by the current generative AI hype.

Similarly, TSMC performed strongly in May, climbing +11.1% in USD. The world's largest semiconductor foundry continues to maintain its dominant position in cutting edge manufacturing, and produces c.60% of the world's chips, with a core competency around the smallest and most advanced 4nm design.

VF Corp was the Fund's worst performer over May, closing down 26.8% in USD. It was another difficult month for the American apparel and footwear conglomerate, which reported a mixed set of earnings results. Management gave a more cautious guidance outlook than prior quarters, but also reiterated their plan to reduce leverage to a target of 2.5x (currently at 4.8x) over the next 24 months, which we find encouraging.

Unilever also performed poorly over May (-9.6% in USD). The company has flagged persistent high input cost inflation which is continuing to impact the bottom line. In addition came news that Unilever's CFO of eight years is stepping down. Although markets did not react well, the firm is currently undergoing an organisational revamp which we view as largely positive.

August

Month in review

Equities had their first negative month since February as volatility returned to markets. At the start of August, the credit rating agency Fitch downgraded the US government's credit rating from AAA to AA+, citing unsustainable debt and deficit trajectories and increased political dysfunction. The market seemed to shrug this off relatively quickly, but a range of central bank meetings and the US Federal Reserve's annual policy speech at Jackson Hole brought further volatility over the month. On top of this, economic data released in August was mixed, and investors began to question the strength of the 'soft landing' narrative. Whilst inflation is continuing to moderate in many economies and growth remains positive (albeit sluggish), there are some leading indicators suggesting that the picture is starting to change.

Among the main regions, the US was the best performer, supported by robust economic growth and the fact that US inflation has fallen faster than in most other developed market economies, despite a continued tight labour market. Conversely, emerging markets equities were weak, particularly the broader Asia Pacific region, which fell on the prospect of increasingly sluggish Chinese growth. China's domestic economy is experiencing a range of challenges, given heavy indebtedness of the property sector, low business confidence, declining international investment and deflationary producing price inflation (which was negative for the 10th month running). Given this backdrop, global stocks sold off and this decline was relatively broad from a sector perspective, reflecting the changing sentiment at the market level (which had been almost universally positive through the summer, and coincided with a strong market rally).

For the financial year ended 31 December 2023

dVAM Global Equity Income PCP Fund (continued)

The portfolio's zero allocation to the Materials and Utilities sectors acted as a tailwind given that these were the two worst performing sectors over the month, closing down -4.5% (in USD) and -5.4% respectively. This was marginally offset by a zero allocation towards Energy, which was the only sector that saw positive performance in August, closing up 1.9%. The overweight allocation to Healthcare was a source of relative outperformance as the sector was the second-best performer over the month. The Fund also benefited from individual stocks that performed well in a range of other sectors including IT, Financials and Industrials.

There has been a notable change in market leadership since mid-July. We have seen value outperform growth by c.4% over this period, in a generally rising market. Whilst much of the rally earlier in the year had been led by a narrow selection of technology stocks (more specifically Al-exposed names), there has been a change in sector and stylistic leadership, with more defensive and more value-oriented sectors returning to favour. Even as the MSCI World declined -2.3% in USD over August, there were areas of relative strength. Energy rallied due to OPEC+ supply constraints and the threat of strikes at Australian LNG facilities. Healthcare also outperformed on a relative basis and the Fund's overweight allocation towards Healthcare, as well as broad sector diversification, has once again helped the Fund to navigate the changing market leadership.

November

November in review

Global equities were strong in November, with gains for all market styles and regions as encouraging economic data (moderating inflation and robust growth) raised hopes of a 'soft landing'. In USD terms, the MSCI World Index rose 9.4%, bringing gains for the year to 18.6% — a very positive result given the significant volatility in the markets amid one of the fastest rate hiking cycles in recent history. Europe ex-UK performed particularly well thanks to moderating energy prices, which offered respite for those EU economies reliant on natural gas. Japanese markets also rallied 8.3% in USD and remain top-performing this year (up c.29% year-to-date). Growth stocks performed particularly well (+11.2%), but value also rose (+7.5%) amid broad market strength.

The Fund's underweight allocation towards IT and Consumer Discretionary and zero weighting towards Real Estate were drags from an allocation perspective as these were the three best-performing sectors. The large overweight to Consumer Staples was another headwind, as the sector underperformed. However, individual stock selections within Industrials and Financials aided performance, including BlackRock (+22.7%), Schneider Electric (+20.1%), Atlas Copco (+19.7%) and Deutsche Boerse (+15.9%).

The strength and uniformity of November's rally would suggest that it was driven by top-down factors, namely that investors are looking forward to 2024 and anticipating rate cuts sooner than previously expected. During its latest meeting, held at the beginning of November, the Federal Reserve seemingly hinted at a 'dovish pause'. Not only did committee members keep policy rates stable for the time being, but it appears that their tone has become notably less hawkish, which was the starting gun for the big rally that ensued over the month. Although the Q3 earnings season was encouraging, it was the changing macro view and associated multiple rerating (as opposed to fundamental earnings revisions) that drove the market higher. The MSCI World price/earnings ratio of 18.5 times 1-year forward earnings is now well above the long-term pre-COVID average of 15.7, and perhaps suggests the need for wider caution given the nature of the latest rally.

We sold VF Corp, which has been struggling with a slowdown in demand for its core brands (which include Vans, Dickies, and Timberland). The firm remains highly levered, and to pay down debt, management decided to cut the dividend a further 70% (following a previous cut of 40% earlier in the year). On top of this, we felt that VF Corp no longer fits our process of seeking high-quality companies with strong balance sheets and stable, growing dividends.

We replaced VF Corp with Assa Abloy, a Swedish manufacturer and distributor of locks and security systems. It is the leader in the space and has defensive, sticky revenues thanks to high exposure to the aftermarket segment. Assa Abloy is also exposed to attractive underlying trends such as smart buildings and urbanisation, and its quality products, well-known brand and innovation should protect its leading market position. The dividend looks secure and is growing sustainably. In sum, it is a high-quality business, with clear competitive advantages, trading at a reasonable valuation.

For the financial year ended 31 December 2023

dVAM Multi Asset Active Range

March

Markets were roiled over the course of the month, as US Regulators intervened to shut down Silicon Valley Bank (SVB) and Signature Bank (SBNY) due to concerns over their liquidity. SVBs financial health and solvency were in question as consumers withdrew their deposits, causing the bank to suffer losses on the sale of securities to meet the withdrawals. Despite an unsuccessful attempt to raise equity, SVBs shares plummeted, and the bank was ultimately placed in receivership by the Federal Deposit Insurance Corporation (FDIC), making it the second largest bank failure in US history. SVB was unique in that it had a concentrated deposit base of technology companies, and it did not hedge its interest rate risk within its asset book, a critical error in a year like 2022 where the value of government bonds fell sharply. The impact on markets was compounded by Credit Suisse having to be bought by UBS, in a deal brokered by the Swiss authorities, again due to confidence concerns and deposit withdrawals.

Both of these incidences point to how raising interest rates tightens financial conditions and can cause things in the financial system to 'break'. Our view is that in the medium-term banks will become more cautious with their loan books, which could lower potential growth in developed market economies. Despite this, equity markets were reasonably resilient, with global equities in Sterling slightly positive over the month. The US was the strongest performing region, with the UK lagging due to its sector composition.

We have moved to become defensive in equity positioning, as our view is that growth concerns will likely continue to materialise as central banks continue their fight against inflation.

Fixed income markets were positive, as markets repriced a lower likelihood of further Federal Reserve rate hikes due to the banking liquidity problems. Within fixed income, our holdings in inflation linked bonds in the UK and the US performed strongly.

Alternatives were slightly weaker over the month; we continue to believe that our holdings in both UK Property and listed Energy assets offer us incredibly attractive discounts to NAV.

Within diversifying assets, holdings in curve steepener trades, which go long and short parts of the yield curve, as well holdings in fixed income relative value strategies performed strongly, as the shape of the yield curve shifted due to growth concerns.

June

The global economy showed a mixed performance in June, particularly regarding progress on inflation. In the US, headline inflation decreased to 4%, which came in below expectations; however, core inflation remained stubbornly high. In the UK, core inflation continued to accelerate, prompting the Bank of England to increase interest rates by 0.5% to 5%, and for the market to anticipate nearly five more 25bps interest rate hikes from here.

Central bankers gathered in Sintra in Portugal for their annual ECB Forum. At a panel interview with the big four (Fed, ECB, Bank of England and Bank of Japan), they reaffirmed their view that, with the exception of the Bank of Japan, they have carried out a large portion of their hikes. Looking ahead, some additional hikes are likely but decisions will be data dependent, taking into account the evolving inflation picture.

Equity markets were positive over the course of the month, with the US once again leading global markets with further large gains in stocks within the technology industry. Elsewhere, returns were more muted, with the UK lagging over the month.

Within fixed income, market returns were mixed with shorter dated bonds coming under pressure due to stickier inflation numbers and hawkish rhetoric from central banks.

For the financial year ended 31 December 2023

dVAM Multi Asset Active Range (continued)

Within alternatives, UK commercial property was weaker over the course of the month, as higher gilt yields weighed on the asset class. Within diversifying assets, returns were mixed, with weakness in the Japanese Yen. The Yen is now over 30% undervalued versus Sterling based on purchasing power parity, a level rarely seen in the last 30 years. Finally, our holding in the AQR Style Premia fund performed strongly over the course of the month, building on the strong performance over the last two years.

September

Markets were mixed over the course of September, with pressure from the bond market feeding through into risk assets. The Federal Reserve paused its rate hiking cycle in September, as US inflation data came in broadly in-line with market expectations, with Core CPI running at 4.3% year-on-year. Inflation has moderated so far in this hiking cycle, without weaking the labour market or consumer strength so far. However long bond yields rose over the course of the month, as markets digested more issuance from the US treasury, as well as rhetoric from central banks that interest rates will need to remain higher for longer.

The positive correlation between equity and bond markets is a worry for investors, as it is a reminder of the change in market regime seen in 2022, however in the most recent period, the scale of these drawdowns has been lower and comes at a time when growth appears to be slowing and inflation normalising.

Equity markets were mixed in September, with global indices modestly down. Both the UK and Emerging Markets were positive performers over the month, with our holding in the Pacific North of South funds outperforming broader emerging market indices.

Fixed income fell over the course of the month, as yields moved higher across global markets, although UK bonds were more resilient. We continue to be underweight duration and defensively positioned in fixed income and have further reduced our exposure to long duration bonds over the month.

Diversifying assets added value over the month, with strategies across trend and risk premia generating strong absolute returns. A holding in the US Curve Steepener generated positive returns; this strategy goes long shorter dated fixed income and short the long end to take advantage of the normalisation of the inverted shape of the yield curve.

Fixed income was a slight negative over the course of the month, with Fitch downgrading US creditworthiness from AAA to AA+, citing concerns about US debt policy and political functioning. This, combined with the announcement of more debt issuance in the US led to bond yields moving higher, particularly at the longer maturity end of the US debt curve.

Finally, in a month where both equities and bonds returns were negative, diversifying assets generated positive returns over August.

December

The final month of 2023 delivered a rally in almost all major asset classes, as the market began to price in a greater likelihood that central banks will begin an interest rate cutting cycle in mid-2024. This narrative shift is important, as previously the market was expecting rates to remain 'higher-for-longer' to stifle any possibility of persistent inflation.

Inflation figures in the US came in line with expectations, at 3.1% YoY, this marks a significant normalisation from much of 2023. The labour market continues to be robust, and whilst job openings were lower than expected by economists, both the unemployment rate and average hourly earnings continued to be strong. December also saw the completion of the COP 28 conference in Dubai, which whilst promising explicitly to shift away from fossil fuels was also controversial in both its location and commitments to several key tenets of de-carbonisation efforts.

For the financial year ended 31 December 2023

dVAM Multi Asset Active Range (continued)

Equities were positive over the course of the month, with little in the way of regional dispersion over the month, but after a period of relative underperformance of sustainable strategies versus convention equities, December saw a large reversal of this trend. Holdings in several sustainable UK Equity funds outperformed their benchmarks over the month, including the Janus Henderson UK Responsible Income fund.

Bonds continued to rally across the curve, as they had through November, as market participants moved to price in rate cuts. Positions in longer dated US Inflation linked bonds performed strongly over the month.

Alternatives were the standout performers in December with holdings in UK commercial property and UK Solar infrastructure rallying sharply. Many of these securities were up nearly 10% over the month and continue to trade at a significant discount to their underlying net asset value. Finally, diversifying assets were mixed during the month, continuing to exhibit low correlations to bonds and equities.

For the financial year ended 31 December 2023

dVAM Global Equity Focus Strategy PCP Fund

March 2023

The first quarter of 2023 was a turbulent but ultimately positive period for global equity markets, with the MSCI All-Country World index (ACWI) up 7.2% in local-currency terms.

Equity markets started the year strongly due to growing optimism that the global economy could be heading for a soft landing and that central banks might win the battle against inflation. Optimism faded in February as strong economic data, particularly in the US, raised speculation that central banks may have to keep interest rates higher for longer. Equities came under further pressure in March after the collapse of US mid-sized lenders Silicon Valley Bank (SVB) and Signature Bank, along with the near collapse of a third lender – First Republic – led to fears of contagion in the wider banking sector. Concerns were exacerbated by the viability of long troubled Swiss bank Credit Suisse, and Swiss regulators had to broker a takeover of the bank by rival UBS. Equities sold off in response, but they later rebounded as concerted action by financial authorities allayed contagion worries. Sentiment was also boosted as the crisis fuelled expectations that central banks may ease the pace of monetary tightening as the banking turmoil is expected to a lead to a tightening in credit conditions, which would in turn curb growth and inflation.

In the US, inflation appeared to have peaked while economic data was resilient. The Federal Reserve (Fed) raised interest rates by 25 basis points (bps) in February, a slowdown from recent moves, and dovish commentary prompted some hopes that the current hiking cycle might soon be drawing to a close. However, January's strong labour market and inflation data pushed up interest-rate expectations again in February, which weighed on equities, as did the aforementioned sell-off in March. Given their sizeable exposure to growth stocks, US equities particularly benefited from the rebound at the end of March as expectations of further hikes faded. Indeed, while the Fed raised rates again by 25 bps in March, policymakers signalled just one further increase in 2023 and withdrew familiar wording that "ongoing rate increases" should be expected.

Europe ex UK equities were boosted by the improved economic outlook for the region amid hopes that the reopening of the Chinese economy could boost trade, while a milder-than-expected winter led to lower gas prices and eased inflationary pressures. However, core inflation remained "sticky", which resulted in the European Central Bank being more hawkish than its peers. The bank raised interest rates by 50 bps in February and, despite the banking sector's woes, did so again in March. In the UK, economic data was better than expected. The Bank of England raised rates by 50 bps in February and then by 25 bps in March. The export-heavy UK market also benefited from the dollar's strength against the pound in February, which was based on anticipation that the Fed might keep interest rates higher for longer. However, the dollar's weakness in March proved a headwind for UK equities, as did the stock market's significant exposure to financials and value stocks.

In Japan, inflation hit record highs, though the Bank of Japan left interest rates unchanged and said that it would continue to pursue ultra-loose monetary policy. Elsewhere, emerging markets (EMs) were boosted by hopes that China's economy would rebound sharply after Beijing lifted most of its Covid restrictions along with signs that the government could soften its crackdown on the technology sector. However, deteriorating Sino–US relations dampened sentiment somewhat, as did risk aversion amid the banking turmoil.

In local-currency terms, Europe ex UK outperformed the ACWI, while the US and Japan performed roughly in line with the index. The UK and EMs trailed the global index but still recorded modestly positive returns.

At the sector level, technology and communications were the top performers, buoyed by the prospect of falling inflation and lower interest rates. Consumer discretionary also fared well as economic activity held up better than expected. At the other end, the weakest performer was energy owing to weaker oil and gas rises. Healthcare and financials posted modest declines. Healthcare lagged amid the rally in cyclicals, particularly at the start of the year, while financials were adversely impacted by difficulties in the banking sector.

Performance

Gross of fees, the fund was ahead of its benchmark over the quarter. Security selection drove the relative outperformance, mainly due to favourable picks in healthcare, technology and consumer discretionary. Sector allocation was a drag on relative performance, albeit marginally, with the unfavourable overweight in healthcare offsetting the gains from the overweight in technology.

For the financial year ended 31 December 2023

dVAM Global Equity Focus Strategy PCP Fund (continued)

Performance (continued)

At the stock level, notable contributors included Advanced Micro Devices (AMD) and Microsoft, which benefited from a strong quarter for technology stocks.

AMD also benefited from improving sentiment towards chipmakers amid hopes of a rebound in demand following the weakness in 2022. There was also optimism around AMD's specialisation in chips for AI, a growing area of interest. AMD announced a strong sales forecast, which beat expectations, and was able to offset a drop in demand for PC chips by making gains in the more lucrative server market. We subsequently sold the stock at a profit.

Microsoft shares were also boosted by news of the release of ChatGPT-4, the latest version of the AI chatbot developed by OpenAI, with whom Microsoft has a multi-billion-dollar partnership. In addition, markets responded positively to the unveiling of Copilot for Microsoft 365, an AI-powered productivity tool. We believe that the firm's leadership in AI, along with the strong growth of its Office 365 and Azure offerings should continue to drive margin expansion. Microsoft has a broad portfolio of innovative and strategic products, large distribution channels and a vast installed customer base. In our view, the market is underestimating the sustainability of the company's growth opportunities and the potential they offer to expand into other areas, such as software security.

Detractors included ConocoPhillips, which underperformed as oil and gas prices fell following a milder-than-expected winter and amid rising concerns about how the banking crisis would affect the global economy. The company also missed estimates on profits for Q4 2022.

The zero weight in Apple also detracted in a strong period for high-growth tech stocks.

Activity

New holdings during the quarter included Waste Connections, Legrand and Marvell.

Waste Connections is a North American integrated waste services company that provides waste collection, transfer, disposal and recycling services. It boasts a leading market position in the US, where waste management is increasingly an oligopoly, and has the best long-term track record among its peers. The firm also has a sound operating strategy targeting communities in suburbs and rural communities instead of cities, which gives it increased negotiating power to complement its scale and cost advantages.

Legrand is a global specialist in electrical and digital building infrastructure. As the world's largest producer of switches and sockets, the company is a leader in low-voltage electrical equipment and benefits from a very high market share, especially in low-growth markets like Italy and France. We favour Legrand for its international presence, which we believe will build up over time, particularly in the US and emerging markets. A key competitive advantage lies in switching costs, which contribute to the company's wide economic moat.

We started a position in Marvell Technologies by selling AMD, following the latter's strong year-to-date performance. Marvell develops and produces data infrastructure and semiconductor solutions. The firm has a strong and growing market position, and it has a competitive advantage thanks to its expertise in digital semiconductors. The company also stands to benefit from the trend towards cloud computing.

We exited ConocoPhillips following the stock's solid run in 2022 as we now believe there are better opportunities elsewhere.

Outlook

While, in 2022, the market's concern was that long duration growth looked less attractive given higher interest rates, in 2023, the focus is on earnings delivery. Higher interest rates will remain important and may place some pressure for higher growth stocks, but we would stress the importance of focusing on the quality of the growth opportunity. With the "free money" era coming to an end, markets will want to see evidence of near-term profitability and pricing power.

For the financial year ended 31 December 2023

dVAM Global Equity Focus Strategy PCP Fund (continued)

Outlook (continued)

Our holdings, on the whole, tend to be less economically geared, so they should be better placed in an environment of slower growth. They are typically cash-generative and, in many cases, have business models focused on recurring revenues. These companies also tend to have strong balance sheets, so they should be less impacted by the need to refinance debt at higher rates. Many are also supported by powerful secular themes.

Inflation will give more companies the ability to grow earnings, so we believe that diversification will remain important, particularly given issues such as decarbonisation, deglobalisation and energy efficiency. We believe that we can find quality growing companies across a range of sectors and geographies.

In summary, we believe a focus on quality companies with pricing power and that are less geared to the broader economy is a prudent way to take equity market exposure. Over the longer term, an environment of muted economic activity should be supportive of this approach given our emphasis on secular winners.

June 2023

Global equity markets posted positive returns in the second quarter (Q2). Stocks were buoyed by resilient economic data despite central banks around the world continuing their fight against inflation. The MSCI All-Country World index (ACWI) returned 6.7% in local-currency terms.

Equity markets had a strong start to the quarter thanks to receding concerns about the health of the banking sector following the turmoil in March. Sentiment was also boosted by brighter economic data, further signs of cooling inflation and a better-than-feared corporate earnings season. May was a period of consolidation for equities following a strong year-to-date rally and uncertainty around the US debt ceiling. Equities continued to rally in June despite hawkish moves from central banks. The quarter ended with growing optimism that the global economy could be heading for a soft landing.

In the US, the Federal Reserve (Fed) increased rates by 25 basis points (bps) in May but paused its hiking programme at its June meeting. However, the accompanying policy statement revealed that further rate hikes would be necessary in 2023 to dampen inflationary pressures, with Fed officials forecasting two additional quarter-point increases before the end of the year. Fed Chair Jerome Powell reiterated this point in his semi-annual testimony to Congress in June. Nevertheless, equities remained resilient over the period, largely supported by a narrow subset of stocks in the technology sector, which benefited from optimism about demand for AI. Positive equity performance in June broadened to include some of the more cyclical areas of the market. On the economic front, data releases showed continued strength, though unemployment claims rose to an 18-month high, suggesting the labour market may finally be softening in response to the Fed's aggressive rate-hiking programme. Consumer price inflation continued to ease, though core inflation remained stubborn. Meanwhile, consumer confidence rose to a four-month high on easing inflation and the resolution of the debt ceiling crisis.

The European Central Bank (ECB) raised interest rates by 25 bps in both May and June, while continued evidence of a tight labour market and resilient core inflation suggested that more rate hikes would be needed to tame inflation. ECB President Christine Lagarde emphasised this point towards the end of June, indicating that there would be another rate rise in July. This was despite negative economic data which pointed to continued weakness in the manufacturing sector. The inflationary problem was much more pronounced in the UK, the only major economy where core inflation is still rising. This prompted the Bank of England to announce a surprise 50-bp rate hike in June, arguing that an aggressive move was needed to avert a wage-price spiral emerging. On top of the 25-bp rate hike which was announced in May, the policy rate in the UK stood at 5% at quarter end. UK equities were weak over the quarter as inflation continued to surprise to the upside. The UK market was also pressured by its sizeable weighting in energy stocks and interest-rate sensitive sectors such as housebuilders and utilities, as well as its lack of exposure to the technology sector.

Japanese equities had a strong quarter, boosted by strong economic data, robust corporate profits and evidence of investor-friendly corporate governance reforms. News that Berkshire Hathaway Chairman Warren Buffett had increased his holdings in Japan's five largest trading houses also increased investor appetite for the region's shares. In monetary developments, Bank of Japan Governor Kazuo Ueda indicated that interest rates were unlikely to move higher this year, causing the yen to weaken further and providing a

For the financial year ended 31 December 2023

dVAM Global Equity Focus Strategy PCP Fund (continued)

June 2023 (continued)

tailwind for equities. Meanwhile, economic data continued to show signs of rising prices, fuelling hopes that Japan might have won its longstanding battle against deflation. Elsewhere, emerging markets (EMs) underperformed, mainly due to continued evidence of a slowdown in China's economy alongside further deterioration in Sino-American relations. Furthermore, Beijing's attempt to stimulate the Chinese economy by cutting its benchmark rate was largely viewed as insufficient to address the recent slowdown.

In local-currency terms, Japan was the notable outperformer, while the US also performed strongly. Europe ex UK and EMs recorded positive returns but trailed the global index. The UK was the only region to record a negative return.

At the sector level, technology was the top performer due to continued enthusiasm around AI and several strong earnings announcements. Communication services and consumer discretionary also fared well thanks to a strong quarter for technology and growth-related stocks. The main laggard was the materials sector amid concerns that China's economic recovery was running out of steam.

Performance

Gross of fees, the fund was ahead of its benchmark over the quarter. The primary driver of outperformance was security selection, especially in materials and financials. Sector allocation was also beneficial, aided by the overweight in technology and underweight in energy, although the overweights in consumer staples and healthcare detracted.

At the stock level, the top relative performers for the quarter largely comprised tech stocks, including Marvell Technology and Microsoft. These were boosted by positive sentiment surrounding the sector, not least optimism around companies that stand to benefit from AI. Positive earnings reports and favourable outlook statements from both firms also helped to enhance performance during the period.

Marvell is a developer and producer of data infrastructure and semiconductor solutions, with attractive exposure to data centre growth worldwide. The firm has a strong and growing position in a niche part of the semiconductor market, while its expertise in digital semiconductors acts as a high barrier to entry and positions the company to benefit from the trend towards cloud computing. Microsoft is one of the world's leading technology companies. The firm has a broad portfolio of innovative and strategic products, large distribution channels and a vast installed customer base. We believe that Microsoft is in the middle of a new growth cycle led by its Office 365 and Azure offerings. These two growth drivers, combined with the firm's leadership in AI, should continue to power margin expansion and earnings growth. In our view, the market is underestimating the sustainability of these growth opportunities and the potential they offer to expand into other areas, such as software security.

On the other side, Thermo Fisher underperformed after its life sciences unit missed expectations for Q1, and amid conservative forecasts for organic growth in the sector more generally, though its earnings were broadly in line with estimates. However, we retain our conviction in the stock. The firm produces a range of analytical and data tools that help accelerate life sciences research, improve diagnostics and increase laboratory productivity, among other solutions. Thermo Fisher's competitive advantages stem from its dominant scale in the industry, leading brand and strong network effect. Key growth catalysts for the company include its growing presence in emerging markets and the increasing demand in biopharmaceuticals and genomics.

Activity

We initiated a position in Apple – the world's leading designer, manufacturer and marketer of personal computers and mobile communication and media devices. Previously, we did not hold Apple due to concerns around the competitive environment and our exposure to other big tech companies. However, the company has continued to innovate, releasing a series of leading-edge products, including its augmented reality headset Vision Pro, which has placed Apple ahead of its peers. The firm boasts a considerable economic moat, robust balance sheet, strong brand equity and a loyal customer base. Additionally, Apple has invested heavily in the development of its own proprietary chips, which further strengthens the firm's competitive advantage. Long-term growth drivers include the firm's expansion into India and other emerging markets.

For the financial year ended 31 December 2023

dVAM Global Equity Focus Strategy PCP Fund (continued)

Activity (continued)

We also re-initiated a position in Amazon. The firm benefits from unmatched scale and advantage in e-commerce, along with a loyal customer base. In our view, its strong mobile positioning and infrastructure advantages should ensure that it benefits from the continued growth in online retail. Amazon has a dominant cloud-computing presence through its Web Services unit and stands to gain from growth in digital advertising, which should further strengthen the firm's market position. Furthermore, Amazon is likely to be a winner from ongoing developments in the Al space. Competition in the e-commerce industry seems to be weakening, which reinforces our conviction in Amazon's economic moat.

Sales included Danaher and T-Mobile; in both cases, we believe that there are better opportunities elsewhere.

Outlook

Compared to 2022, macro sentiment has had less impact on markets this year. However, higher interest rates, inflation and slowing growth will likely continue to present issues for companies across the globe. Markets will want to see solid earnings delivery and evidence of near-term profitability.

Our holdings tend to be less economically geared than average and so should be better placed in an environment of slower growth. They are typically cash-generative and, in many cases, have business models focused on recurring revenues. These companies also tend to have strong balance sheets, so they should be less impacted by the need to refinance debt at higher rates. Pricing power typically means these firms are more resilient to inflation, while many are also supported by powerful secular themes. We still believe growth stocks will outperform, but we stress the importance of focusing on the quality of the growth opportunity.

While the market has been quite narrowly led in the first half of 2023, we believe that diversification will remain important, as investments in companies that tackle issues such as decarbonisation, deglobalisation and energy efficiency creates a broad opportunity set. We remain committed to finding quality growing companies across a range of sectors and geographies.

In summary, we believe that our focus on quality companies with pricing power and lower gearing than the broader economy is a prudent way to take equity market exposure. Over the longer term, an environment of muted economic activity should be supportive of this approach given our emphasis on secular winners.

For the financial year ended 31 December 2023

Pacific North of South EM Equity Income Opportunities Fund

End of March

The etymology of 'bankruptcy' is from the Renaissance era meaning 'broken bank', which was quite appropriate last month for two such Anglo-Saxon institutions. So far contagion in the emerging world has been very limited, but the feedback loops will last for a while.

The most relevant will be tighter credit in the US private sector, the bulk of which comes from regional banks, and has already brought forward expectations for peak US rates putting further pressure on the dollar. Ironically this can be relatively positive for emerging market assets.

Inevitably there'll be further regulatory measures applied to banks globally, but the good news is 'the system' has proved to be quite robust and able to absorb the failing institutions relatively well. This has been assisted by the triggering of contingent capital otherwise known as AT1s or CoCos, it's the second significant conversion (the other being Banco Popular) and is proving to be a post-GFC regulatory measure that's actually working.

Since the beginning of the year we've been reducing bank exposure, not so much from these events but for more fundamental reasons. Last year's global rising tide of interest rates pushed up net interest margins across the board, but as EM central banks led the tightening cycle so they've been reaching peak rates earlier. Brazilian CPI peaked in June last year at 12% and has now fallen to 4.5% meaning there's 800bp of real interest rates. We're expecting rates to come down soon and so are locking-in companies with higher yields, notably in the utility sector.

Whilst financials are still 21% of the portfolio, banks are now 12% down from 17%. The balance is in infrastructure, payments companies and insurance which we've increased. This is mainly in South Korea where a change in accounting methodology (IFRS4 to IFRS17) will significantly boost earnings.

In China the post-covid recovery is proving to be more muted than many had expected. Whilst there's been increased provision of liquidity there hasn't been any large-scale stimulus. Rather the focus has increasingly been towards efficiency and profitability and reflected in a gathering momentum for state owned enterprise (SOE) reform.

Although this has been a developing theme for a while, it was highlighted in the Party Congress late last year and important policy makers are now announcing tangible policies. This year will be the first time SOEs will have return on equity (ROE) and operating cash flow as part of their KPIs and not just 'volume' orientated metrics.

There's already been clear outperformance by those Chinese SOEs that initiate relatively simple value-enhancing measures such as management share incentives and we can expect this to continue. As we continue to profile the idiosyncratic nature our holdings, two good examples of this are Sinopec (which is one of our largest holdings) and its subsidiary Sinopec Engineering.

Sinopec is essentially the BP of China. It's the largest refiner in the world but is also balanced with upstream oil and gas production, petrochemicals, retail distribution and is leading China's endeavours in the production and use of hydrogen. Being integrated it's less sensitive to the price of oil but is benefiting from the post-Covid increase in mobility with refined product demand now above 2019 levels. It's one of the few Chinese SOEs that genuinely prides itself on sharing profits with shareholders and is one of only a handful that has both a share buy-back program and a high dividend pay-out policy, which last year yielded 9.5%.

Its subsidiary Sinopec Engineering is a specialist EPC contractor in chemical and refining applications and is benefiting from the resumption of stalled projects as well a growing involvement in the Middle East and Central Asia.

It's probably the most undervalued company in our portfolio, trading on 6x earnings and 0.5x book but it also has a negative enterprise value. This is achieved by having virtually no debt and cash on the balance sheet that's significantly larger than its market cap. Even adjusting for cash that's held as pre-payments for work contracted, you're effectively getting the operating business for free.

For the financial year ended 31 December 2023

Pacific North of South EM Equity Income Opportunities Fund (continued)

End of March (continued)

The company has been increasing its dividend pay-out ratio and last year paid a 9.5% dividend which would theoretically be sustainable for well over a decade if the company merely breaks even. However, with such excess cash the ROE is only 5%, as a new KPI one of the easiest ways to improve this metric is to increase the dividend still further. We've seen this scenario before in other countries and it can lead to a very powerful revaluation.

As the fund launched less than a year ago we have certain regulatory restrictions on what we can include in this factsheet, so if you'd like to know more about the portfolio or any of the other topics covered in this commentary, please get in touch with our representatives.

End of June

In June the fund returned +1.25%.

We launched this fund with a relatively unorthodox objective for an emerging market equity strategy. Rather than looking to beat the typical EM benchmarks we looked to beat inflation, to generate a real income for investors on a sustainable basis.

Of course this is a remit more typical of fixed income or conservative equity strategies in developed economies, but with persistent negative real interest rates and high inflation this basic target has become much harder to achieve with traditional allocations.

Our belief was, and still is, that an EM equity strategy with the right approach would prove a useful tool in the toolbox for income-seeking investors. Last month we passed the significant milestone of our first anniversary, an appropriate point to see how we're doing.

As a distributing income fund, let's start with dividends. Since launch in early June 2022 our companies have returned to our investors a total of £1.0726. Our first distribution covered the initial 3 weeks so having now paid the second quarter dividend of £0.3668 we have the more relevant full 12-month cycle ofquarterly payments totalling £1.01417, a yield of 10.5%.

The total shareholder return over the same period was 7.9% in GBP (12.9% in USD) which is exactly the same as the June UK CPI print. We're therefore in-line with inflation over 12 months (short since inception), whilst the income we've generated is clearly ahead by a good margin.

Comparisons will inevitably also be made with peer group funds and established emerging market benchmarks. We've been very clear that we do not reference these benchmarks in the allocation process, so we'd caution about drawing too many conclusions from this analysis. Nevertheless, the fund has outperformed the MSCI Emerging Market index by 9.2% since inception and 10.4% over 12 months.

More relevant from our perspective is how the fund has performed compared to alternative yielding asset classes. One of the cornerstones of our investment thesis has been that corporate and sovereign stewardship in the emerging world has improved significantly, whilst the opposite is true for the developed world. There's now a broad universe of companies with disciplined capital allocation, clear dividend policies with good alignment of interests that are well suited to long term income-orientated investors. As a result, we believed the asset class deserved re-appraisal.

For example, looking at an equity alternative such as the Morningstar Global Equity Income index, since inception the fund has outperformed this benchmark by 100bp and with slightly lower volatility. Against a fixed income alternative such as the Vanguard Global Bond Index, a blend of sovereign and corporate debt, the spread was higher at 12.5% outperformance. This is less surprising considering the recent path of interest rates, but it also illustrates our earlier point concerning relative creditworthiness in that EM fixed income actually outperformed developed markets. Nevertheless,

For the financial year ended 31 December 2023

Pacific North of South EM Equity Income Opportunities Fund (continued)

End of June (continued)

the fund still performed better than both the iShares JPMorgan USD EM bond ETF and the JPMorgan EM High Yield bond EFT by 6.3% and 3.2% respectively.

As we have a tilt towards absolute return investing it's also appropriate to assess the risk we've taken by looking at the return relative to the annualised volatility. On a risk-adjusted basis the fund was in-line with the EM High Yield ETF and better than all the other alternatives mentioned.

It's still early days but so far we feel confident that we've been able to show that it is possible to construct an emerging market equity portfolio of attractively valued, good quality, high yielding companies that have the earnings power to pay out dividend yields that exceed inflation (and their cost of capital) and with a risk/reward ratio appropriate for income investors.

End of September

Over the month the fund appreciated by 4.3%. A third quarter dividend of £0.216591 was also declared giving a twelve-month trailing yield of 8.44%. This was a positive end to a strong quarter, during which time the fund posted a total return of 8.1% which compares favourably with broader indexes and alternative asset classes. We will be publishing a more indepth quarterly analysis shortly.

Over the month Taiwanese technology continued to lead the gains, but there was also good performance from our Brazilian and South Korean holdings all of which were either flat or positive. Energy was also strong led by Petrobras and OMV Petrom in Romania. The most notable area of weakness was in Poland ahead of the general elections in October and a surprise interest rate cut, which was seen to be politically motivated.

Our largest single stock profit came from the Mexican real estate company Fibra Uno which announced a restructuring that was positive for both corporate governance and strategic direction. The two main proposals were to internalise and simplify the contentious existing management contract and to separately list the industrial assets, given the strong demand from near-shoring companies. The stock moved 20% in a day which we subsequently used to take some profit as we already have clear exposure to the industrial sector with Fibra Macquarie (which already has excellent governance), and we have some concerns that the asset separation will not pan-out as positively as anticipated.

In other portfolio changes, we reduced some of our positions that have performed well and were near fair value such as Jumbo (Greece), Chicony (Taiwan) and some of the resource names. We have also started to trim Citic Telecom (Macau) which has been one of our largest positions since launch and has performed well in both absolute and relative returns. We are still very positive on the company but have been recycling profits into other Hong Kong names. Elsewhere, we used the proceeds from Fibra Uno to buy the Mexican bank Ban Bajio, which continues to enjoy very high net interest margins (7.2%) whilst the outlook for loan growth and credit quality both remain strong. The bank has a very solid balance sheet with clear excess capital and yet still generates a return on equity well above 20%. It pays a 10% dividend and has a lower withholding tax than Mexican REITs such as Fibra Uno. In Poland we also added to our position in Bank Pekao given the weakness in the market and the similarly strong fundamentals and attractive yield spread.

More broadly, the move in the dollar and US Treasuries over the past few months has thankfully had a relatively benign impact on the portfolio. Some countries are clearly more sensitive to these factors than others, with China being the most relevant. The irony is that whilst the US continues to pursue restrictive monetary policy, China is doing the exact opposite. Last month saw further measures including a rate cut to existing (rather than new) mortgages. We continue to see smoke signals that the economy is slowly recovering despite the problems in the real-estate sector. The September PMI survey remained over 50, electricity demand in September was up 9.9% year on year, which is a big number and has gathered momentum through the year. This is being increasingly corroborated by our bottom-up company interactions, where our holistic impression is that business activity is challenging but certainly better than the consensus view.

For the financial year ended 31 December 2023

Pacific North of South EM Equity Income Opportunities Fund (continued)

End of September (continued)

We remain sceptical about the longer-term prospects for China but continue to cautiously add to compelling individual opportunities. We have a strong preference for Hong Kong domiciled companies where there's a significantly better tax and currency framework. We also expect to see some further supportive measures specific to Hong Kong real-estate to be announced in October.

End of December

Over the month the fund gained 4.5% and finished the year at an all-time high. This brought the quarterly return to 6.2% and the full year total return to 19.3%.

The fourth quarter distribution of £0.103238 was lower than last year partly due to our Korean companies that moved ex-div dates into the first quarter from the end of December. Our twelve month dividend was therefore 7.45%, beating UK inflation of 3.9% yoy in November.

Over the year we made a positive return in every sector and three quarters of the twenty countries we've invested in. This includes a positive return from our China/Hong Kong holdings, a market that started well but ended the year down 18%.*

At the country level the gold medal went to Taiwanese technology, which also produced our best single stock return which is a mid-cap rugged computer manufacturer. The broader top ten featured two companies each from Taiwan, Poland, Mexico and Brazil, one from Greece and one from UAE, which shows a healthy level of diversification.

This is important as we're interested not just in the absolute performance but the 'quality' of the return. We believe that directly or indirectly, the majority of the capital we've been allocated comes from individuals saving for retirement. We therefore don't want our risk, or our returns determined by a few 'big bets' but a diversified and sustainable blend of investments. This is reflected in the volatility of returns which last year was around 8.7%, equivalent to the UK Gilt ETF, and is roughly two thirds of the industry standard EM equity benchmark.

Whilst there's no empirical link, this can also be considered indicative of the drawdown risk more typically associated with emerging markets, and at the bottom of which is where the worst investment decisions tend to be made. So it's important to try to minimize this risk if at all possible, within the confines of a long-only fund. Despite all the noise last year surrounding corporate defaults in China, US and European bank failures, wars and elections, the largest monthly drawdown period was -1.6%.

Comparing this risk adjusted return to alternative relevant asset classes, we've done better than not only emerging market equities and bonds, but broader developed market global benchmarks more typically associated with conservative income orientated strategies.

All of this leads one to conclude, contrary to popular belief, that 2023 was actually a pretty good year for emerging markets. However you just wouldn't have noticed this if you'd only read the popular press and invested in passive EM funds. We very rarely reference our benchmark as it bears no relevance to our allocation process, but being year-end it's worth highlighting that it returned just 3.7% in GBP and with higher volatility. The fund therefore outperformed by 15.1% over the year and 20.5% since inception.

When we launched this fund we not only decided to take a somewhat different approach focusing on real yields and total shareholder return, but at the margin we've also tried to shift some well-established preconceptions relating to both the opportunities and the risks in emerging market equities. The most obvious being the perceived homogeneity of the asset class with China as the determinant factor. Returns at the country level this year have been quite heterogeneous, which can be used for effective diversification.

For the financial year ended 31 December 2023

Pacific North of South EM Equity Income Opportunities Fund (continued)

End of December (continued)

All markets have risk, the issue is whether they're appropriately understood and adequately priced. Our view has been that the perceived risk in the emerging world is high, but it's attractively priced and in reality risk across the region is declining. This compares to the developed world where risk is obscured, poorly understood and investors are (in our opinion) inadequately compensated. Thankfully the first 18 months of the fund's history appears to support this view.

*Based on MSCI China in GBP

For the financial year ended 31 December 2023

Pacific Coolabah Global Active Credit Fund*

* Launched on 11 October 2023.

End of December

The Pacific Coolabah Global Active Credit Fund matched its benchmark performance for December. As of 31st December, the Fund's weighted average yield to expected maturity is 5.70%, which compares favorably with the benchmark yield of 4.69%.

In the month of December, long-term risk-free rates plunged as global inflation data surprised on the downside as a result of goods disinflation or, in some cases, outright goods deflation (the price of oil also slumped 6-7%). The all-important US 10-year Treasury yield fell 45bps in December, which helped drag down yields in Germany (-42bps), Italy (-54bps), and Britain (-64bps). This powered the rally in fixed-rate bonds. In the final analysis, the US 10-year Treasury yield finished 2023 exactly where it started at 3.88% (i.e. basically unchanged).

Looking back on 2023 as a whole, perhaps one of the best indicators of the roller-coaster ride in expectations and volatility during 2023 was the striking movement in 10-year government bond yields. The US 10-year Treasury yield fluctuated from a low of 3.30% around the time of the Credit Suisse collapse to a high of circa 5.00% in October following upside inflation surprises and hawkish sentiments emanating out of the US Federal Reserve.

Lower discount rates and possibly some year-end window dressing by investors who are overweight equities contributed to the rebound in speculative asset-classes in December with robust total returns reported by the S&P500 (up 4.54%), the Eurostoxx 50 (3.22%), the FTSE 100 (3.85%), the Nasdaq 100 (5.56%), and Bitcoin (11.08%).

Cash and synthetic credit spreads compressed strikingly in December in sympathy with the broader risk rally. In the underlying physical credit (or "cash") market, investment-grade corporate spreads unsurprisingly declined in December in the US (down 5bps), Britain (9bps), Europe (9bps.)

The Fund benefited from this decline in risk free yields and compression in spreads. Throughout the month, the portfolio took profits on various positions ahead of expected significant primary issuance in January 2024. December is typically a lean month for supply and the portfolio concluded the month with substantial capacity to exploit the resumption of primary supply given its very high cash weight of almost 20%. The portfolio managers believe that January should liberate a rich range of primary opportunities with attractive new issue concessions.

Report of the Depositary to the Shareholders

We have enquired into the conduct of the Pacific Capital UCITS Funds plc ('the Company') for the financial year 1 January 2023 to 31 December 2023, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company, in accordance with the UCITS Regulations, as amended, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the UCITS Regulations, as amended. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations, as amended. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Regulations, as amended, and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the financial year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum and Articles of Association and by the UCITS Regulations, as amended, ('the Regulations'); and

(ii) otherwise in accordance with the provisions of the Memorandum and Articles of Association and the Regulations.

Yours sincerely,

Authorised Signatory

Sheenagh Carroll

Citi Depositary Services Ireland Designated Activity Company

Deloitte Ireland LLP Chartered Accountants & Statutory Audit Firm

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF PACIFIC CAPITAL UCITS FUNDS PLC

Report on the audit of the financial statements

Opinion on the financial statements of Pacific Capital Ucits Funds PLC ("the company")

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2023 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework, the applicable Regulations and, in particular, with the requirements of the Companies Act 2014.

The financial statements we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets attributable to holders of Redeemable Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 16, including material accounting policy information as set out in note 2.

The relevant financial reporting framework that has been applied in their preparation is the Companies Act 2014 and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF PACIFIC CAPITAL UCITS FUNDS PLC

Other information

The other information comprises the information included in the Statutory Report and Audited Financial Statements, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the Statutory Report and Audited Financial Statements. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Statement of Directors' Responsibilities, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Opinion on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements and the directors' report has been prepared in accordance with the Companies Act 2014.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not

Continued on next page/

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF PACIFIC CAPITAL UCITS FUNDS PLC

identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Use of our report

This report is made solely to the company's shareholders, as a body, in accordance with Section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements

For the financial year ended 31 December 2023

1. BASIS OF PREPARATION

These statutory audited financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union and the Central Bank UCITS Regulations.

The audited financial statements have been prepared on the going concern basis and under the historical cost convention as modified by the revaluation of certain financial assets and financial liabilities held at fair value through profit or loss.

The preparation of audited financial statements in conformity with IFRS requires the Company to make certain accounting estimates and assumptions that may affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. The Directors believe that any estimates used in preparing the financial statements are reasonable and prudent.

Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

i) Judgements

Information about judgment made in applying accounting policies that have the most significant effects on the amounts recognised in the financial statements is included in the Functional and presentation currency disclosure note 2.2 and Note 9 Financial Instruments and Associated Risks, Fair Value Measurements for greater detail on Levelling classifications of each sub-fund.

ii) Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties, that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ending 31 December 2023, is included in Note 9 and relates to the determination of fair value of financial instruments with significant unobservable inputs.

These audited financial statements are presented in US Dollar ("USD"). For the purposes of producing the Statement of Financial Position of the Company, the Statements of Financial Position of the individual Funds which are not recorded in the presentation currency are translated to USD using the exchange rates as at 31 December 2023 and accumulated for preparation of the Statement of Financial Position. For the purpose of producing the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and the Statement of Cash Flows from the accounts of the individual Funds, average exchange rates for the financial year are used.

The principal accounting policies applied in the preparation of these financial statements are consistent with the accounting policies applied in the preparation of the Audited Financial Statements for the financial year ended 31 December 2022.

2. ACCOUNTING POLICIES

2.1 Financial assets and financial liabilities at fair value through profit or loss

(a) Classification

Financial assets at fair value through profit or loss have two sub-categories: financial assets and financial liabilities held for trading and those designated by management at fair value through profit or loss at inception. Financial assets or financial liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short-term. Forward foreign exchange contracts and all other derivatives fall into this category. Equities are designated by the Directors at fair value through profit or loss at inception. Gains and losses from changes in the fair value of the financial assets at fair value through profit or loss category are included in the Statement of Comprehensive Income.

Financial assets and liabilities previously classified at fair value through profit or loss: The Company holds investments with a total value of USD 3,693,203,656 (2022: USD 2,633,190,157).

(b) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, the date on which the Company commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Related transaction costs are expensed as incurred in the Statement of Comprehensive Income (see Note 2.7).

For the financial year ended 31 December 2023

2. ACCOUNTING POLICIES (continued)

2.1 Financial assets and financial liabilities at fair value through profit or loss (continued)

(b) Recognition, derecognition and measurement (continued)

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership and a realised gain or loss is recognised. Realised gains and losses are presented in the Statement of Comprehensive Income as net gain/(loss) on investment activities.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. The investment objective of the Company is to provide investors with a total return, taking into account both capital and income returns and to achieve long-term capital appreciation and its portfolio is managed on a fair value basis. The Company therefore applies the business model allowed by IFRS 9 paragraph 5.1.1 which requires its portfolio to be classified at fair value through profit or loss. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are included in net gain/(loss) on investment activities in the Statement of Comprehensive Income.

(c) Fair value estimation

(i) Investments

IFRS 13 provides a precise definition of fair value. The Company values listed financial assets and liabilities at the last traded price.

If an asset or a liability measured at fair value has a bid price and an ask price, the standard requires valuation to be based on a price within the bid-ask spread that is most representative of fair value and allows the use of mid-price or other pricing conventions that are used by market participants as a practical expedient for fair value measurement within a bid-ask spread. Listed assets and liabilities were valued using last traded prices as this has been deemed a practical expedient of fair value.

The value of any investment which is not listed or dealt in an active market or of any investment which is normally listed or dealt on a market but in respect of which no price is currently available or the current price does not in the opinion of the Directors represent fair market value, shall be the probable realisation value thereof estimated with care and in good faith by the Directors, or by the Sub-Investment Managers. The Sub-Investment Managers have been appointed as "competent persons" for the purposes of determining the value of investments which cannot be priced in accordance with the pricing rules as outlined in the Prospectus or if prices obtained under such rules are not representative of fair value and has been approved for such purpose by the Depositary. In fair valuing securities, the Sub-Investment Managers utilise the services of their valuation committees and are required to report quarterly to the Directors.

Estimates of fair value utilised by the Funds as described above may differ from the value realised on the sale of those securities and the differences may be material to the Net Asset Value ("NAV") of the Funds.

(ii) Forward foreign exchange contracts

The fair value of open forward foreign exchange contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the period date. Unrealised gains and losses on open foreign exchange contracts are included on the Statement of Financial Position and are detailed in the Schedule of Investments. Realised gains and losses are recorded as a net gain/(loss) on investment activities in the Statement of Comprehensive Income.

(iii) Futures contracts

The fair value of futures contracts is based upon daily quoted settlement prices. Changes in the value of the contracts are recognised as unrealised gains or losses in the Statement of Comprehensive Income by "marking to market" the value of the contract at the period end date. When the contract is closed, the difference between the proceeds from (or cost of) the closing transactions and the original transaction is recorded as a net gain/(loss) on investment activities in the Statement of Comprehensive Income. The unrealised gain or loss at the financial year end is reported as an asset or liability, as applicable, in the Statement of Financial Position.

For the financial year ended 31 December 2023

2. ACCOUNTING POLICIES (continued)

2.1 Financial assets and financial liabilities at fair value through profit or loss (continued)

(c) Fair value estimation (continued)

(iv) Contract for differences

A contract for difference ("CFD") is as an agreement between the Fund and a CFD counterparty to pay or receive the change in the value of an underlying security.

In a long CFD contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the CFD contract would have increased in value had it been invested in the underlying security or securities. The Fund pays the counterparty a floating rate of interest on the notional amount of the CFD. The return to the Fund on a CFD contract will be the gain or loss on the notional amount plus any dividends accrued less the interest paid on the notional amount.

In a short CFD contract, the counterparty agrees to pay the Fund the amount, if any, by which the notional amount of the CFD contract would have decreased in value had it been invested in the underlying security or securities. The Fund agrees to pay the counterparty the amount, if any, by which the notional amount of the CFD contract would have increased in value had it been invested in the underlying security of securities. The Fund must also pay the counterparty the value of any dividends that would have been received on those securities. The Fund receives from the counterparty a floating rate of interest on the notional amount of the CFD.

At each valuation point the difference in price between the opening price of the CFD and the market price of the underlying security is recorded at the fair value (unrealised gain or loss) of the CFD in the Statement of Financial Position. Changes in unrealised gains or losses are recognised in the Statement of Comprehensive Income.

When the CFD is closed the difference between the opening price of the CFD and the closing price is recorded as a net gain/(loss) on investment activities in the Statement of Comprehensive Income. The interest received or paid are recorded as dividend income/expense in the Statement of Comprehensive Income.

(v) Options

Options have two forms, put and call options. Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a specific quantity of a particular product or financial instrument at a specified price. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option. Options may also be cash settled. The daily changes in contract value are recorded at the fair value (unrealised gain or loss) in the Statement of Financial Position. Changes in unrealised gains or losses are recognised in the Statement of Comprehensive Income. The Funds recognise a realised gain or loss when the contract is closed.

When the Fund purchases an option, an amount equal to fair value which is based on the discounted* premium paid is recorded as an asset. When the Fund writes an option, an amount equal to fair value which is based on the premium received by the Fund is recorded as a liability. These are marked to market on a regular basis and the daily changes in contract value are recorded as unrealised gains or losses in the Statement of Comprehensive Income.

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security of foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.

^{*}Forward premiums discounted

For the financial year ended 31 December 2023

2. ACCOUNTING POLICIES (continued)

2.1 Financial assets and financial liabilities at fair value through profit or loss (continued)

(c) Fair value estimation (continued)

(vi) Swaps

Swaps are agreements between two counterparties in which the cash flows from two assets are exchanged as they are received for a fixed time year, usually the terms are initially set so that the present value of the swap is zero. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to make or receive interest payments (e.g. an exchange of fixed rate payments for floating rate payments). On each payment date under an interest rate swap, the net payments owed by each party, and only the net amount, is paid by one party to the other. Unrealised gains and losses on swap contracts are recognized in the Statement of Financial Position. Realised gains and losses or any swap related income/expenses are recognised in net gain/(loss) on Investments in the Statement of Comprehensive Income. Swap Interest income is recognised as Interest Income in the Statement of Comprehensive Income.

A swaption is an option to enter into a swap. In exchange for an option premium, the buyer gains the right but not the obligation to enter into a specified swap agreement with the issuer on a specified future date.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment financial year. The Funds' maximum risk of loss for total return swaps from counterparty risk or credit risk is the discounted value of the payments to be received from/paid to the counterparty over the contract's remaining life, to the extent that the amount is positive. The risk is mitigated by having a netting arrangement between the Funds and the counterparty and by the posting of collateral to the Funds to cover the Funds' exposure to the counterparty.

2.2 Foreign currency

(a) Functional and presentation currency

Items included in the financial statements of the Company are measured in the currency of the primary economic environment in which the Funds operate (the "functional currency"). The financial statements of the Company are presented in USD.

(b) Foreign currency translation

Transactions in currencies other than USD are recorded at the rates of exchange prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of financial period end exchange rates of monetary items and non-monetary assets and liabilities that are denominated in foreign currencies are recognised in the Statement of Comprehensive Income in the financial period in which they arise. Net foreign exchange gains/(losses) on non-monetary and monetary financial assets and liabilities is included in the Statement of Comprehensive Income within net gain/(loss) on investment activities.

2.3 Revenue recognition

Dividend income is recognised when the Funds' right to receive the payment has been established, normally being the exdividend date. Dividend income is recognised gross of withholding tax, if any. Interest income on cash is recognised on an effective interest rate basis.

Bank interest income is recognised as income on an effective yield basis.

Interest income on bonds is recognised using the effective interest rate method.

For the financial year ended 31 December 2023

2. ACCOUNTING POLICIES (continued)

2.1 Financial assets and financial liabilities at fair value through profit or loss (continued)

2.4 Cash and cash equivalents

Cash and cash equivalents include cash in hand and other short-term investments in an active market with original maturities of three months or less and bank overdrafts. All amounts are subject to insignificant changes in fair value.

2.5 Collateral and margin cash

Margin cash is held by or due to brokers for open futures contracts and cleared swaps. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is as such restricted and is reported separately to the unrestricted cash on the Funds' Statements of Financial Position.

Cash collateral provided for CFDs, swaps, swaptions, futures and FX options by the Funds is identified in the Statement of Financial Position as cash collateral and is not included as a component of cash and cash equivalents.

2.6 Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

2.7 Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on the purchase and sale of forward foreign exchange contracts and swaps are included in the purchase and sale price of the investment.

Transaction costs on purchases and sales of equities and futures contracts are included in the purchase and sale price of the investment for the Funds, these include identifiable brokerage charges, commissions, transaction related taxes and other market charges.

Custody transactions costs are included in custody fees. These costs are separately identifiable transaction costs and the total costs incurred by the Funds during the financial year are disclosed in Note 8, these include transaction costs paid to the Depositary.

2.8 Repurchase Agreements

A repurchase agreement ("repo") is the sale of a security with a commitment by the seller to buy the same security back from the purchaser at a specified price at a designated future date. For the party selling the security (and agreeing to repurchase it in the future at a specified time and price) it is a repurchase agreement and will generally be used as a means of raising short-term finance and its economic effect is that of a secured loan as the party purchasing the security makes funds available to the seller and holds the security as collateral A reverse-repurchase agreement ("reverse repo") is the same repurchase agreement from the buyers viewpoint, not the seller's. By convention, whether the transaction is called a repo or a reverse repo agreement is determined by viewing the transaction from the perspective of the dealer (i.e. The fund counterparty). The counterparty liability is included under 'Repurchase agreement payable' in the Statement of Financial Position.

2.9 Redeemable participating shares

In accordance with the requirements of the Prospectus, the Funds issue redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating shares can be put back into the Funds at any time for cash equal to a proportionate share of the Funds' NAV. The redeemable participating share is carried at the redemption amount that is payable at the financial period end date if the holder exercises the right to put the share back into the Funds.

For the financial year ended 31 December 2023

2. ACCOUNTING POLICIES (continued)

2.9 Redeemable participating shares (continued)

Redeemable participating shares are issued and redeemed at the holder's option based on the Funds' NAV per share at the time of issue or redemption.

The Funds' NAV per share is calculated by dividing the net assets attributable to the holders of redeemable participating shares by the total number of outstanding redeemable participating shares. Expenses or management fees or charges not attributable to a particular Class may be allocated amongst the Classes based on their respective NAV. In accordance with the provisions of the Funds' regulations, investment positions are valued based on the latest available price for the purpose of determining the NAV per share for subscriptions and redemptions.

2.10 Receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

Receivables are recognised initially at fair value plus transaction costs that are directly attributable to their acquisition origination. They are subsequently measured at amortised cost using the effective interest yield method, less provision for impairment, impairment would be considered as part of the expected credit loss model under IFRS 9.

2.11 Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expenses are not offset in the Statement of Comprehensive Income unless required or permitted to by an accounting standard or interpretation, as specifically disclosed in the financial reporting framework of the Company.

2.12 Payables

Payables are recognised initially at fair value and subsequently stated at amortised cost. The difference between the proceeds and the amount payable is recognised over the period of the payable using the effective interest method.

Trade and other creditors are payable at various dates in the next three months in accordance with the suppliers' usual and customary credit terms.

2.13 Withholding Tax

The Sub-Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the Statement of Comprehensive Income. Withholding taxes are shown as a separate item in the Statement of Comprehensive Income.

2.14 Standards and amendments to existing standards effective 1 January 2020

IFRIC 23 'Uncertainty over income tax treatment'

This standard specifies how to reflect the effect of uncertainty in accounting for income taxes where it may be unclear how tax law applies to a particular transaction or circumstance, or whether a taxation authority will accept a tax treatment.

This interpretation has not had a material impact on the financial statements.

2.15 New standards, amendments and interpretations for future reporting period that has not been early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2023 and have not been early adopted in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Fund.

2.16 Fund Assets Cash Balances

Fund asset cash balances are reflected at a Fund level on the Statement of Financial Position. They represent umbrella cash collection account balances attributable to the individual Funds of the Company. These amounts relate to subscription and redemption monies, including dividend money, that are due to an individual Fund, as Fund assets, and which are held in an umbrella cash collection account in the name of the Company.

For the financial year ended 31 December 2023

3. EXCHANGE RATES

^{*} The accrual for establishment costs has been fully expensed.

^{**} Launched on 10 June 2022.

For the financial year ended 31 December 2023

6. TAXATION

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended, (the "Taxes Consolidation Act"). On that basis, it is generally not chargeable to Irish tax on its income and gains. However, Irish tax may arise on the occurrence of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable
 event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, are held by
 the Company; and certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed
 statutory declarations.
- Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding
 taxes imposed by the country from which the investments income/gains are received and such taxes may not be recoverable
 by the Company and its shareholders. Withholding tax and reclaims incurred on dividends are recorded on ex-date. Dividends
 receivable are shown net of withholding taxes payable, if any, in the Statement of Financial Position. Withholding taxes and
 Capital Gains Taxes are shown are recorded on the Statement of Comprehensive Income.
- The Funds may be subject to taxes imposed on realised and unrealised gains on securities of certain foreign countries in which the Funds invest. The foreign tax expense, if any, was recorded on an accrual basis and is included in "Capital gains taxes" on the Statement of Comprehensive Income. The amount of foreign tax owed, if any, is included in "Capital gains tax payable" on the Statement of Financial Position.

7. EFFICIENT PORTFOLIO MANAGEMENT

The Investment Manager and Sub-Investment Managers may, on behalf of the Funds and subject to the conditions and limits set out in the Central Bank UCITS Regulations, employ techniques and instruments relating to transferable securities for hedging purposes (to protect an asset of a Fund against, or minimize liability from, fluctuations in market value or foreign currency exposures) or for efficient portfolio management purposes.

The Funds may enter into stock lending agreements subject to the conditions and limits laid down by the Central Bank of Ireland for efficient portfolio management purposes only.

During the financial year, forward currency contracts, futures, FX options and swaps transactions were entered into for the purpose of efficient portfolio management in order to hedge currency and market exposure and/or for investment purposes. Details of all open transactions at the financial year end are disclosed in the Schedule of Investments.

8. FEES AND EXPENSES

Manager Fees

The Manager shall be entitled to an annual management fee of up to 0.02% of the Net Asset Value (the "Management Company Fee") of the relevant Fund. The Management Company Fee is based on a sliding scale applied to the aggregate assets across all Funds, subject to an annual minimum fee of €50,000 based on a single Fund and an annual minimum fee of €10,000 for each of five additional Funds and €7,500 per annum for each additional Fund thereafter.

The Management Company Fee shall be subject to the imposition of VAT, if required. The Management Company Fee will be calculated and accrued daily and is payable monthly in arrears.

The Manager shall be entitled to be reimbursed by the Company out of the assets of the relevant Fund for reasonable out of pocket expenses properly incurred and any VAT on all fees and expenses payable to or by it.

Manager fees amounting to USD 306,121 (31 December 2022: USD 169,765) were charged to the Funds for the financial year ended 31 December 2023 of which USD 19,467 (31 December 2022: USD 143,116) was payable as at the financial year end.

For the financial year ended 31 December 2023

8. FEES AND EXPENSES (continued)

Investment Manager's Fee

The Investment Manager is entitled to charge a percentage fee per annum of the NAV attributable to each share class, up to a maximum, as detailed below. The Investment Manager's fees were accrued daily based on the NAV of the previous day attributable to each class and were paid monthly in arrears. The Investment Manager may pay part or all of the Management fee to the Sub-Investment Manager. The Investment manager may, in its sole discretion, during any period, elect to waive a portion of its fees with respect to the Fund or any Class without notice to Shareholders.

A portion of the IM fee for the dVAM range will be paid to dVAM for product advisory services as per the agreement with the fund.

 $^{{}^*\}text{Combined}$ management fee split between Investment Manager, Sub Investment Manager and Product Advisor.

For the financial year ended 31 December 2023

8. FEES AND EXPENSES (continued)

Investment Manager's Fee (continued)

Investment management fees amounting to USD 25,465,633 (31 December 2022: USD 19,267,694) were charged to the Funds for the financial year ended 31 December 2023 of which USD 3,546,778 (31 December 2022: USD 4,614,903) was payable as at the financial year end.

Performance Fee – Pacific North of South EM All Cap Equity, Pacific G10 Macro Rates Fund and Pacific Longevity and Social Change Fund, Pacific North American Opportunities Fund and Pacific Coolabah Global Active Credit Fund.

There were USD 2,190 Performance Fees charged to the Pacific G10 Macro Rates Fund for the financial year ended 31 December 2023 (31 December 2022: USD 5,066).

In addition to the Investment Management Fee, the Investment Manager shall be entitled to receive out of the assets of the Fund attributable to Performance Fee Shares of the Fund a performance fee (the "Performance Fee") which will accrue on each Valuation Day and be paid either annually in arrears at the end of each twelve month period ending on 31 December in each year or upon redemption of Shares (the "Calculation Period").

The entitlement to the Performance Fee arises when the percentage return is above that of the Benchmark (as defined below) (outperformance of the Benchmark) and simultaneously the Net Asset Value per Share (adjusted for any dividend) is higher than the High Water Mark (as defined below) (outperformance of the High Water Mark). Both conditions must be fulfilled. The Performance Fee in each case amounts to 10% of the outperformance of High Water Mark or outperformance of the Benchmark, the lower of the two percentage outperformance values serving as a basis for calculation.

Dividend distributions paid out shall not be deemed to impact the performance of the Share Class. The percentage return is the difference between the Net Asset Value per Share on the last Valuation Day of the previous Calculation Period and the Net Asset Value per Share on the last Valuation Day of the current Calculation Period before the deduction of performance fees (or in the case of the first Calculation Period, the difference between the initial offer price applicable to the relevant class and the Net Asset Value per Share on the last Valuation Day of the current Calculation Period before the deduction of performance fees.

The Performance Fee shall be calculated by the Administrator (subject to verification by the Depositary) based on the finalised Net Asset Value per Share (adjusted for any dividend) of the relevant class of Shares of the Fund as at the relevant Valuation Day. Further information on the performance fee calculation can be in the prospectus.

Included in the calculation of the Performance Fee shall be net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant Calculation Period. As a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

The Pacific Multi-Asset Accumulator – Conservative Fund, Pacific Multi-Asset Accumulator – Core Fund, Pacific Multi-Asset Accumulator – Defensive Fund, Pacific Multi Asset Accumulator – Plus Fund, dVAM Global Equity Income PCP Fund, dVAM Balanced Active PCP Fund, dVAM Growth Active PCP Fund, dVAM Cautious Active PCP Fund, dVAM Diversified Liquid Alternatives PCP Fund, dVAM Global Equity Focus Strategy PCP Fund, Pacific MA Sustainable - Balanced Fund and Pacific North of South Emerging Markets Equity Income Opportunities Fund are not subject to performance fees.

For the financial year ended 31 December 2023

FEES AND EXPENSES (continued)

Depositary's Fees

The Depositary shall be entitled to a fee of up to 0.02% per annum of the NAV of the Funds, subject to a minimum annual fee of USD 15,000 per annum. This minimum fee may be waived by the Depositary for such period or periods of time as may be agreed between the Company and the Depositary from time to time. The Depositary is also entitled to be reimbursed out of the assets of the Fund for any sub-custodian fees (at normal commercial rates) in respect of any custodian appointed by it as well as agreed upon transaction charges (at normal commercial rates). Other fees and expenses, payable to the Depositary, include fees in respect of transaction processing fees. These fees are at normal commercial rates and are primarily charged on a 'per-transaction' basis.

These fees (plus VAT, if any) will accrue on a daily basis and shall be payable monthly in arrears on the last Business Day of each month.

The Company will reimburse the Depositary out of the assets of the Fund for reasonable out-of-pocket expenses (plus VAT thereon, if any) incurred by the Depositary and for reasonable out-of-pocket expenses of any sub-custodian appointed by the Depositary and will be liable for transaction charges. The expenses of the Depositary shall accrue on a daily basis and shall be payable monthly in arrears.

Trustee fees charged for the financial year amounted to USD 496,542 (31 December 2022: USD 389,673). At the financial year end, USD 212,617 (31 December 2022: USD 64,584) was payable.

Depository fees charged for the financial year amounted to USD 1,139,132 (31 December 2022: USD 782,003). At the financial year end, USD 554,406 (31 December 2022: USD 41,951) was payable.

Administrator's Fees

The Administrator is entitled to be paid by the Funds for administration, accounting and transfer agency services. The Administrator is entitled to a maximum variable annual fee of up to 0.06% of the NAV of the Funds, subject to a minimum annual fee of USD 25,000 for Pacific Multi-Asset Accumulator – Conservative Fund, Pacific Multi-Asset Accumulator – Core Fund, Pacific Multi-Asset Accumulator – Defensive Fund, Pacific Multi-Asset Accumulator – Plus Fund, Pacific North of South EM All Cap Equity Fund, Pacific G10 Macro Rates Fund, dVAM Diversified Liquid Alternatives PCP Fund and Pacific Longevity and Social Change Fund.

The Administrator is entitled to a maximum variable annual fee of up to 0.04% of the NAV of the Funds, subject to a minimum annual fee of USD 25,000 for dVAM Global Equity Income PCP Fund, dVAM Balanced Active PCP Fund, dVAM Growth Active PCP Fund, dVAM Cautious Active PCP Fund and dVAM Global Equity Focus Strategy PCP Fund.

This minimum fee may be waived by the Administrator for such period or periods of time as may be agreed between the Company and the Administrator from time to time. Other fees and expenses, payable to the Administrator, include fees in respect of additional Share Class costs, financial reporting, transfer agency and fees for tax reclaim services. These fees are at normal commercial rates and are primarily charged on a 'per-transaction' basis. These fees (plus VAT, if any) will accrue on a daily basis and shall be payable monthly in arrears on the last Business Day of each month.

The Company will reimburse the Administrator for reasonable out-of-pocket expenses (plus VAT thereon, if any) incurred out of the assets of the Fund. The expenses shall accrue on a daily basis and shall be payable monthly in arrears.

Administration fees charged for the financial year amounted to USD 1,127,412 (31 December 2022: USD 888,846). At the financial year end USD 465,245 (31 December 2022: USD 83,562) was payable. Transfer agency fees charged for the financial year amounted to USD 683,194 (31 December 2022: USD 670,423). At the financial year end USD 246,697 (31 December 2022: USD 113,971) was payable.

Directors' Fees

The Directors are entitled to remuneration for their service at a rate to be determined by the Company, provided that the aggregate fees of the Directors do not exceed EUR 100,000 in any one financial year without the approval of the Board of Directors. The Board of Directors may also be paid, inter alia, for travelling, hotel and other expenses properly incurred by them in attending meetings of the Directors or in connection with the business of the Company. For the financial year ending 31 December 2023 the Directors received fees of USD 66,472 (31 December 2022: USD 66,558). At the financial year end the Directors' fees payable was USD 35,550 (31 December 2022: USD 37,702). Directors' fees are only applicable to independent directors.

For the financial year ended 31 December 2023

8. FEES AND EXPENSES (continued)

Auditor's Remuneration

The remuneration for all work carried out for the Company by the statutory audit firm in relation to the audit (including out of pocket expenses) of the Company's financial statements amounted to USD 171,549 (31 December 2022: USD 104,579) for financial year ended 31 December 2023. At the financial year end, USD 112,512 (31 December 2022: USD 69,062) was payable. There were no other fees paid to Deloitte Ireland LLP for Taxation services, other assurance services and non-audit services during the financial years ended 31 December 2023 or 31 December 2022.

Expense Cap

An expense cap reimbursement is in place to ensure that the total expenses of the Funds may not exceed a certain threshold. All expenses, except the Distribution fees are subject to this expense cap. It is calculated using different rates in respect of each type of share classes. Those rates ranging from 0.60% to 2.65% of the average daily NAV.

The expense cap for the financial year end 31 December 2023 is USD 1,060,560 (31 December 2022: USD 652,194). At the financial year end, USD 1,535,237 (31 December 2022: USD 1,105,106) was receivable.

Transaction fees

As disclosed in Note 2.7, transaction fees are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability. Under purchases and sales transaction fees detailed below are the transaction fees on the purchases and sales of equities.

Due to operational challenges in extracting the transaction costs on the purchase and sale of forward foreign exchange contracts and swaps, transaction costs on these instruments cannot be separately identified. They are included in the purchase and sale price of the investment, and therefore not disclosed separately in this note.

For the financial year ended 31 December 2023, the Funds incurred transaction fees as follows:

| | | Purchases and sales |
|--|----------|----------------------|
| | | transaction fees for |
| Funds | Fund CCY | equities |

FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS

General risk management process

As an investment company, the management of financial instruments is fundamental to the management of the Company's business. The Investment Manager is responsible, subject to the overall supervision and control of the Board of Directors, for managing the assets and investments of the Funds of the Company in accordance with each Fund's investment objectives, any guidelines approved by the Board of Directors and the investment policies set forth in the Prospectus and its Supplements in accordance with the UCITS Regulations.

In pursuing its investment objectives, the Company may hold a number of investments, including:

- Equities and Bonds;
- · Cash and liquid resources; and
- Contracts for difference, futures contracts, forward foreign exchange contracts, interest rate swaps, options and swaptions.

These instruments may be volatile, involve certain specific risks and expose investors to a high risk of loss. The low initial margin deposits normally required to establish a position in such instruments permit a high degree of leverage.

As a result, a relatively small movement in the price of a contract may result in a profit or a loss that is high in proportion to the amount that the Funds actually placed as initial margin and may result in unlimited further loss exceeding any margin deposited.

Furthermore, when used for hedging purposes there may be an imperfect correlation between these instruments and the investment or market sectors being hedged. Transactions in over the counter derivatives may involve additional risk as there is no exchange market on which to close out an open position.

As defined in the accounting standard IFRS 7, risk can be separated into the following components; market risk, credit risk and liquidity risk. Each type of risk is discussed in turn and qualitative and quantitative analysis are provided where relevant to give an understanding of the risk management methods used by the Investment Manager.

For the financial year ended 31 December 2023

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

Risk Management Framework

The Company's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the Company.

The Board of Directors reviews reports from the Investment Manager in relation to the Funds' performance and risk profile on a quarterly basis, or more frequently as required in relation to the Company's performance and risk profile. The Investment Manager is also responsible for ensuring that the Funds are managed in accordance with the terms of the Funds' investment objective, policy, guidelines and limits as set out in the Prospectus and relevant Supplement, as well as the Investment Manager's own internal investment guidelines and limits.

The Company's Depositary is responsible for independent day to day monitoring of compliance of the Funds' investment guidelines and limits, reporting any breaches to the Investment Manager or Company, as appropriate. These guidelines and limits are set to ensure that the risk borne by the Funds are appropriate. In addition, the Investment Manager reviews and monitors risk, exposure and performance reports received from the individual Sub-Investment Managers, supplemented with internally generated analysis using data fed directly from the Depositary.

Role of the Investment Manager

The Investment Manager has responsibility for the selection and monitoring of Sub-Investment Managers. To that end, the Investment Manager undertakes regular due diligence reviews of each Sub-Investment Manager. As part of this process the Investment Manager will review the proposed use of Financial Derivative Instruments ("FDIs") and the Sub-Investment Managers' risk management processes. Additionally, Sub-Investment Managers will agree with the Investment Managers that their use of FDIs will comply with the provisions of the Funds'/Company's Risk Management Process ("RMP"). Any material deviations to a Sub-Investment Managers use of FDI and risk management process require the prior notification of and approval of the Investment Manager. This is a condition of the investment management agreements with the Sub-Investment Managers. Each Sub-Investment Manager must provide monthly compliance questionnaires and are subject to periodic compliance reviews by the compliance function of the Investment Manager.

The risk management team within the Investment Manager monitors the Funds on an ongoing basis. Any inappropriate use of FDIs (such as a non-approved FDI) or excessive exposures will typically be picked up as part of their ongoing review.

Role of the Administrator

The Administrator provides fund administration services and valuation of all assets and liabilities including FDIs used by the Funds at each valuation point. Any issues that are identified by the Administrator are immediately brought to the attention of the Investment Manager for further investigation.

Role of the Depositary

The Company's Depositary carries out a separate and independent compliance monitoring role to those carried out by the Investment Manager, Investment Service Providers, and Administrator. As part of its fiduciary role to a regulated fund, the Depositary reviews all of the investment objectives and limits (including FDI limits) on an ongoing basis. While not appointed by the Investment Manager (the Depositary is appointed by the Company), any breaches identified by the Depositary are immediately brought to the attention of the Investment Manager for investigation and resolution.

For the financial year ended 31 December 2023

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

Role of Sub-Investment Managers

As mentioned above, discretionary investment management has been outsourced to the Sub-Investment Managers and also managed internally. In addition to the oversight and independent monitoring being carried out by the Investment Manager, Administrator and Depositary, each Sub-Investment Manager must have adequate controls and procedures in place to manage their respective portfolios within the limits prescribed under the UCITS Regulations and the Central Bank guidance in respect of FDIs.

Each Sub-Investment Manager must have a RMP in place which is designed to be UCITS compliant. As outlined in the various Sub-Investment Managers' RMP documents, each Sub-Investment Manager is required to manage its portfolio in accordance with the UCITS Regulations and the Central Bank's guidance on FDIs. Furthermore, the Sub-Investment Managers will only use the FDIs outlined in their respective RMPs. If a Sub-Investment Manager wishes to use a FDI not covered by the existing RMP, this change will necessitate an amendment to their RMP document and, by implication, the Fund's RMP. This will require the approval of the Central Bank before the FDI can be used.

(a) Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is divided into three distinct sections; market price risk, currency risk and interest rate risk.

(i) Market price risk

Market price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

Value at Risk ("VaR")

VaR represents the potential losses from adverse changes in market factors for a specified time period and confidence level. It is the maximum loss not exceeded with a given probability defined as the confidence level, over a given period of time.

The Investment Manager estimates VaR using historical simulation. This involves running the current portfolio across a set of historical price changes to yield a distribution of changes in portfolio value, and computing a percentile (the VaR).

The Funds global exposure is measured either using VaR or the commitment approach as defined by the individual sub funds supplements. Where the fund is subject to an advanced risk management process which, in compliance with the UCITS Regulations aims to ensure that on any day the absolute value-at-risk of the Funds may not exceed 20% of the NAV of the Fund. The value-at-risk of the Portfolio is an estimation of the maximum loss which the Fund may incur over a one month holding period and is arrived at through quantitative simulations with a one-tailed confidence interval of 99% and a historical observation period of 2 years.

The table below shows the calculated VaR using 5 year historical simulation of the portfolio as at 31 December 2023 for the Pacific Multi Asset Accumulator Funds and 1 year historical simulation of the portfolio as at 31 December 2023 for the Pacific G10 Macro Rates Fund.

| | Method | Value under |
|---|------------------|-------------|
| Funds | | method |
| Pacific Multi-Asset Accumulator – Conservative Fund | VaR 20 day - 99% | 8.2% |
| Pacific Multi-Asset Accumulator – Core Fund | VaR 20 day - 99% | 10.2% |
| Pacific Multi-Asset Accumulator – Defensive Fund | VaR 20 day - 99% | 5.9% |
| Pacific Multi-Asset Accumulator – Plus Fund | VaR 20 day - 99% | 12.6% |
| Pacific G10 Macro Rates Fund | VaR 20 day - 99% | 3.6% |

For the financial year ended 31 December 2023

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(a) Market Risk (continued)

(ii) Foreign currency risk

Foreign currency risk arises on financial instruments that are denominated in a foreign currency, i.e. in a currency other than the functional currency in which they are measured. The value of the Company's investments can be affected by currency translation movements as some of the assets and income may be denominated in currencies other than the base or functional currency of that Company.

A portion of the assets of the Funds are denominated in currencies other than the functional currency of each Fund. The Funds are therefore exposed to currency risk, whereby the net assets and total return can be significantly affected, favourably or unfavourably, by currency movements.

In line with the Prospectus, in some cases the Company manages the Funds' exposure to foreign exchange movements by entering into foreign exchange hedging transactions, while in others the Company elects not to hedge the foreign currency risk but take the effect of the exposure.

The tables below summarise the foreign currency risk exposure of the Funds' assets and liabilities, monetary and non-monetary, and reflects the way the risk is monitored and managed. The sensitivity details the effect of a 5% increase in relevant foreign currency exchange rates. A 5% decrease in exchange rates would have an impact that in all material effect would be equal and opposite.

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(a) Market Risk (continued)

(iii) Interest rate risk

Interest rate risk is the risk that the value of an investment that is impacted by interest rates (such as fixed income investments) will fluctuate due to changes in market interest rates.

Interest rate risk is managed, in part, by the security selection process of the Investment Manager which includes predictions of future events and their impact on interest rates, diversification and duration. The Investment Manager monitors the interest rate risk in accordance with their risk policy.

The Company is exposed to interest rate risk to the extent that it receives interest income on its cash and cash equivalents balances, the value of investments in interest rate bearing securities may also be subject to price volatility due to changes in interest rates. The Funds have no material cash flow risk arising from interest on these balances. The value of investments in interest rate bearing securities may be subject to price volatility due to changes in interest rates.

The below table details the material interest rate risk exposure held by the fund as at 31 December 2023.

^{*} Launched on 10 June 2022.

For the financial year ended 31 December 2023

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(b) Liquidity Risk

Liquidity risk is the risk that the Funds will encounter difficulty in meeting obligations associated with financial liabilities. The risk associated with the need to satisfy shareholders' requests for redemptions is mitigated by the fact that the Funds hold substantial liquid assets, including cash, which can satisfy usual levels of demand.

The Board of Directors may in their discretion limit the number of shares of the Funds redeemed on any dealing day to shares representing not more than 10% of the NAV of each Fund on that dealing day. In this event, the Directors may defer the excess redemption applications to subsequent dealing days. The limitation will apply pro rata so that all shareholders wishing to have shares of each Fund redeemed on that dealing day realise the same proportion of their shares. Shares that are not redeemed, but which would otherwise have been redeemed, will be carried forward for redemption on the next dealing day and will be dealt with in priority (on a pro rata basis) to redemption requests received subsequently.

As at 31 December 2023 and 31 December 2022 the Company has no non-derivative liabilities over 3 months. Some funds have longer dated derivative liabilities however these liabilities are managed in line with the funds' investment policy and risk management process.

(c) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it entered into with the Company on behalf of the Funds.

In managing credit risk the Investment Manager reviews the creditworthiness of counterparties with which the Company contracts. The Company may enter derivative or other agreements with counterparties approved by the Investment Manager subject to the investment restrictions set out in the Prospectus and Supplements.

Substantially all of the cash and securities held by the Company are held via the Citi Depositary Services Ireland Designated Activity Company which is the global depositary for the Funds and is permitted to appoint sub-custodians to provide custody services on their behalf. Bankruptcy or insolvency of the Depositary or sub-custodians may cause the Company's rights with respect to cash and securities held by them to be delayed or limited.

The Company's securities are separately identified on the books and records of the sub-custodians, therefore the rights, with respect to those securities, are preserved. Thus in the event of insolvency or bankruptcy of the Depositary or sub-custodians, the Company's assets are segregated and protected. However, in the case of a credit event, access to assets may be delayed. Cash, unlike securities, is fungible and cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation. However, for all major currencies, the cash at the sub-custodian is maintained in correspondent accounts of the sub-custodian.

For the financial year ended 31 December 2023

9. FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(c) Credit Risk (continued)

Substantially all cash and cash equivalents were deposited with Citi Depositary Services Ireland, which had a long term credit rating of A+ as at 31 December 2023 (2022: A+) (Ratings Source: Moody's Long Term).

The following tables present information about the net exposure of derivative instruments and collateral amounts as at 31 December 2023 and 31 December 2022:

For the financial year ended 31 December 2023

FINANCIAL INSTRUMENTS AND ASSOCIATED RISKS (continued)

(d) Capital Management

The capital of the Company is represented by the net assets attributable to holders of redeemable participating shares. The amount of net assets attributable to holders of redeemable participating shares can change significantly on a daily basis, as the Company is subject to daily subscriptions and redemptions at the discretion of the shareholders.

A redemption request by a significant shareholder may have a significant impact on the liquidity of the Company and its ability to continue as a going concern. Refer to the Liquidity Risk section above for details of how this risk is mitigated.

The Company's objective when managing capital is to safeguard its ability to continue as a going concern in order to achieve its overall objective of long-term capital growth and to maintain a strong capital base to support the development of its investment activities.

The Investment Manager monitors capital on the basis of the value of net assets attributable to holders of redeemable participating shares.

(e) Fair Value Hierarchy

The Company classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Certain inputs for the asset or liability are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorized in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgment by the Investment Manager. The Investment Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

For each class of assets and liabilities not measured at fair value in the Statement of Financial Position but for which fair value is disclosed, IFRS 13 requires the Company to disclose the level within the fair value hierarchy within which the fair value measurement would be categorised and a description of the valuation technique and inputs used in the technique.

Assets and liabilities, not carried at fair value are carried at amortised cost; their carrying values are a reasonable approximation of fair value.

Cash and cash equivalents include deposits held with banks and other short-term investments in an active market and they are categorised as Level 1.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Company.

Payable for investments sold and other payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2.

For the financial year ended 31 December 2023

^{**}Launched on 11 October 2023.

There were no transfers between Level 1 and Level 2 of the fair value hierarchy during the financial year.

As at 31 December 2023 there are no securities categorised as Level 3.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the period and are deemed to have occurred when the pricing source or methodology used to price an investment has changed which triggers a change in level as defined under IFRS 13.

For the financial year ended 31 December 2023

^{*}Launched on 10 June 2022.

There were no significant transfers between Level 1 and Level 2 of the fair value hierarchy during the financial year.

As at 31 December 2022 there are no securities categorised as Level 3.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the period and are deemed to have occurred when the pricing source or methodology used to price an investment has changed which triggers a change in level as defined under IFRS 13.

For the financial year ended 31 December 2023

10. SOFT COMMISSIONS

There were no soft commission arrangements in existence during the financial years ended 31 December 2023 and 31 December 2022.

11. RELATED PARTY TRANSACTIONS

The Manager earned fees of USD 306,121 (31 December 2022: USD 169,765) during the financial year of which USD 19,467 (31 December 2022: USD 143,116) remained payable. For further details on the Manager's fees, see Note 8.

The Investment Manager earned fees of USD 25,465,633 (31 December 2022: USD 19,267,694) and reimbursed fees of USD 1,060,560 to the Funds (31 December 2022: USD 652,194) during the financial year of which USD 3,546,778 (31 December 2022: USD 4,614,903) remained payable and USD 1,872,343 (31 December 2022: USD 1,105,106) remained receivable at the financial year end. For further details on the Investment Manager's fees, see Note 8.

During the financial year performance fees of USD 2,015 (31 December 2022: USD 5,066) were charged to the Pacific G10 Macro Rates Fund of which USD 2,015 (31 December 2022: USD 5,066) remain payable at the financial year end.

Each Director is entitled to remuneration for services as the Company may determine. James Davidson waived his rights to fees during the financial year. The Directors' fees paid and payable are detailed in Note 8.

The impact of the above cross-investment transactions has been eliminated from the total column for the umbrella fund in the Statement of Financial Position, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and Statement of Comprehensive Income.

Connected Party Transactions

Regulation 43(1) of the Central Bank UCITS Regulations states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length, and b) in the best interest of the unit–holders of the UCITS".

The Directors are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected party and all transactions with connected parties that were entered into during the period to which the report relates, complied with the obligations that are prescribed by Regulation 43(1).

12. DIVIDENDS

It is not the intention of the Directors to declare any dividends on any Share Classes for the Multi-Asset range of Funds. The net investment income on the Funds' investments attributable to Shares is expected to be retained by the Funds, which will result in an increase in the NAV per Share. It is anticipated that the dVAM Global Equity Growth Fund can make distributions half yearly and the Pacific North of South EM All Cap Equity can make distributions quarterly. Any such distributions will be paid from the net income.

For the financial year ended 31 December 2023

12. DIVIDENDS (continued)

During the financial year ended 31 December 2023 Pacific North of South EM All Cap Equity Fund declared a dividend of USD 23,341,148 (2022: 15,944,761), dVAM Global Equity Income PCP Fund declared a dividend of USD 7,743,183 (December 2022: 9,115,252) and Pacific North of South EM Equity Income Opportunities Fund declared a dividend of USD 3,082,924 (December 2022: 1,538,228). Article 6 Sub Funds

Sustainable Finance Disclosure Regulation (in fund specific part)

This Fund integrates sustainability risks but does not promote ESG characteristics or has a sustainable investment objective according to the Sustainable Finance Disclosure Regulation (SFDR).

EU Taxonomy (in general part)

The EU Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. As at the date hereof, the only such objectives are climate change mitigation and adaptation (the "Climate Objectives").

The EU Taxonomy Regulation also requires disclosure regarding how and to what extent the investments of each Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria. Investors should note with respect to Funds that do not promote ESG characteristics or have a sustainable investment objective, the investments underlying the Funds do not take into account the EU criteria for environmentally sustainable economic activities.

Article 8 Sub Funds

Sustainable Finance Disclosure Regulation (in fund specific part)

This Fund promotes ESG characteristics as stated in the Sustainable Finance Disclosure Regulation (SDFR). The Fund Manager can confirm that the environmental and social characteristics as stated in the fund documentation have been implemented and have been complied with.

EU Taxonomy Regulation (in general part)

The EU Taxonomy Regulation establishes criteria for determining whether an economic activity qualifies as environmentally sustainable in the context of particular environmental objectives. As at the date hereof, the only such objectives are climate change mitigation and adaptation (the "Climate Objectives").

The EU Taxonomy Regulation also requires disclosure regarding how and to what extent the investments of each Fund are in economic activities that qualify as environmentally sustainable pursuant to those criteria.

For each Fund that promotes ESG characteristics, the investment policy, as set out in the relevant Supplement and/or fund specifications, describes how the relevant Fund promotes ESG characteristics through, amongst other things, consideration of a wide range of environmental characteristics, including the Climate Objectives.

^{**}Launched on 11 October 2023.

For the financial year ended 31 December 2023

Sustainable Finance Disclosure Regulation & Taxonomy Regulation (continued)

EU Taxonomy Regulation (in general part) (continued)

In order for an investment to qualify as environmentally sustainable as at the date hereof, it must meet a number of different criteria, including that it contributes substantially to a Climate Objective, as measured according to the technical screening criteria set out in the EU Taxonomy Regulation, and that it must not significantly harm any of the other environmental objectives set out in the EU Taxonomy Regulation.

The technical screening criteria are very detailed and require the availability of multiple, specific data points regarding each investment. As at the date hereof, there is insufficient data available to be able to assess investments using the technical screening criteria. As such, the Fund is not in a position to describe: (a) the extent to which the investments of the Fund are in economic activities that qualify as environmentally sustainable pursuant to the technical screening criteria; (b) the proportion, as a percentage of the portfolio as a whole, of investments in environmentally sustainable economic activities; or (c) the proportion, as a percentage of the portfolio as a whole, of enabling and transitional activities (as such are described in the EU Taxonomy Regulation). Therefore, the Fund Manager considers that the most prudent course of action, at present, is to disclose that 0% of such Funds' investments are in environmentally sustainable economic activities for the purposes of the EU Taxonomy Regulation.

The "do no significant harm" principle referred to above applies only to those investments underlying the relevant Fund that take into account the EU criteria for environmentally sustainable economic activities; investors should note that at present none of the relevant Funds take into account the EU criteria for environmentally sustainable economic activities.

The Fund Manager is keeping this situation under active review and where sufficient reliable, timely and verifiable data on the investment becomes available, it will re-evaluate its approach to the EU Taxonomy Regulation and relevant documentation will be updated.

Appendix I Remuneration Disclosure (Unaudited)

For the financial year ended 31 December 2023

The Manager has designed and implemented a remuneration policy (the "Policy") in line with the provisions of S.I. 257 of 2013 European Union (Alternative Investment Fund Managers) Regulations 2013 (the "AIFM Regulations"), S.I. 352 of 2011 European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and of the ESMA Guidelines on sound remuneration policies under the UCITS Directive and AIFMD (the "ESMA Guidelines"). The Policy is designed to ensure that the remuneration of key decision makers is aligned with the management of short and long-term risks, including the oversight and where appropriate the management of sustainability risks in line with the Sustainable Finance Disclosure Regulations.

The Manager's remuneration policy applies to its identified staff whose professional activities might have a material impact on the Company's risk profile and so covers senior management, risk takers, control functions and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers and whose professional activities have a material impact on the risk profile of the Company. The Manager's policy is to pay identified staff a fixed component with the potential for identified staff to receive a variable component. It is intended that the fixed component will represent a sufficiently high proportion of the total remuneration of the individual to allow the Manager to operate a fully flexible policy, with the possibility of not paying any variable component. When the Manager pays a variable component as performance related pay certain criteria, as set out in the Manager's remuneration policy, must be adhered to. The various remuneration components are combined to ensure an appropriate and balanced remuneration package that reflects the relevant staff rank and professional activity as well as best market practice. The Manager's remuneration policy is consistent with, and promotes, sound and effective risk management and does not encourage risktaking which is inconsistent with the risk profile of the funds it manages.

These disclosures are made in respect of the remuneration policies of the Manager. The disclosures are made in accordance with the ESMA Guidelines.

Total remuneration (in EUR) paid to the identified staff of the Manager fully or partly involved in the activities of the Company that have a material impact on the Company's risk profile during the financial year to 31 December 2023 (the Manager's financial year):

| Fixed remuneration | EUR |
|-------------------------|-----------|
| Senior Management | 1,578,804 |
| Other identified staff | - |
| Variable remuneration | |
| Senior Management | 28,006 |
| Other identified staff | - |
| Total remuneration paid | 1,606,810 |

No of identified staff - 17

Neither the Manager nor the ICAV pays any fixed or variable remuneration to identified staff of the Investment Manager.

On 29 September 2023, KBA Consulting Management Limited, the Manager of the Company, completed its merger with Waystone Management Company (IE) Limited ("WMC"). WMC is the surviving entity post-merger and as such, the Company's Manager is WMC from this date and the above remuneration figures are the total remuneration for WMC.

There have been no material changes made to the Remuneration Policy or the Manager's remuneration practices and procedures during the financial year.

Pacific Capital UCITS Funds plc

Securities Financing Transactions Regulation Disclosures ("SFTR") (unaudited)

The following disclosure follows the requirements of EU Securities Financing Transactions Regulation ("SFTR") which came into effect on 12 January 2016.

A Securities Financing Transaction ("SFT") is defined as per Article 3(11) of the SFTR as:

- A repurchase transaction;
- Securities or commodities lending and securities or commodities borrowing;
- A buy-sell back transaction or sell-buy back transaction; or
- A margin lending transaction.

The Sub-Fund was engaged in securities lending transactions during the financial year ended 31 December 2023 (31 December 2022: None). In addition, SFTs that meet the above definition were held by the Sub-Fund as at 31 December 2023 (31 December 2022: None).

There were securities and commodities on loan as a proportion of total lendable assets (excluding cash and cash equivalents) as at 31 December 2023 (31 December 2022: None).

In accordance with Article 13 of the Regulation, the Fund's involvement in and exposures related to repurchase transactions and Total Return Swaps for the year ended 31 December 2023 are detailed below:

| Global Data | | | | | |
|---------------------------------|--------------------|-------------------------|--------------------------------------|-------------------------|----------|

`ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: dVAM Diversified Liquid Alternatives PCP Legal entity identifier: 213800WH8KO5AVV6DP92

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do with an environmental objective in not qualify as environmentally economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: ___%

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Taxonomy or not.

Fulcrum Asset Management LLP ("Fulcrum", the "Investment Manager or "we") considers the environmental and social characteristics promoted by dVAM Diversified Liquid Alternatives PCP ("the Fund") have been met in the calendar year 2023. Further details in relation to the implementation of the investment strategy and the degree of alignment of the Fund with the environmental and social characteristics promoted by the Fund are set out hereunder.

In making investments on behalf of the Fund, Fulcrum seeks to invest, directly or indirectly through underlying funds managed by a professional investment adviser (each an "**Underlying Fund**") in companies that have good corporate sustainability practices in place, treat employees fairly and have good governance. In particular, the Fund seeks to promote environmental characteristics relating to the goals of climate change mitigation and adaption, the sustainable use and protection of water and marine resources and the transition to a circular economy. The Fund is also committed to investing in organisations and initiatives focusing on creating sustainable financial markets. The Fund is not managed to a reference benchmark.

In implementing its investment strategy, the Investment Manager has engaged with the managers of the relevant Underlying Funds on their corporate governance practice, commitments to the Net Zero Asset Managers initiative and other matters set out herein.

How did the sustainability indicators perform?

The Fund may invest directly in target assets or through Underlying Funds (with investment through underlying funds being between 50% and 90% of the net asset value of the Fund at any time).

The Fund's weighted average environmental, social and governance ("**ESG**") score on a scale of one to four (where one represents a poor score and four represents a leading score) using Fulcrum's proprietary scoring framework (the "**Framework**") was 2.6 out of a total possible score of 4.0, with individual scores of Underlying Funds ranging from 1.5 to 3.8.

There has been no significant change in the average sustainability score of the portfolio compared to the prior year. No investments were made in new strategies with an average sustainability score of '1'. The listed Real Asset investments in the portfolio have the highest average scores (above 3), whereas the Diversifiers layer in the portfolio had the lowest, although the average score for these investments was still above 2.

During 2023, Fulcrum spent time engaging with the managers of Underlying Funds on ways in which they may improve their sustainability score in the future. This included topics such as climate change, their overall approach to ESG integration as a business and sharing best practices. Fulcrum has been pleased with the response of the managers and their willingness to listen and collaborate on the engagement plans.

As a more general reminder, Fulcrum's application of the Framework has contributed to sustainable investments by reviewing the following four areas for each Underlying Fund, as set forth in more detail in the Fund's Supplement dated 28 September 2023 to the Prospectus of Pacific Capital UCITS Funds plc, ensuring a degree of consideration to sustainability when Third-Party Sub-Advisers manage their share of the Fund's investments:

- 1) The manager's approach and mandate design
- 2) The fund's asset allocation and portfolio construction

- 3) The manager's security selection and implementation
- 4) The manager's asset class specific considerations

This process results in the following key benefits:

- It prompts a proactive search for investment opportunities with positive scoring sustainability characteristics (e.g. clean energy and recycling companies, or third-party managers who themselves have strong sustainability characteristics); and
- It provides a very clear audit trail for marginal decisions, where the sustainability scores can be very influential.

Fulcrum will also assess carbon metrics when investing in companies and Underlying Funds. In this context, the focus is on greenhouse gas emissions and, as a metric for this, Fulcrum has applied the Fund's Weighted Average Carbon Intensity ("WACI", a measure of carbon emissions having regard to revenues) to measure and disclose the carbon intensity of the Fund's investments. We believe this is currently most appropriate metric given that the availability of sustainability investment-level data is still developing. Whilst all metrics have inherent limitations, we note that the Taskforce on Climate-Related Financial Disclosures has recommended asset managers to use WACI as a core metric to disclose in its 2017 final report.

As at the date of this report, the WACI figure for the portfolio was 206 tons CO2 per \$m sales. This represents a decrease compared to the previous year, which was 317 tons CO2 per \$m sales. Fulcrum's analysis suggests that the WACI of the Fund would have decreased further, i.e. 174 were they to have made no changes to the asset allocation (methodology: assume 2022 portfolio weights and 2023 Underlying Fund's WACI).

The coverage ratio for the portfolio was 71% by portfolio weight and 68% by number of managers. Fulcrum continues to work on the Underlying Funds that are not currently providing WACI data, but this generally relates to strategies where WACI is harder to measure (i.e. Diversifiers).

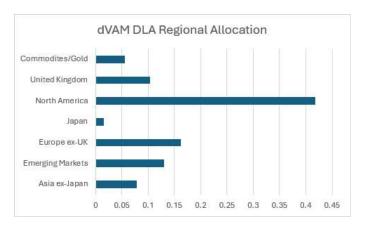

The three key reasons for the decrease in WACI can be attributed to:

- 1. More coverage in actual data: WACI data from managers, especially from our Diversifiers, is lower than the proxy data that Fulcrum has historically used. Fulcrum is more conservative in its proxy data selection.
- 2. Impact of underlying holdings: Three of our managers have had a significant reduction in their WACI as a result of divesting from high emitting corporates (equity & bonds) and sovereign bonds. It is important to note that WACI is highly dependent on the underlying holdings rather than an accurate indicator of real-world carbon reduction, therefore we may have a higher WACI next year.

3. Generally, the data given by corporates used to calculate WACI has been lower at an industry level, while this may be a sign of progress and decarbonisation, we assume that it could also be due to a use of carbon offsets.

In assessing Underlying Funds, Fulcrum seeks to achieve diversity across the Fund in terms of the location, gender diversity, experience, decision making and resources of the management team and investment professionals of the relevant Underlying Funds.

The portfolios geographic exposure (see below) is similar to that of global equities, albeit with a slight overweight to UK assets.

Five of the underlying managers have lead female fund managers out of a total of 32. The location of the underlying managers is highly diversified, with managers based across North America (12), Europe (16), Asia (1) and Australia (3). There are also a wide variety of different investment styles (i.e. value, growth, quality etc) and investment decision making styles (82% discretionary, 18% quantitative).

On a full look-through basis, The Fund's exposure to companies generating significant revenues from certain sectors will be limited. The list of excluded sectors as at the date of this document includes but is not limited to tobacco, controversial weapons and predatory lending. Investments in companies that have a record of poor-quality governance practices and systematic breaches of environmental and social standards that are expected to continue are not acceptable as they pose uncontrollable risks to long-term investment performance.

There was no direct exposure to any of the excluded sectors as at December 31st 2023. On a full lookthrough basis, any indirect exposure to such sectors was below the frictional tolerance level that Fulcrum has in place for Underlying Funds. This was monitored as part of Fulcrum's ongoing annual operational due diligence questionnaire process.

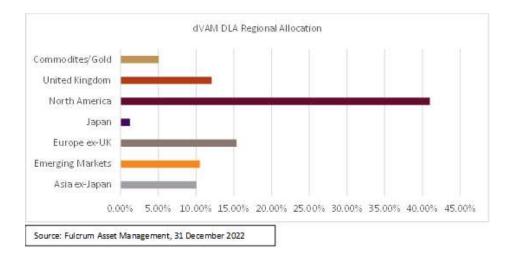

...and compared to previous periods?

As of end December 2022, the WACI figure for the portfolio was 317 tons CO2 per \$m sales. This represents a slight increase compared to the previous year. The key reason for the increase relates to slight shifts in the asset allocation (i.e. small increases in exposure to Underlying Funds specialising in Emerging Markets).

Fulcrum's analysis suggests that the WACI of the Fund would have actually decreased were they to have made no changes to the asset allocation. The coverage ratio for the portfolio was 47% by portfolio weight and 60% by number of managers. Fulcrum continues to work on the Underlying Funds that are not currently providing WACI data, but this generally relates to strategies where WACI is harder to measure.

In assessing Underlying Funds, Fulcrum seeks to achieve diversity across the Fund in terms of the location, gender diversity, experience, decision making and resources of the management team and investment professionals of the relevant Underlying Funds.

The portfolios geographic exposure (see below) is similar to that of global equities, albeit with a slight overweight to UK assets.

Four of the underlying managers had lead female fund managers out of a total of 25. The location of the underlying managers was highly diversified, with managers based across North America (10), Europe (9), Asia (3) and Australia (3). There are also a wide variety of different investment styles (i.e. value, growth, quality etc) and investment decision making styles (80% discretionary, 20% quantitative).

There was no direct exposure to any of the excluded sectors as at December 31st 2022. On a full lookthrough basis, any indirect exposure to such sectors was below the frictional tolerance level that Fulcrum has in place for Underlying Funds. This was monitored as part of Fulcrum's ongoing annual operational due diligence questionnaire process.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Not applicable. While the Fund promotes environmental and social characteristics as outlined above, the Fund does not commit to any sustainable investments as defined in Article 2(17) of SFDR.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager has mainly taken indicators for adverse impacts on sustainability factors into account by applying the Framework, including an evaluation of each Third-Party Sub-Adviser's use of indicators for adverse impacts on sustainability factors.

Fulcrum considers 18 mandatory indicators when investing into companies, sovereigns, real estate assets and other types of assets (as applicable). Furthermore, we have chosen two additional principal adverse indicators ("**PAI**"), when investing into companies, relating to the lack of a deforestation policy, and the number of identified cases of severe human rights issues and incidents.

Fulcrum's full "Statement on Principal Adverse Impacts of Investment Decisions on Sustainability Factors" for the calendar year 2023 can be found at https://www.fulcrumasset.com/inst/uk/en/important-information/

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

What were the top investments of this financial product?

| Largest Investments | Sector | % Assets | Country |
|---|----------------------------|----------|------------|
| BlueBay Impact Aligned | High Yield Bonds | 5.1% | Luxembourg |
| Barings Global Senior Secured Bond | Senior Secured Loans | 4.7% | Ireland |
| Sky Harbor Short Duration | High Yield Bonds | 4.7% | Luxembourg |
| Redwheel Sustainable Convertible | Sustainable Convertibles | 4.0% | Luxembourg |
| PGIM Emerging Markets Debt Local Currency | Emerging Markets Debt | 3.7% | Ireland |
| Kite Lake Event Driven | Event Driven | 3.5% | Ireland |
| PGIM Emerging Markets Debt Total Return | Emerging Markets Debt | 3.5% | Ireland |
| Resolution Global Property | REITs | 3.3% | Ireland |
| Redwheel Global Convertibles | Global Convertibles | 3.2% | Luxembourg |
| Fulcrum FX Volatility | Currencies | 3.1% | N/A |

| MSIM Global Mortgage Securitised | Mortgage Backed Securities | 3.0% | Luxembourg |
| Man GLG UK Absolute Alpha | Equity Long/Short | 2.8% | UK |
| Marshall Wace Systematic Alpha | Equity Long/Short | 2.6% | Ireland |
| Fulcrum Commercial REITs | REITs | 2.5% | N/A |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31st December 2023

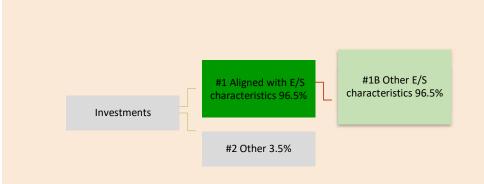

The figures above represent the average holdings for the full year 2023. Fulcrum FX Volatility and Fulcrum Commercial REITs are investments made directly, not via a fund, therefore the country of domicile does not apply.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

DVAM Asset Allocation

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

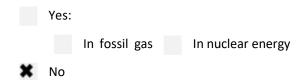

Transitional activities are

activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. Taxonomy-aligned activities are expressed as a share of:

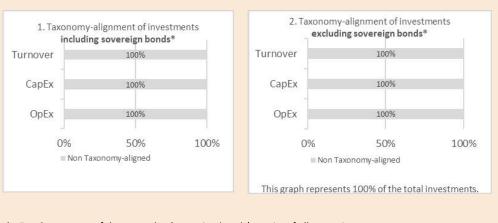

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments made
 by investee
 companies, e.g. for
 a transition to a
 green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
 - What was the share of investments made in transitional and enabling activities?

As the Fund does not commit to make investments which are aligned with the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

These investments included uninvested cash, investments which did not promote any of the Fund's characteristics or which are which are used for efficient portfolio management, hedging or liquidity management purposes. There were no specific environmental or social safeguards applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Engagement with managers of Underlying Funds

As stated under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" Fulcrum has engaged with the Underlying Funds with specific engagement plans developed for each manager. The proprietary scores (1-4) were updated following the assessments taken over the year and key topics including biodiversity, Diversity, Equity & Inclusion (DEI) and exclusion lists were discussed and challenged on a consistent basis.

Proxy voting

Fulcrum has applied its proxy voting policy that is designed to hold companies to account for their sustainability performance. Fulcrum uses Glass Lewis, a leading independent corporate governance research provider, to analyse corporate actions, management recommendations and make vote recommendations in order to assist the Firm in the independent assessment of governance issues. Fulcrum has voted with the independent research recommendations unless it chooses to override this based on its own analysis. For more information on the Proxy Voting Policy please see

https://www.fulcrumasset.com/uploads/2022/10/73594ab77d38fd25f05042676 f2a5b2b/proxy-voting-policy.pdf?v=1668164912

Principal adverse impacts

In 2022 we have laid the foundation for a more quantitative and systematic approach to measuring and managing PAIs, with the onboarding of the Sustainalytics dataset, which will form the basis of future reporting and potential key performance indicators. For more detailed information about our work on PAIs, for the calendar year 2023 can be found at

https://www.fulcrumasset.com/inst/uk/en/important-information/

How did this financial product perform compared to the reference benchmark?

There is no index designated as a reference benchmark to determine whether this Fund is aligned with the environmental and/or social characteristics that it promotes

- How does the reference benchmark differ from a broad market index?
 N/A
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
 N/A
- How did this financial product perform compared with the broad market index?`
 N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Pacific Multi-Asset Sustainable - Balanced Fund

Legal entity identifier: 213800CP8VOALNPLEZ33

Environmental and/or social characteristics

| Did this financial product have a sustain | nable investment objective? |
|---|---|
| • • Yes | ● |
| ☐ It made sustainable investments with an environmental objective:% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | □ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments □ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy □ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy □ with a social objective |
| ☐ It made sustainable investments with a social objective:% | ☑ It promoted E/S characteristics, but did not make any sustainable investments |

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund seeks to promote both environmental & social characteristics.

94.3% of the Fund's holdings were aligned with E/S characteristics. All the Fund's holdings excluding cash, met at least one or more of the Sustainable Criteria investment styles laid out in the Global Sustainable Investment Alliance outlined below and direct investments in sovereign bonds scored an above average on the ESGP rating. All investments underwent PAI, ESG and revenue exposure analysis where data was available to further ensure underlying holdings were aligned with E/S characteristics.

The following list are environmental characteristics promoted by the fund:

- o climate change mitigation
- o renewable energy
- o clean technologies
- o battery solutions
- o clean water
- o recycling & water treatment
- o biodiversity

The following list are social characteristics promoted by the fund:

- o improving board diversity
- o reducing gender pay gap
- o improving senior female management representation
- o extending human lifespan
- o access to healthcare
- o social housing
- o education
- drug discovery

The Fund is a fund of funds and seeks to achieve its investment objective by investing principally in underlying funds, including open-ended exchange traded funds. The Fund scores each Underlying Funds against the Global Sustainable Investment Alliance's seven 'types' of sustainable investment as set out in the table below (the "Sustainable Criteria investment styles").

All underlying funds met at least one of the Sustainable Criteria investment styles outlined below.

| Style Name | Description |
|------------------------------------|---|
| Negative / Exclusionary Screening | The exclusion from an Underlying Fund of certain sectors, companies or practices based on specific criteria related to environmental social or governance ("ESG") factors such as entities with exposure to tobacco, armaments, thermal coal, animal testing or other factors which are detrimental to ESG goals. |
| Positive / Best in Class Screening | Investment in sectors, companies or projects selected for positive ESG performance relative to industry peers. |
| Norms Based Screening | Screening of investments against minimum standards of business practice based on international norms, such as those issued by the Organisation for Economic Co-operation and Development; International Labor Organization, the United Nations and UNICEF. |
| ESG Integration | The systematic and explicit inclusion by investment managers of ESG factors into financial analysis. |
| Sustainability Themed Investing | Investment in themes or assets specifically related to sustainability (such as clean energy, green technology or sustainable agriculture). |
| Impact / Community Investing | Targeted investments aimed at solving social or environmental problems where capital is specifically directed to underserved individuals or communities, as well as financing that is provided to businesses with a clear social or environmental purpose. |
| Stewardship and Voting | The use of shareholder power to influence corporate behaviour, including through direct corporate engagement (i.e., communicating with senior management and/or boards of companies), filing or co-filing shareholder proposals, and proxy voting that is guided by comprehensive ESG guidelines. |

The investment team conducted regular meetings with fund management teams enabling a deeper understanding of their sustainability credentials, the quality of its management team and competitiveness of its products and services. The investment team also leveraged external research to complement its own fundamental research and analysis.

Although the Fund does not have a sustainable investment objective and does not commit to invest a minimum percentage in "sustainable investments" within the meaning of Article 2(17) of SFDR, certain principal adverse indicators ("PAIs") were used as a proxy to measure and test the environmental and social characteristics of the investments within Underlying Funds. Specifically, carbon emissions (Scope 1, 2 & 3), carbon intensity & board diversity PAIs were used to calculate fund and company scores to measure and test how they performed regarding environmental and social characteristics. These PAIs enabled the Fund to analyse the potential negative impact of underlying investments on the environment and society.

Additionally, the Investment Manager considered Sustainable Accounting Standards Board ("SASB") Scores provided by TruValue Labs, a third party data service provider which analyses various publicly available sources to assess ESG risks and opportunities against 26 ESG categories as defined by the SASB, along with an overall score and a volume score. This SASB data feed covers 19,000+ companies with more than 12 years of history and assisted in providing coverage for the Fund's investments. Where data was lacking,

the Investment Manager used supplemental data or industry averages where possible to get a greater understanding of an investment's environmental or social characteristics.

For sovereign and supranational bonds (whether direct or indirectly invested in), environmental and social characteristics were measured using a ESGP (Environmental, Social, Governance & Political) score calculated by collecting data from the World Bank and Freedom House. The ESGP score is an average of the E, S, G & P score (shown below). The E score was calculated by averaging normalised E1, E2 and E3 scores, the S score was calculated by averaging normalised S1, S2 and S3 scores & the G Score was calculated by averaging normalised G1, G2 and G3 scores (raw data is collected from the World Bank). The Global Freedom Score was calculated by Freedom House which rates countries across 13 factors, looking at factors such as the rule of law, political freedoms and freedom of expression. A country's carbon intensity (tonnes of Co2 utilised to produce \$1,000 of GDP) was used to measure how individual countries rank from an environmental perspective compared to their global peers. All direct sovereign investments had an above average ESGP score.

| | | Metrics used to calculate Sovereign bond ESGP Score |
|---|----|--|
| E | E1 | CO2 emissions (metric tons per capita) |
| | E2 | PM2.5 air pollution, mean annual exposure (micrograms per cubic meter) |
| | E3 | Terrestrial and marine protected areas (% of total territorial area) |
| S | S1 | Individuals using the Internet (% of population) |
| | S2 | Mortality rate, under-5 (per 1,000 live births) |
| | S3 | Proportion of seats held by women in national parliaments (%) |
| G | G1 | Control of Corruption: Estimate |
| | G2 | Strength of legal rights index (0=weak to 12=strong) |
| | G3 | Rule of Law: Estimate |
| P | Р | Global Freedom |

How did the sustainability indicators perform?

All underlying funds met at least one or more of the Sustainable Criteria investment styles laid out in the Global Sustainable Investment Alliance outlined above.

As noted above, the Fund has regard to certain PAIs as a proxy to measure and test the environmental and social characteristics of the investments within the Fund and specifically will assess carbon emissions (Scope 1, 2 & 3), carbon intensity and board diversity PAIs to measure the potential negative impact of underlying investments on the environment and society. Below we have calculated the Sustainable Balanced Fund's weighted average Percentage of Female Executive and Directors, PAI Carbon Intensity Scope 1, 2 & 3 EUR score & Total Carbon Emissions Scope 1, 2 & 3 score.

On a lookthrough basis, the portfolio has PAI data covering 61% of underlying investments. To assess the portfolio's environmental characteristics, we measured the portfolio's quarterly weighted average PAI Carbon Intensity Scope 1, 2 & 3 EUR and PAI Total Carbon Emissions Scope 1, 2 & 3 scores. The portfolio's PAI Carbon Intensity Scope 1, 2 & 3 EUR was 457 tonnes CO2 per EURm and the portfolio's PAI Total Carbon Emissions Scope 1, 2 & 3 was 10,345,947 tonnes.

An investment's percentage of Female Executive and Directors helped assess whether investments were promoting the social characteristic of gender diversity within the workplace related to the Board Diversity PAI. The portfolio exhibited a Percentage of Female Executives and Directors of 31.8%.

Given the multi-asset nature of the portfolio, only 61% of the portfolio had sufficient data to calculate relevant PAI sustainable indicators, therefore the current calculations are incomplete and based upon best available data. However, we expect this to improve as more companies supply data providers with more extensive sustainable data. Additionally, there is often a lag with the lookthrough holdings data that underlying fund managers provide data providers. Data has been drawn from Morningstar and scores have been calculated on a lookthrough basis.

The portfolio's ESG Score for underlying funds derived from quarterly TruValue Labs SASB Category company scores was 57.4. A score above 50 is positive and below 50 is negative. Note that investment TruValue Labs ESG scores can range from 0 (worst score) to 100 (best score), however as at end December 2023 the ESG company scores of the total universe of companies above \$1bn market cap ranged from 32-79. The majority of company scores are clustered between 40-60 so a 1 point rise in score is significant. There are cases where a company has a low score due to legacy or current issues, however if the manager sees or expects improvement in the relevant SASB areas, that is seen as a positive in the investment case and could be an opportunity to help drive change.

14.6% of the Fund's portfolio was held in sovereign bonds throughout 2023 on average. The Sovereign ESGP Score for the portfolio was 70.5 showing that the portfolio's sovereign exposure was invested in above average ESGP sovereigns. All direct sovereign investments had an ESGP score above 67. ESGP scores are within a range of 0 (worst score) to 100 (best score) and the average country/sovereign will have a score of 50.

The total portfolio ESG score, calculated by combining ESG SASB Scores for underlying funds and ESGP scores for direct Sovereign investments was 59.9. There were no direct equity investments, therefore our internal proprietary scoring system to ensure direct equity investments meet the minimum criteria was not required.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

...and compared to previous periods?

In the previous reporting period in December 2022, the portfolio had sufficient data covering 51% of underlying investments compared to 61% coverage throughout 2023. Portfolio scores for 2023 shown in the table below were calculated using a quarterly average.

December 2022 vs quarterly average 2023 sustainable indicators for the Pacific Multi Asset Sustainable – Balanced Fund:

| | December 2022 | 2023 Quarterly Average |
|--|---------------|---------------------------|
| Percentage of Female Executive & Directors | 30.5% | 31.8% |
| PAI Carbon Intensity Scope 1, 2 & 3 EUR (tonnes Co2 per EURm) | 571 | 457 |
| PAI Total Carbon Emissions Scope 1, 2 & 3 (tonnes Co2) | 5,310,064 | 10,345,947 |
| TruValue ESG Score | 56 | 57.4 |
| Total Portfolio ESG Score (TruValue + Sovereign) | 59.2 | 59.9 |

The increase in PAI Total Carbon Emissions Scope 1, 2 & 3 was primarily due to a significant increase in allocation to the US Equity market and larger cap ETFs throughout 2023. The US Equity market is where the largest market capitalisation companies in the world are listed, and these mega cap companies tend to have high carbon scope 1, 2 & 3 emissions due to their size. Another factor impacting the scores was the continuous improvement in data coverage as mentioned above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Mandatory and additional PAI indicators were calculated for the Fund, however many of these PAIs still lack the coverage required to be useful measurements. See above the selected mandatory PAIs calculated for the fund to assess the impact on sustainability factors.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is the average weight over 2023 calendar year.

| Largest investments | Sub Asset Class | Country of Domicile | % Assets |
|-------------------------------------|--------------------------------|----------------------|----------|

The holdings above are an average weight over 2023 calendar year.

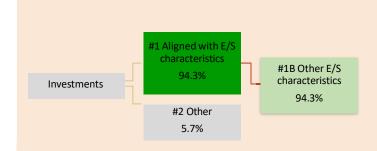

What was the proportion of sustainability-related investments?

The table below sets out details of the sustainability related investments within the portfolio using a quarterly average throughout 2023.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Assets |
|--------|
| 17.2% |
| 13.6% |
| 10.8% |
| 10.1% |
| 7.7% |
| 6.0% |
| 5.7% |
| 5.4% |
| 3.8% |
| 3.7% |
| 3.7% |
| 3.4% |
| 2.4% |
| 0.7% |
| |

The sectors above are an average weight over 2023 calendar year.

0.55% of the portfolio's underlying equity investments derived revenue from subsectors exposed to the mining sector. This exposure was from underlying companies that had

exposure to precious metals required for a transition to a green economy.

0.94% of the portfolio's underlying equity investments derived revenue from subsectors exposed to the fossil fuel sector.

To derive these revenue exposures the team underwent a granular quantitative analysis of every underlying company's revenue exposure to over 1500 different subindustries. Each subindustry was assigned to a theme or sector (a subindustry could be assigned to multiple themes). Many subindustries may be related to mining or fossil fuels, however may be indirect in nature.

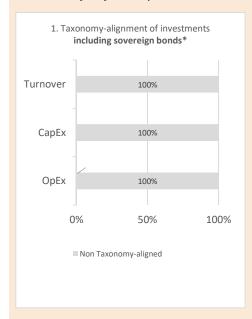

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

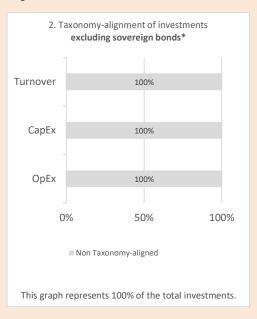

0% of the portfolio was aligned to the EU Taxonomy. The Fund does not commit to investment in Taxonomy aligned investments and none of the Fund's holdings during the reference period were so aligned.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| ☐ Yes | :: | |
|-------|-----------------|---------------------|
| | ☐ In fossil gas | ☐ In nuclear energy |
| ⊠ No | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

- What was the share of investments made in transitional and enabling activities?

 As the Fund has not committed to make investments which are aligned with the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was 0%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What was the share of socially sustainable investments? Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments that were difficult to categorise such as cash and other liquid ancillary assets or investments for hedging or efficient portfolio management purposes were placed in "#2 Other" and they were there to assist in achieving the financial long-term goals of the financial product. There was no minimum environmental or social safeguards in respect of these assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

As part of the monitoring process of underlying fund managers, the investment team engaged with the underlying fund managers, particularly when a potential issue had come to the team's attention. Each engagement was logged in the engagement log. Details such as the date of the engagement, the reason for the query and any comments from the fund management team were all documented.

Examples of the team engaging with underlying fund managers include:

- a request for the manager's view and actions regarding an underlying investment developing additional fossil fuel project exposure
- a request for the manager's view and actions regarding an underlying investment insuring fossil fuel expansion
- a request to encourage an underlying company to lead the way in improving the human rights of its employees

Pacific Asset Management utilised ESG and PAI data from FactSet and Morningstar to obtain lookthrough data for each underlying fund in order to assess each underlying manager's environmental and/or social characteristics from an objective bottom up view. The data analysis is extensive including fund & company mandatory PAIs, additional PAIs, ESG scores and revenue exposures to environmental factors & social factors. The team used this data to assess each underlying manager's ESG credentials.

How did this financial product perform compared to the reference benchmark?

ANNFX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Pacific Longevity and Social Change Fund

Legal entity identifier: 213800LPV4GVQWFRDS98

Environmental and/or social characteristics

| Did this financial product have a sustain | nable investment objective? |
|---|---|
| • • Yes | ● ○ |
| ☐ It made sustainable investments with an environmental objective:% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | □ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments □ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy □ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy □ with a social objective |
| ☐ It made sustainable investments with a social objective:% | ☑ It promoted E/S characteristics, but did not make any sustainable investments |

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Pacific Longevity and Social Change Fund (the "Fund") seeks to promote social characteristics.

98% of the Fund's holdings satisfied one or more of the characteristics discussed below.

The Fund seeks to deliver positive returns for investors while promoting positive social development by channeling investment to companies or undertakings which either (a) contribute in some way to longer life-spans, whether by way of developing health-care products or treatments which can help combat disease or prolong life-spans, products which contribute to a healthy life-style or generally provide products or services that promote longer and healthier lives or (b) do not directly contribute to longer life-spans but whose products or services contribute to or enhance the quality of life for older generations (for example entities in such areas as healthcare, education, finance or leisure, whose products or services will contribute in some way to physical or emotional well-being of older generations).

The following list are the social characteristics promoted by the Fund:

- extending human life expectancy;
- enhance quality of life / well-being;
- providing capital to accelerate the discovery of life saving drugs and treatments;
- access to health services;
- improving education;
- improving board diversity;
- improving senior female management representation;
- ensuring decent work; and
- improving employee rights.

The investment strategy of the Fund is to deliver long term capital growth through investing primarily in equities and equity-related instruments issued by companies linked to the ageing of the population and increasing life expectancy worldwide. The Fund implemented its strategy over the period by taking exposure to the investment themes summarised below and described in greater detail in the "Investment Policy" section of the Supplement.

1. Education & Wellbeing

The Fund allocated capital to products or services which promoted healthy behaviour through more active lifestyles and balanced nutrition, companies which help improve life expectancy through vaccines or diagnostic screening and to development of products and

services which support quality of life in the form of (but not limited to) dental, vision, hearing and security.

2. Longevity Consumer

The Fund invested in companies which offer products and services that address the needs of people over the age of 60, such as travel, leisure, beauty, financial planning / wealth management, companionship and home improvement sectors.

3. Healthcare

The Fund promoted investment in companies which develop or support the healthcare needs of the elderly, including medical devices, regenerative medicine, digital healthcare, home-based care and wearable monitoring equipment care providers to predict and prevent adverse health events.

4. Later Living

The Fund promoted investment in companies that cater to the needs of an expanding elderly population in areas such as infrastructure (senior housing/care facilities), human capital (physicians/nurses) or support services (health insurance/funeral services).

As part of the investment process, the investment team applied exclusionary ESG criteria relevant to the above longevity themes, resulting in the exclusion of certain industries from the investable universe that reduce lifespans or health span such as defence and weapons production, tobacco or companies engaged in the production of alcohol as well as environmental factors such as energy, iron and steel production, mining for coal and gas.

Although the Fund does not have a sustainable investment objective and does not commit to invest a minimum percentage in "sustainable investments" within the meaning of Article 2(17) of SFDR, certain principal adverse indicators ("PAIs") were used as a proxy to measure and test the environmental and social characteristics of the investments within the Fund. Specifically, carbon emissions (Scope 1, 2 & 3), carbon intensity & board diversity PAIs were used to calculate fund and company scores to measure and test how they are performing regarding environmental and social characteristics. These PAIs enabled the Fund to analyse the impact of underlying investments on the environment and society.

Additionally, the Investment Manager considers Sustainable Accounting Standards Board ("SASB") Scores provided by TruValue Labs, a third party data service provider which analyses various publicly available sources to assess ESG risks and opportunities against 26 ESG categories as defined by the SASB, along with an overall score and a volume score. This SASB data feed covers 19,000+ companies with more than 12 years of history and assists in providing coverage for the Fund's investments. Where data is lacking, the Investment Manager used supplemental data or industry averages to get a greater understanding of an investment's environmental or social characteristics.

How did the sustainability indicators perform?

The portfolio's ESG Score derived from quarterly TruValue Labs SASB Category Scores throughout 2023 was 56.1 while iShares MSCI ACWI ETF ESG Score was 56.3. The portfolio's Social Score derived from Socially related SASB Category Scores was 55.3 while iShares MSCI ACWI Social Score was 52.9. The Fund's Social Score is a subset of the ESG Score. A Score above 50 is positive and below 50 is negative. The Scores allocated to individual investments were regularly assessed and used to engage with the relevant issuer. There are cases where an issuer had a low SASB Score due to legacy or current issues, however if the manager saw or expects improvement in the relevant SASB areas, that is seen as a positive in terms of the sustainability investment case and is seen as an opportunity to help drive change. Note that investment ESG and Social Scores can range from 0-100, however as at end December 2023 the ESG Scores of individual issuers held within the Fund ranged from 37-75. The majority of ESG Scores are clustered between 40-60 so the Fund's overall Social Score being over 2 points higher than the iShares MSCI ACWI Social Score is significant. When the Fund's overall Social Score is compared to a broad universe of 8696 companies above \$1bn market cap, the Fund's Social Score lies at the 53rd percentile while the iShares MSCI ACWI Social Score lies in the 33rd percentile. The iShares MSCI ACWI was used as a comparator to assess how the Longevity and Social Change Fund compares to a broad global equity fund.

As noted above, the Fund has regard to certain PAIs as a proxy to measure and test the environmental and social characteristics of the investments within the Fund and specifically assessed carbon emissions (Scope 1, 2 & 3), carbon intensity, and board diversity PAIs to measure the potential negative impact of underlying investments on the environment and society. Below we have calculated the portfolio's quarterly weighted average Percentage of Female Executive and Directors, PAI Carbon Intensity Scope 1, 2 & 3 EUR score & Total Carbon Emissions (Scope 1, 2 & 3).

An investment's percentage of Female Executive and Directors helped assess whether investments were promoting the social characteristic of gender diversity within the workplace related to the Board Diversity PAI. The portfolio exhibited a Percentage of Female Executives and Directors of 34.8% while iShares MSCI ACWI ETF scored 31.0%.

To assess the portfolio's environmental characteristics, we measured the portfolio's PAI Carbon Intensity Scope 1, 2 & 3 EUR score. The portfolio had a carbon intensity score of 142 tonnes CO2 per EURm. This is significantly below the iShares MSCI ACWI which we have calculated as having a PAI Carbon Intensity Scope 1, 2 & 3 EUR score of 1,003 tonnes CO2 per EURm. The portfolio's Total Carbon Emissions (Scope 1, 2 & 3) was 2,534,978 tonnes while iShares MSCI ACWI ETF was 55,911,063 tonnes. 6% of the iShares MSCI ACWI had insufficient data. PAI data has been drawn from Morningstar. Fund level scores have been calculated from the bottom up.

The portfolio had 0% exposure to sectors that reduce lifespans or health span such as defence and weapons production, tobacco or companies engaged in the production of alcohol as well as environmental factors such as energy, iron and steel production, mining for coal and gas. To derive these revenue exposures we have undergone a granular quantitative and qualitative analysis described above.

...and compared to previous periods?

Portfolio scores for 2023 shown in the table below were calculated using a quarterly average approach.

December 2022 vs quarterly average 2023 sustainable indicators for the Pacific Longevity and Social Change Fund:

| | December 2022 | 2023 Quarterly Average |
|--|---------------|---------------------------|
| Percentage of Female Executive & Directors | 32.8% | 34.8% |
| PAI Carbon Intensity Scope 1, 2 & 3 EUR (tonnes Co2 per EURm) | 97 | 142 |
| PAI Total Carbon Emissions Scope 1, 2 & 3 (tonnes Co2) | 1,900,398 | 2,534,978 |
| ESG Score | 55.8 | 56.1 |
| Social Score | 55.5 | 55.3 |

The change in PAI Carbon Intensity and PAI Total Carbon Emissions from December 2022 to the period over 2023 is predominantly due to several companies in the fund becoming more proficient at calculating their Scope 1, 2 & 3 emissions resulting in marked increases of their PAI Total Carbon Emissions. An increase in weight to Reckitt Benckiser over the period also contributed due to the large size of the company. Another factor impacting the scores was the continuous improvement in data coverage, portfolio PAI coverage improved from 93.3% in December 2022 to 95% in 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Mandatory and additional PAI indicators were calculated for the Fund, however many of these PAIs still lack the coverage required to be useful measurements. See above the selected mandatory PAIs calculated for the fund to assess the impact on sustainability factors.

409

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is the average weight over 2023 calendar year.

| Largest investments | Sector | % Assets | Country |
|-------------------------|------------------------|----------|----------------|
| AstraZeneca | Healthcare | 3.6 | United Kingdom |
| Humana | Healthcare | 3.1 | United States |
| UnitedHealth | Heatlhcare | 3.0 | United States |
| Service Corp | Consumer Discretionary | 3.0 | United States |
| Brunswick | Consumer Discretionary | 2.8 | United States |
| EssilorLuxottica | Healthcare | 2.7 | France |
| Hologic | Healthcare | 2.7 | United States |
| Reckitt Benckiser Group | Consumer Staples | 2.5 | United Kingdom |
| Booking | Communications | 2.5 | United States |
| Allianz | Financials | 2.4 | Germany |
| Pets at Home | Consumer Discretionary | 2.4 | United Kingdom |
| AbbVie | Healthcare | 2.3 | United States |
| Axonics | Healthcare | 2.2 | United Kingdom |
| Horizon Therapeutics | Healthcare | 2.2 | United States |
| Ulta Beauty | Consumer Discretionary | 2.1 | United States |

The holdings above are an average weight over 2023 calendar year.

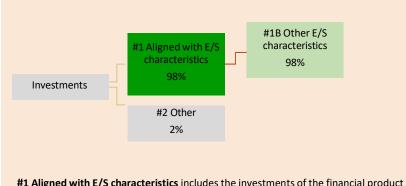

What was the proportion of sustainability-related investments?

The table below sets out details of the sustainability related investments within the portfolio using a quarterly average throughout 2023.

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | Assets |
|------------------------|--------|
| Health Care | 49.7% |
| Consumer Discretionary | 19.3% |
| Financials | 18.0% |
| Consumer Staples | 7.3% |
| Communications | 2.5% |
| Materials | 1.2% |

The sectors above are an average weight over 2023 calendar year.

The Fund did not invest in sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining, or distribution including transportation, storage and trade of fossil fuels. This is based on a quarterly average over 2023.

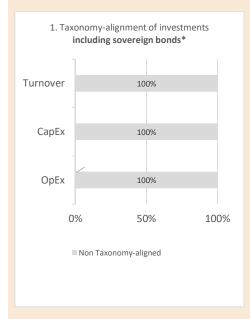

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?¹

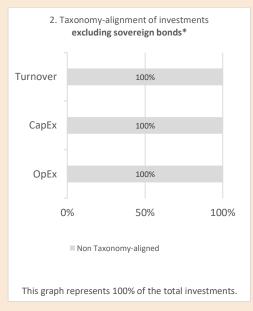

0% of the portfolio was aligned to the EU Taxonomy. The Fund does not commit to investment in Taxonomy aligned investments and none of the Fund's holdings during the reference period were so aligned.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| ☐ Yes | 5: | |
|-------|-----------------|---------------------|
| | ☐ In fossil gas | ☐ In nuclear energy |
| ⊠ No | | |

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214

- What was the share of investments made in transitional and enabling activities? As the Fund has not committed to making investments which are aligned with the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was 0%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A.

What was the share of socially sustainable investments? N/A.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments that were currently difficult to categorise such as cash and other liquid ancillary assets or investments for hedging or efficient portfolio management purposes were placed in "#2 Other" and they were there to assist in achieving the financial long-term goals of the financial product. There were no minimum environmental or social safeguards in respect of these assets.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment team regularly engaged with companies in the fund to enhance their understanding of the company's ESG performance on issues such as diversity, equality and governance. The team voted its proxy with a view to promote board diversity among the investee companies.

An engagement log has been updated over the period whenever the investment team engaged with an underlying company. Details such as the date of the engagement, the reason for the query and any comments from the company were all documented.

Example topics of the team's engagements with companies include:

- encouraging continued transition to less energy intensive products
- enquiring about initiatives to reduce energy costs
- enquiring about a high gender paygap and what steps are being taken to address this

- how human capital will be managed post an acquisition
- discussing company measures to ensure staff retention
- steps taken to protect against cyberattacks

Pacific Asset Management utilised ESG and PAI data from FactSet and Morningstar to assess company mandatory PAIs, additional PAIs, ESG scores and revenue exposures to environmental factors & social factors. The analysis was regularly run allowing the team to analyse which companies have been improving or deteriorating in certain environmental or social areas enabling more focused analysis to find out the specific causes for these score changes.

How did this financial product perform compared to the reference benchmark?

How does the reference benchmark differ from a broad market index?
N/A.

Reference
benchmarks are
indexes to
measure whether
the financial
product attains the environmental or
social
characteristics that
they promote.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A.

- How did this financial product perform compared with the reference benchmark?
 N/A.
- How did this financial product perform compared with the broad market index?
 N/A.
